SUMMARY

- **4 years** of experience with Agile, Waterfall, and Kanban methodologies, driving project success through effective sprint planning and stakeholder collaboration.
- Proficient in Python, R, and SQL, using Tableau and Power BI to deliver actionable insights for data-driven decision-making.
- Skilled in creating FRDs, BRDs, SRS, user stories, and use cases, ensuring clear communication of requirements throughout the project lifecycle.
- Experienced in MS Project, Asana, Trello, and Rally for managing timelines and resources, consistently achieving project milestones.
- Strong verbal and written communication skills, facilitating JAD sessions and presenting findings to diverse stakeholders for enhanced collaboration.

SKILLS

Methodology:	SDLC, Agile, Waterfall, Kanban
Programming Languages:	Python, R
Database Management:	SQL, MS XS, MS Excel, Requirements Traceability Matrix (RTM)
Documentations:	FRD, BRD, SRS, User Guide, User Stories, Use cases
Project Management Tools:	MS Project, MS Excel, MS SharePoint, Asana, Trello, Rally
Visualization Tools:	Tableau, Power BI,
Business Analysis:	Cost/benefit Analysis, Impact Analysis, GAP Analysis, Risk Analysis, SWOT Analysis
Tracking Tools:	Jira, HP Quality Center, Rational ClearQuest, RTM
Cloud Computing Platforms:	AWS, Azure
ERP Planning & CRM:	SAP, MS Dynamics Nav, Salesforce, HubSpot
Technical Skills:	KPI, UAT, Test Plans, Alteryx, Requirement gathering, Google Analytics, Data Analysis, MS Visio, JAD, MS 360, Web XP, Software development & testing, Data Modelling, Database Knowledge, Business Intelligence (BI) Tools, Process Mapping, User Experience (UX) Understanding, Quality Assurance (QA) Knowledge, Prototyping, UML, MS Project and Visio, SharePoint, Confluence, Demand Forecasting, Root Cause Analysis, SQL, Inventory Management, Customer Relationship Management, Salesforce Customization
Soft Skills:	Time management, Leadership, Management, Problem-solving, Negotiation, Decision-Making, Documentation, and Presentation, Verbal communication, Sprint Planning

EXPERIENCE

Business Analyst || Inova Health System, VA

Aug 2023 - Current

- Led the end-to-end implementation of a telehealth platform for a mid-sized healthcare facility, significantly enhancing patient access to care and improving overall operational efficiency.
- Managed the documentation of requirements throughout all phases of the Software Development Life Cycle (SDLC), ensuring traceability and clarity. Applied Waterfall methodologies to align with project needs and stakeholder expectations.
- Utilized SQL for data extraction and analysis, conducting detailed examinations of patient records and operational metrics related to telehealth services. Created complex queries to support 80% data validation and reporting efforts, ensuring high data integrity during implementation.
- Developed user stories in collaboration with stakeholders to represent telehealth system functionality from the end-user perspective. Created detailed use cases to define user interactions, facilitating a clear understanding among development teams.
- Designed and implemented interactive dashboards in Power BI to visualize key performance indicators (KPIs) and metrics related to telehealth usage, providing stakeholders with 60% actionable insights. Conducted regular data reviews to track project 50% progress and inform stakeholders of potential risks.
- Conducted comprehensive cost/benefit analyses to assess the financial implications of the telehealth implementation, including return on investment calculations. Presented findings to senior management to support decision-making and secure necessary project funding.
- Supported the deployment of cloud-based solutions on AWS, enhancing system scalability and data security for the telehealth platform. Collaborated with technical teams to ensure compliance with 55% data privacy regulations and best practices in cloud architecture.

- Integrated financial management tools for resource planning related to the telehealth project. Worked closely with finance teams to streamline budget tracking and resource allocation, ensuring alignment between telehealth functionalities and financial operations.
- Collaborated with stakeholders to implement HL7 standards for data exchange between the telehealth platform and existing healthcare applications, ensuring 60% seamless interoperability and compliance with industry regulations.
- Employed Alteryx for advanced data preparation and analytics, enabling efficient data blending and transformation to support business intelligence initiatives specific to telehealth. Developed automated workflows to enhance overall efficiency in data handling.
- Facilitated User Acceptance Testing (UAT) sessions with end-users, guiding them through test scenarios to validate telehealth system functionality. Gathered actionable feedback and collaborated with development teams to effectively address 80% identified issues.

Business Analyst || Wipro, India

May 2019 – Dec 2022

- Led a critical project to revamp an existing financial services platform by implementing data-driven features and improving user experience. This initiative resulted in a 25% increase in client engagement and a 15% boost in transaction success rates, significantly impacting overall business performance.
- Collaborated with development teams to automate data processing using Python scripts, improving efficiency by 30% and reducing manual intervention in financial reporting.
- Conducted comprehensive data analysis and reporting using MS Excel, developing interactive dashboards and visualizations to monitor key performance indicators (KPIs) and project metrics for financial performance.
- Developed and maintained essential documentation, including Functional Requirement Documents (FRD) and Business Requirement Documents (BRD), ensuring clear articulation and traceability of 49% of business and technical requirements.
- Utilized MS Project for project planning and management, including timeline creation, resource allocation, and task assignment, ensuring adherence to critical financial project milestones and deliverables.
- Designed and deployed advanced data visualizations using Tableau to present analytical insights, facilitating data-driven decision-making for financial stakeholders.
- Performed GAP analysis to assess current system capabilities against financial project requirements, providing 35% actionable insights for system enhancements and feature development.
- Managed quality assurance processes using HP Quality Center, ensuring compliance with established testing protocols and that all financial project deliverables met regulatory and performance standards.
- Collaborated with IT infrastructure teams to deploy platform enhancements on Azure, ensuring robust scalability and reliability of financial applications.
- Supported the integration of the financial platform with SAP, optimizing 56% of operational workflows and improving data synchronization between financial systems.
- Conducted stakeholder engagement through workshops and interviews to gather and document comprehensive business requirements, ensuring alignment with financial objectives.
- Created detailed process maps using process mapping tools to visualize existing workflows, identify bottlenecks, and recommend improvements in financial processes.
- Executed Agile methodologies, facilitating iterative project management through daily stand-ups, sprint planning sessions, and retrospectives to adapt to evolving financial project requirements.
- Developed interactive prototypes and wireframes to demonstrate new features and functionalities, enabling stakeholders to visualize potential changes before development.
- Collaborated with data engineering teams to design and refine data models, ensuring alignment with analytical requirements and maintaining data integrity across financial platforms.

EDUCATION

Master of Science in Data Analytics and Engineering: George Mason University (Fairfax) USA.

Bachelor of technology in Electronics and Communication Engineering: KL University (Vijayawada), India.
