

JUNRU ZHOU

JAVA DEVELOPER

San Francisco, CA | junrucoding@gmail.com | +1 (805) 232-3447

PROFESSIONAL SUMMARY

Senior Java Developer | Spring Boot | Cloud & Microservices

Results-driven backend specialist with 4+ years of experience building high-throughput systems using Spring ecosystem and modern architectures. Key contributor in designing RESTful services, event-driven solutions (Kafka), and cloud-native applications (AWS/Azure). Adept at performance tuning, database optimization, and end-to-end CI/CD pipelines.

- **Core Strengths:**
- Scalable Backend Development: Spring Boot, Hibernate, GraphQL
- Cloud & DevOps: Docker, Kubernetes, AWS Lambda, Azure Functions
- Data Layer Expertise: SQL (MySQL/PostgreSQL), NoSQL (MongoDB/Redis)
- Full SDLC Ownership: Agile development, code reviews, technical mentoring

WORK EXPERIENCE

Client: principal finance group, CA

Employer: Adient Technologies

Sr. Java Developer

Jan 2023 – Present

- Spearheading the migration of 3+ legacy monoliths to Spring Cloud-based microservices (Java 17), improving system resilience and reducing downtime by 45%.
- Leading a cross-functional initiative to refactor 50+ deprecated APIs into modern GraphQL endpoints, cutting client-side data fetching time by 60%.
- Designing and deploying AWS serverless solutions (Lambda, S3, ECS) for real-time financial analytics, reducing operational costs by \$150K/year.
- Building and integrating RESTful APIs and SOAP services, reducing client onboarding time by 15% through streamlined data exchange.
- Diagnosing and resolving JVM bottlenecks in high frequency trading modules, increasing throughput from 1,200 to 3,500 TPS.
- Championing GitOps practices (Argo CD, Terraform) to automate infrastructure provisioning, slashing deployment failures by 70%.
- Mentoring 4 junior developers on Spring Boot best practices, reducing code review cycles by 30%.
- Conducting unit and integration testing using JUnit and Mockito, achieving 85%+ code coverage and significantly lowering defect leakage.
- Enforcing OWASP standards across APIs, eliminating 100% of critical vulnerabilities in penetration tests.

Client: principal finance group, CA

Employer: Adient Technologies:

Java Developer

Aug 2020 – Dec 2022

- Designed & deployed 5+ Spring Boot microservices (Java 11) for financial data processing, improving transaction throughput by 35%.
- Led RESTful API development (Spring MVC) integrating with 3+ legacy systems, reducing latency by 40% using Redis caching.
- Containerized 4 monolithic apps using Docker/Kubernetes and migrated to AWS ECS, cutting infrastructure costs by 25%.
- Implemented Apache Kafka pipelines for real-time financial alerts, handling 1M+ daily messages with 99.95% uptime.
- Refactored 20+ SQL queries (MySQL/PostgreSQL) and indexed high-traffic tables, reducing report generation time from 8s to 1.2s.
- Automated CI/CD pipelines (Jenkins/GitHub Actions) for zero-downtime deployments, reducing release cycles by 60%.
- Enforced SonarQube standards, reducing code smells by 50% and improving maintainability.

TECHNICAL SKILLS

Programming Languages: Java 8/11/17, SQL, JavaScript (ES6+), Bash Scripting

Frameworks & Libraries: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Spring Security, Spring Cloud, Microservices

APIs & Messaging: RESTful APIs, SOAP, GraphQL, Apache Kafka, RabbitMQ

Databases: **SQL:** MySQL, PostgreSQL, Oracle, **NoSQL:** MongoDB, Redis, **Tools:** PL/SQL, Query Optimization, Indexing

DevOps & Cloud: **CI/CD:** Jenkins, GitHub Actions, GitLab CI/CD, **Containerization:** Docker, Kubernetes (EKS/AKS)

Cloud: **AWS** (Lambda, S3, ECS), **Azure** (Functions, AKS), **IaC:** Terraform, CloudFormation

IDEs & Development Tools: IntelliJ IDEA, Eclipse, VS Code, Postman, Swagger

Web Technologies: HTML5, CSS3, JavaScript, Servlets, JSP

Operating Systems: Linux/Unix, Windows, macOS

EDUCATION

Bachelors in Automation

South China University of Technology, Guangzhou, China
