Education

Bachelor of Science, Economics

April 2024

Michigan State University | East Lansing, MI

- *Minors:* Computer Science, Quantitative Data Analytics
- *Cumulative GPA:* 4.0/4.0, Honors College, Econ Scholars Program
- *Dean's List:* All semesters, Graduated with High Honors, Recipient of Board of Trustees Award, Honors Excellence and Global Neighbors Scholarships (Merit Scholarships)

Skills: AWS (Cloud Practitioner Certification), Python, SQL, R (Intermediate), Excel (Pivot Tables, VLOOKUP, Statistical Functions), Snowflake (Beginner), Stata, ArcGIS (Beginner), Market Research, Tableau

Relevant Experiences

Data Engineer

July 2024 - Present

LiveMindz, Coppell, TX

- Leverage multiple AWS services such as EC2, S3 and RDS Databases to analyze data across 10+ accounts for data compliance purposes, improving data management practices and ensuring data accuracy
- Develop and maintain CI/CD pipelines using Terraform for automated provisioning and management of client's AWS resources
- Produced reports and dashboards that supported data-driven business decisions and enhanced visibility into compliance trends.

EC499: Economic Research Project (Market Research)

January 2024 - April 2024

Dr. Prabhat Barnwal, Michigan State University, East Lansing, MI

- Analyzed NSS household survey data using STATA to assess the impact of the NE1 expressway on monthly per capita expenditure (MPCE)
- Applied difference-in-differences regression to compare effects across regions with varying expressway proximity
- Identified shifts in household spending patterns driven by reduced transport costs and expanded market access

Research Assistant

May 2023 - October 2023

Dr. Hanzhe Zhang, Michigan State University, East Lansing, MI

- Wrote Python scripts to scrape and mine information, primarily utilizing ChatGPT API, virtual environments, and PDF-parsing packages
- Analyzed a dataset of over 17,000 unique rows and drew meaningful conclusions related to the research goals
- Translated raw data into structured formats for analysis and presentation by leveraging Python for data processing and Excel for organization and visualization

Research Assistant

May 2023 - September 2023

Dr. P. Sanjay, Indian Institute of Management Sirmaur

- Researched and analyzed ESG and sustainability reports of Dow-Jones Top 50 USA companies to determine sustainability practices and frameworks referenced, and what data quality assurance methods were employed
- Developed an understanding of sustainability practices across various industries by analyzing reports and staying updated on regulatory frameworks to effectively summarize key findings from sustainability reports.
- Built Excel models to compare data quality and reporting practices across sectors.

Data Analyst Intern

July 2022 - August 2022

Quantum Consumer Solutions, Remote

- Analyzed datasets with up to 12,000 entries and performed data transformation using Excel and SQL
- Coordinated with field teams abroad through regular virtual meetings and data tracking in Excel to monitor collection progress, ensuring sufficient sample sizes for accurate analysis
- Gathered data from over 100 respondents using a survey application and Python
- Maintained data accuracy through cleaning respondent data before analysis and produced reports and visualizations using Microsoft Office tools to present key findings to stakeholders
