SUMMARY

- Accomplished Data analyst of 4+ Years of Experience in Data Science & AI/ML, contributed to high-impact projects across multiple industries, including finance, healthcare, and technology, driving data-driven solutions and innovation.
- Proficient in Python, R, and SQL for data analysis, statistical analysis, and modeling using libraries like Pandas, NumPy, and Seaborn for efficient data handling and visualizations.
- Developed machine learning models with TensorFlow, PyTorch, and Scikit-Learn, solving real-world problems through predictive analytics. Applied regression models, decision trees, and time series forecasting to support business insights.
- Created impactful dashboards with Tableau, Power BI, and Python visual tools to present complex data to non-technical stakeholders, enabling data-driven decisions.
- Led data integration efforts using ETL pipelines with Apache Kafka, Azure Data Factory, Databricks, AWS, and Talend, ensuring seamless data processing across systems.
- Experienced in managing relational databases such as MySQL, PostgreSQL, and Oracle, focusing on data integrity and accessibility for analysis.
- Collaborated in agile environments using Git for version control, ensuring smooth teamwork across cross-functional teams.
- Comfortable working across multiple operating systems, including Windows, Linux, and macOS.
- Demonstrated ability to translate analytical insights into strategic recommendations, creating measurable value through data science initiatives.
- Proficient in Agile methodologies (Scrum), actively participating in daily stand-ups, sprint planning, and continuous integration delivery (**Jira**).

TECHNICAL SKILLS

Programming Language:	Python, SQL, R, SAS, C, C++, Cobol, Java, Linux
Frameworks & Tools:	Pandas, NumPy, Seaborn, Plotly, ggplot2, PyCharm, Matplotlib, R Studio
Data Visualization:	Tableau, Power BI, Quick sight, Advanced Excel (VBA, pivot tables, array functions, power pivots)
Machine Learning:	TensorFlow, PyTorch, Keras, Scikit- Learn, NLP, Supervised and Unsupervised Learning, Clustering Techniques, Predictive Modelling, Neural Networks, Regression, Classification Models, Statistical Analysis, NLTK, Large Language Models (LLMs)
Cloud Platforms:	AWS Cloud (EC2, Redshift, S3, ECS, RDS, Glue, Lambda & Step functions, DynamoDB) Azure Databricks, GCP
Databases:	SQL Server, Oracle, MySQL, PostgreSQL, DB2, MongoDB
Big Data Technologies:	Apache Spark, Apache Kafka, Apache Hadoop, ETL/ELT, Databricks
Other Technical Skills:	Microsoft SQL Server, SSIS, SSRS, SSAS, Docker, Kubernetes, Apache Hive, Data Quality and Governance, Informatica, Advance Analytics, Data Mining, Data Visualization, Data Warehousing, Data Transformation
Version Control Tools:	Git, GitHub, Bitbucket
Operating Systems:	Windows, Linux, macOS

EDUCATION

University of North Texas - Denton, TX, USA

Master of Data Science (CGPA: 3.9/4.0)

KL University - Vijayawada, India

Bachelor of Science: (Electrical and Electronics Engineering) (CGPA: 3.6/4.0)

PROFESSIONAL EXPERIENCE

CHASE, Dallas, Texas, USA

May 2023 – Present

Data Analyst

- Utilized **Python and SQL** for ETL processes, transforming raw log data and storing it efficiently in **Hive** for data warehousing.
- Deployed **Apache Kafka** to manage high throughput streaming of diverse data types, including web activities and IoT sensor outputs.
- Performed comprehensive data cleaning and preprocessing to ensure accuracy in **credit risk models**.
- Designed **interactive dashboards** to track credit card transactions, enabling better financial decision-making and improving credit risk evaluations.
- Applied machine learning techniques—such as **logistic regression, multivariate regression, K-means clustering**, and ensemble models—to forecast delinquency risks and analyze payment behaviors.
- Developed **Tableau dashboards** to identify patterns in customer delinquency and enhance loan and billing management with detailed financial reports.

Tata Consultancy Services, Hyderabad, India.

August 2020 – July 2022

Data Analyst

- Designed a **machine learning**-driven workflow to digitize Insurance Proposal Forms for U.S. insurance providers.
- Built and maintained **ETL pipelines in Azure** using **Azure Data Factory** and **Databricks**, streamlining data management processes. Implemented data lakes and warehouses to efficiently extract, transform, and load data from diverse sources into the company's central repository.
- Applied **NLP** techniques, including **Named Entity Recognition (NER)**, to health insurance claims, enabling the extraction and classification of key details such as patient names and medical procedures, supporting deeper data analysis and more informed decision-making.
- Implemented advanced **statistical machine learning algorithms** such as Random Forest, LightGBM, and XGBoost to detect fraudulent insurance claims, improving fraud detection and prevention efforts.
- Enhanced the accuracy and efficiency of over 50 health insurance **claim screens** by **refining adjudication rules** and conducting thorough testing across multiple regions.
- Developed dynamic **Tableau** dashboards to monitor key metrics related to claim adjudication and fraud detection, improving data visualization, reporting systems, and facilitating analytical insights for better operational decisions.

Byjus, Hyderabad, India

July 2018 – May 2020

Business Data Analyst

- Led the extraction and interpretation of large datasets using **SQL** and **Python**, applying advanced machine learning models to forecast market trends and consumer behavior, supporting data-driven business strategies.
- Implemented **time series analysis** and **logistic regression models** to improve supply chain operations, minimizing waste and enhancing distribution efficiency through accurate demand forecasting.
- Managed a Spark-based project on **EMR** to convert complex JSON data into structured CSV files, enabling seamless data analysis and reporting.
- Conducted consumer sentiment analysis on social media using **NLP** tools like **NLTK** and **pandas** in Python, uncovering actionable insights into customer feedback and preferences.
- Designed interactive and real-time dashboards in **Power BI**, empowering stakeholders to monitor performance metrics effectively and respond quickly to changing market conditions.
- Cleaned and transformed data from multiple sources, built predictive models to identify opportunities and risks, and ensured data integrity for analysis.
- Collaborated with stakeholders to define **KPIs**, developed customized reports, and documented workflows for transparency and knowledge sharing.
- Conducted **A/B tests** to evaluate strategies and implemented process improvements to optimize workflows and reduce delays.
