PROFESSIONAL SUMMARY

Detail-oriented and analytical healthcare professional with graduate-level training in health informatics and a strong academic foundation in clinical data analysis and statistical methods. Experienced in working with complex healthcare datasets through academic and project-based research, including data cleaning, validation, and reporting to support data quality and decision-making. Proficient in Microsoft Excel, SQL, Python, and Tableau, with demonstrated ability to document data processes, identify trends and anomalies, and collaborate in team-based environments. Eager to apply analytical skills, attention to detail, and knowledge of healthcare data standards in an entry-level clinical data analyst role.

EDUCATION

George Mason University, College of Public Health

Master of Science in Health Informatics - Concentration: Health Informatics Management

May 2025

Christopher Newport University

Bachelor of Science in Biochemistry

SKILLS

- **Consulting & Project Management:** Agile, Waterfall, DMAIC Process, Lean Six Sigma, Strategic Planning, Stakeholder Communication, Quality Improvement, Change Management
- **Data Analysis & Tools:** SQL, Tableau, Python, Microsoft Office Suite (Excel, PowerPoint, Word), VBA, Statistical Modeling, Lucidchart, Linux OS, HL7, Microsoft Azure, Electronic Health Records (EHR), HEDIS Measures
- **Core Competencies:** Clinical Operations, Workflow Optimization, HIPAA Compliance, Documentation Practices, Cross-Functional Team Collaboration
- **Clinical Research and Data Management:** Clinical Data Management (academic/project based), Data cleaning and mapping, Clinical Research Documentation, Clinical Datasets, Data Validation

EXPERIENCE

Pediatric Associates of Springfield, Clinical Supervisor

March 2023 - Present

- Lead clinical operations for a 5-member team, ensuring adherence to clinical standards, documentation practices, and EHR workflows.
- Supported operational performance assessments and solution implementation initiatives that improved patient throughput by 20%, aligning care delivery with organizational efficiency and sustainability goals.
- Acted as a primary liaison between providers, patients, and external service partners to resolve coverage-related questions, documentation requirements, and service coordination issues.
- Supported onboarding and training of staff on workflows, documentation standards, and policy-aligned procedures to ensure consistent service delivery.
- Identified operational risks and documentation gaps impacting service delivery and reimbursement, supporting strategic recommendations within financial and operational frameworks.

George Mason University, Graduate Research Assistant

October 2024- May 2025

- Developed predictive regression models and Azure cloud-based pipelines to analyze complex healthcare datasets, including patient demographics, ICD codes, and diagnostic information.
- Documented data processing steps in alignment with standardized research workflows.
- Tested and validated data cleaning and transformation processes to ensure accuracy, consistency, and reliability of healthcare datasets for downstream analysis.
- Delivered client facing reports and presentations summarizing analytical findings, trends, and strategic recommendations for healthcare stakeholders.

Analyze Missing Values, Project Manager

August 2024 -December 2024

- Led 8 cross-functional teams of 3 to develop regression models predicting antidepressant responses using 100+ predictors.
- Drafted and maintained detailed project plans and timelines, tracking action items, and risk mitigation strategies.
- Communicated findings and recommendations to stakeholders, ensuring alignment with organizational goals.
- Led comprehensive requirement gathering sessions with stakeholders to define project scope, objectives, and success metrics.
- Independently prioritized multiple concurrent projects and met deadlines in a fast-paced environment.

Pediatric Associates of Springfield, Medical Assistant

July 2019- March 2023

- Managed patient intake, triage, and medical documentation for 500+ patient records, ensuring accurate EHR input and workflow efficiency.
- Supported technical troubleshooting and workflow assessment of EHR and telemedicine platforms (OP, Doxy.me).
