

Itika Singh

Senior Data Analyst

UNITED STATES | +1 (848) 328-0328 | itikasingh@myuswork.com | <https://www.linkedin.com/in/itikasingh/>

Summary:

Senior Data Analyst with 6+ years of experience delivering advanced analytics, business intelligence, data modeling, and automated reporting solutions across finance, operations, and sales domains. Expert in SQL, Python, Power BI, and data warehousing, with proven success building scalable ETL pipelines, KPI frameworks, forecasting models, and executive dashboards. Strong partner to senior leadership, translating complex datasets into actionable insights that improve forecast accuracy, operational efficiency, and data-driven decision-making.

Skills:

Advanced Analytics & BI: Power BI, Tableau, DAX, Power Query, Executive Dashboards, KPI Frameworks, Self-Service Analytics, Dimensional Modeling
SQL & Databases: Advanced SQL, SQL Server, MySQL, PostgreSQL, SSMS, Complex Joins, CTEs, Window Functions, Stored Procedures, Query Optimization, Data Validation & Reconciliation
Programming & Statistical Analysis: Python (pandas, NumPy, Matplotlib, SciPy), Statistical Analysis, Exploratory Data Analysis (EDA), Time-Series Forecasting, Trend & Cohort Analysis, A/B Testing
Data Engineering & Automation: ETL Pipelines, Data Transformation, Incremental Loads, SQL Jobs, Power Automate, Excel (VBA, Power Query, Pivot Tables)
Cloud & Platforms: AWS (RDS, QuickSight), Azure (Data Lake, Power BI Service), GCP (BigQuery)
Delivery & Collaboration: Agile/Scrum, Jira, Git Version Control, Cross-Functional Collaboration

Experience:

ITMC Systems Inc, NJ

Dec 2024 - Present

Senior Data Analyst

- Led design and delivery of enterprise Power BI dashboards tracking revenue, spend, margin, and variance metrics, supporting executive financial reviews and \$10M+ decision-making.
- Built and optimized high-performance SQL datasets using CTEs, window functions, and dimensional modeling to enable scalable analytics and multi-year trend analysis.
- Automated end-to-end reporting pipelines using SQL stored procedures, Excel VBA, and Power Automate, reducing manual effort by 40%+ and improving data refresh reliability.
- Defined and implemented data quality, reconciliation, and metric governance frameworks, increasing stakeholder confidence and reducing reporting discrepancies by 30%+.
- Partnered with finance and operations leadership to interpret trends, identify performance drivers, and deliver actionable insights influencing budgeting and operational strategy.
- Standardized KPI definitions and documentation to ensure consistent reporting across Power BI Service deployments and business teams.

Wilson Elser, NY

Dec 2022 - Nov 2024

Data Analyst

- Developed capacity planning and forecasting models using SQL and Python, improving staffing and operational planning accuracy by 20%+.
- Conducted trend, variance, scenario, and time-series analysis, translating complex findings into executive-ready Power BI dashboards.
- Designed and maintained operational KPI dashboards used in recurring leadership and performance review meetings.
- Led data validation and reconciliation efforts during SQL Server to MySQL migration, ensuring metric consistency, historical continuity, and zero data loss.
- Collaborated with business stakeholders and engineering teams to align analytics solutions with strategic objectives and reporting standards.
- Optimized SQL queries and reporting logic, reducing dashboard load times and improving self-service analytics adoption.

Questbrain Learning Services, India

Jun 2019 - Jul 2021

Junior Data Analyst

- Owned development of Power BI and Tableau dashboards delivering sales, revenue, and operational KPIs to senior leadership.
- Automated data pipelines and reporting workflows using SQL jobs, Python, and Power Automate, improving reporting efficiency and accuracy.
- Built sales forecasting and trend analysis models leveraging Salesforce CRM data to support revenue planning and pipeline analysis.
- Performed root-cause analysis on data quality issues, implementing validation checks and QA controls across reporting layers.
- Mentored junior analysts on SQL best practices, BI standards, dashboard design, and QA techniques, improving team output quality.

Education:

Master of Science in Data Analytics (STEM) | Clark University, Worcester, MA

Bachelor of Science in Mathematics | Maharshi Dayanand University, India

Projects:

Customer Retention & CLTV Scoring (Python, SQL, Power BI, Statistical Analysis)

- Built cohort-based retention analysis and behavioral segmentation on datasets ranging from 200K–1M+ records.
- Implemented CLTV-style scoring models and simulated A/B tests to estimate reactivation uplift, achieving ~20% best-case improvement in modeled scenarios.

Data Quality & Reconciliation Framework (SQL, Data Governance, Automation)

- Developed automated reconciliation checks, duplicate detection, missing-value validation, and exception flagging across reporting layers.
- Documented metric logic and QA processes to ensure consistent, auditable reporting across refresh cycles.

Road Accident Analysis Dashboard (Power BI, SQL)

- Analyzed US road accident trends by region, weather, and vehicle type using large public datasets.
- Identified high-risk zones and contributing factors, supporting data-driven safety insights and targeting strategies.

Certifications:

- AWS Certified Cloud Practitioner
- Google Data Analytics Certificate
