EDUCATION

University of Washington

Bachelor of Science in Computer Science

Seattle, WA

Sept. 2021 – Jun. 2025

Shoreline Community College

Associate's in Computer Science

Shoreline, WA

Jan. 2022 – Jun. 2023

EXPERIENCE

Voice Core Design Intern

T-Mobile

Jun. 2025 – Sept. 2025

Bellevue, WA

- Automated workflow using Python and Baserow, reducing processing time by 80% and ensuring consistent, standardized data across software release workflows.
- Engineered pipelines to aggregate multi-source inputs with standardized schemas, enhancing scalability and auditability of system configurations.
- Optimized savings of 9+ hours per engineer each week by streamlining software release processes.
- Designed Kubernetes Server Dashboard using Ansible and Grafana to monitor K8 pod distribution and prevent service outages from server restarts.

Allen School Ambassador

Paul G. Allen School of Computer Science & Engineering

Sep. 2024 – Jun. 2025

Seattle, WA

- Designed and led computer science workshops for K-12 students, emphasizing accessible approaches to complex technical concepts.
- Implemented culturally responsive teaching strategies to broaden access to computing.
- Conducted outreach at 15+ schools and organizations, reaching 200+ students, educators, and community members.

PROJECTS

DUET | Dart, Flutter, Firebase (Auth, Firestore, Messaging), Spotify API

Jan. 2025 – Mar. 2025

- Developed a web app that analyzes Spotify listening data to generate accurate user pairings through a custom matching algorithm, enabling secure and real-time social interactions.
- Implemented Firebase Authentication with secure login, account management, and session handling.
- Utilized Firestore with rules-based access control to provide scalable, secure data management.
- Built real-time chat functionality with Firebase Messaging, supporting secure and seamless in-app communication.
- Collaborated in an Agile team environment, contributing to sprint planning, code reviews, and iterative development cycles.

AuraBot: Discord Mood Tracker | Python, Discord API, MongoDB, Git

Nov. 2024 – Dec. 2024

- Developed a Discord bot to log and track daily moods and habits, supporting mental health through secure data practices.
- Implemented MongoDB backend with secure storage and structured access patterns.
- Applied secure coding techniques (input validation, API rate-limiting) to mitigate common application vulnerabilities.
- Created interactive data visualization features to support user reflection and engagement.

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript, TypeScript, HTML, CSS, Dart

Frameworks & Libraries: React, Node.js, Express.js, Flutter, D3.js, PyTorch, Pandas, NumPy, Matplotlib, ObservableHQ, TensorFlow, npm, Yarn, Maven

Databases: PostgreSQL, MySQL, SQLite, MongoDB

Cloud & DevOps: Microsoft Azure, Docker, Kubernetes, Ansible, Grafana, Splunk, Firebase, CI/CD (GitHub Actions, GitLab CI)

Developer Tools: Git (GitHub, GitLab), Visual Studio Code, Bash, Firebase, Figma, Postman, DataGrip
