

Kevin Manzi

Data Analyst

469-215-1712 | Kevinmanzi617@gmail.com | Texas, USA | [LinkedIn](#)

SUMMARY

Data Analyst with 3 years of experience transforming complex datasets into actionable insights to support business decision-making. Proficient in SQL, Excel, Python, Power BI, and Tableau with expertise in data visualization, reporting automation, and KPI tracking. Collaborated with cross-functional teams to optimize processes, improve data quality, and deliver measurable business impact.

SKILLS

Methodologies: SDLC, Agile, Scrum, Kanban, Waterfall

Language: Python, R, SQL, SAS

Packages: NumPy, Pandas, Matplotlib, Seaborn, SciPy, Scikit Learn, ggplot2

Visualization Tools: Tableau, Power BI, Advance Excel

Cloud Technologies: AWS, Azure

Others: Warehousing, Data Wrangling, Statistical Analysis, Visualization

Database: MySQL, SQL Server, PostgreSQL, MongoDB

EXPERIENCE

Data Analyst

Cigna Healthcare Group, USA

Mar 2025 – Present

- Collaborated within Agile teams to deliver iterative data analysis reports, ensuring a faster turnaround for key projects.
- Leveraged SQL to extract, transform, and analyze healthcare data from a data warehouse, improving query efficiency by 25% and reducing report generation time by 40%.
- Conceptualized Matplotlib and Seaborn to create detailed visualizations of patient data, providing insights that improved resource allocation by 15%.
- Created interactive dashboards using Tableau to track KPIs, enabling stakeholders to monitor healthcare data trends in real time, resulting in a 30% improvement in decision-making speed.
- Enhanced data quality by implementing validation checks and resolving data inconsistencies, improving overall accuracy by 20% for medical reports.
- Analyzed KPIs, identifying trends and outliers, which led to a 10% reduction in patient readmission rates.
- Optimized data pipelines and ensured smooth data integration into the data warehouse, contributing to a 20% increase in data accessibility for the teams.

Data Analyst

Salcomp – Manufacturing Company, TX

May 2023 – Feb 2025

- Increased cross-team dashboard adoption by 35% by collaborating with sales, quality, and production leads to define standardized KPIs and create consistent reporting templates across departments.
- Automated weekly commercial reports using SQL and Python scripts, saving 50+ hours/month, and partnered with sales operations leadership to design outputs segmented by region, customer, and product line.
- Optimized complex SQL queries and developed indexed materialized views, reducing dashboard load times by 27% and enhancing Power BI performance for end-users across departments.
- Designed a Power BI sales opportunity model using DAX, improving forecast accuracy by 17%, and partnered with sales team leads to define win/loss criteria and conversion thresholds aligned with pipeline goals.
- Boosted data reliability by developing robust ETL pipelines in Python (pandas, SQL Alchemy) to extract from MES and transform raw production and sales data, and load cleaned outputs into SQL Server tables used by Power BI.
- Enabled real-time executive insight by collaborating with senior leadership to deliver dashboards that tracked revenue trends, customer health scores, and strategic account KPIs for quarterly reviews.

Data Analyst

Northern Trust, USA

May 2022 – Apr 2023

- Advanced analysis projects via well-defined phases within Waterfall methodology, ensuring precise planning.
- Automated routine data extraction and transformation tasks using Python, reducing manual processing time by 50% and increasing overall team productivity.
- Implemented advanced data validation techniques, improving data accuracy by 30%, which led to more reliable and actionable insights for business decisions.
- Spearheaded the redesign of data processing pipelines, leading to a 40% reduction in data retrieval time, enhancing the team's ability to deliver insights faster.
- Created and maintained interactive dashboards in Power BI, enabling real-time data visualization and driving a 25% increase in data-driven decision-making across departments.
- Translated data insights into clear, actionable suggestions for technical & non-technical audiences, for data-driven strategies.

EDUCATION

Bachelor's degree in Computer Science, The University of Texas at Dallas, TX

CERTIFICATION

Google Data Analytics
