PROFESSIONAL SUMMARY

- Has an overall experience of close to 3 years specializing in building web apps using Pega PRPC and Full Stack Development.
- Experienced in developing Pega CRM customer service Constellation and Theme Cosmos products.
- Involved in creating class structures, workflows, Properties, Activities, Service Rules, Declarative expressions, Validation Rules, Decision rules, Data tables, Agents, SLAs, and Correspondences.
- Designed Object Model (Class Diagrams), Functional Model (Use Cases, Sequence Diagrams) for software applications.
- Hands-on experience writing Stored Procedures, functions, triggers, DDL, DML SQL queries.
- Expertise working on web services like Restful and SOAP.
- Good knowledge and have solid understanding of SDLC and Agile Software development models

TECHNICAL SKILLS

BPM Tools : Pega Rules Process Commander (PRPC 8.6, 8.7, 8.23)

PRPC Skill Set : App Studio, Dev Studio, Data Pages, Activities, Data Transforms, Decision and Declare Rules, Class Design.

Languages : Core Java, Python, C/C++, SQL (Postgres, DB2, MySQL), JavaScript, TypeScript, HTML, XML, JSON, CSS, Sass

Frameworks : React JS, TypeScript, Flask, Django, Bootstrap

DevOps and API Tools : Git, Docker, Swagger, Postman

Others : Data Modeling, Agile (Scrum), SOLID, Design Patterns, Debugging

EXPERIENCE

Application Engineer | Pegasystems

August 2021 – August 2023

- Contributed to build the CRM Customer Service Core Constellation and Theme Cosmos web applications v8.6, 8.7, and 8.23
- Worked extensively with flows, sub-flows, activities, data transforms, and decision rules in developing CS Case types.
- Analysed and developed features for call, chat, email, and vertical teams based on the product requirements.
- Worked on developing hierarchical class structures and designed data models for Account, Service Account, and Customer
- Build REST Connectors using PRPC, and integrated with intelligent guidance component to populate Suggested actions.
- Created Operators, Access Groups, built on Applications, and also created branches, branch rulesets and included ruleset versions based on application rulesets to run code in different applications.
- Wide usage of App Studio to build configurations for multiple case types and application type inside configuration set.
- Worked setting up SLA's with Goal time and Deadline based on cases status like Case Initiation, Process, and Resolved.
- Worked on moving rules from one ruleset to another, renaming and deleting the classes as per the best practices.
- Maintaining the Guardrails score by following all the guardrail rules, providing the required justification for the rules wherever required and checked the invalid rules and deleted them frequently to have a clean data and rule structure.
- Leveraged expertise in React JS, Redux, and TypeScript to enhance the UI/UX for Intelligent Guidance, Task Manager, Wrap Up Timeline, Customer Inquiry, and Interaction Timer feature functionalities.
- Re-engineered the React front-end architecture for Knowledge Management product, eliminating 10+ redundant Rest API calls by improving performance by 14%, ensuring a flawless user experience with zero performance bugs.
- Developed event-driven microservices for the CRM core application, constructing 10+ data models and Rest APIs, collaborating with UI/UX and cross-platform teams
- Earned Pega Real-Time Award for migrating CS React repository to TypeScript, cutting runtime errors.
- Supervised repositories for smooth upgrades for 2 internal applications, both in Production and Staging environments.
- Managed CI/CD pipelines, optimized webpack configurations, and upheld code quality, reducing lint errors by 30%
- Performed unit testing and accessibility test using JAWS to observe the behavior of multiple feature components.

Software Developer Intern | HashedIN by Deloitte

July 2021 – August 2021

- Built an **expense tracker web app** with 8+ transaction categories and customized dashboards using **Angular**.
- Engineered, optimized, and tested **10+ REST API calls** for Purchase orders and bills with **Spring Boot & Hibernate**, establishing efficient **CRUD** operations and reducing transaction processing times by 15%.

Software Developer Intern | Tata Consultancy Services

July 2020 – September 2020

- Led a research project on extraction instruments information from P&ID Engineering diagram images using **ResNet and CNN**, improving tools identification accuracy by **9%**.
- Recognized and recorded instrument data with devised solutions, using image processing and object classification with an **86% accuracy rate on test data**.

EDUCATION

Stony Brook University - SUNY

MS in Computer Science | GPA : 3.4/4.0

August 2023 – May 2025

CERTIFICATIONS

Pega | Certified System Architect (PCSA)

Infosys | Certified Software Engineer

Oracle | Database Design Certified
