SUMMARY

Results-driven Java Developer with 3+ years of experience in designing, developing, and maintaining scalable applications. Proficient in Java, Spring Boot, Microservices, REST APIs, and SQL/NoSQL databases. Strong problem-solving skills with a passion for writing clean, efficient, and maintainable code. Experienced in Agile methodologies and collaborating with cross-functional teams to deliver high-quality software solutions

Java8 | HTML | MySQL | JavaScript | J2EE | Spring | AWS

EDUCATION

University of North Texas

Master's, Computer Science

June 2023 – May 2025

GPA: 3.5

- Data Structures, Machine Learning, Big Data and Data Science.

Madanapalle institute of Technology and Science

Bachelor's, Computer Science

August 2015 – May 2019

GPA: 8.6

- Data Analytics, Web programming, Data Structures and Algorithms, Database management system and Operating System etc.,

PROFESSIONAL EXPERIENCE

Capgemini Technology Services India private Limited

Sr Java Backend/Middleware Engineer/Associate consultant

Bangalore, KA, India

June 2022 - June 2023

Technical Environment:

Java 8, Spring Boot, REST/SOAP APIs, Salesforce Integration, Docker, OpenShift, Jenkins, CI/CD Pipelines, Unit Testing Frameworks, Caching Solutions, Relational Databases, API Security Protocols, Monitoring Tools

Key Responsibilities:

- Designed and developed a high-performance middleware platform using Spring Boot to enable real-time data synchronization between frontend CRM systems and multiple downstream enterprise applications
- Implemented RESTful microservices architecture with significant performance improvements through JPA optimization and Redis caching implementation
- Engineered seamless integration with Salesforce APIs (REST/SOAP) to establish bidirectional data flow and eliminate manual processes
- Implemented robust API security using OAuth 2.0, JWT, and mutual TLS to ensure data protection compliance
- Containerized services using Docker and orchestrated deployment on OpenShift (Kubernetes) to support high-volume concurrent requests
- Established automated CI/CD pipelines using Jenkins and implemented zero-downtime deployment strategies
- Collaborated in Agile Scrum environment with 2-week sprints to deliver multiple major features
- Implemented system monitoring solutions to track API performance metrics and error rates.
- Achieved 85% code coverage by implementing comprehensive test suites with JUnit 5, Mockito, and Serenity BDD
- Standardized data exchange formats across systems using JSON Schema and Apache Camel transformations

Larsen & Toubro Infotech private Limited

Software Engineer

Bangalore, KA, India

January 2020 - June 2022

Technical Environment:

Java/J2EE, JSP, JSF 2.0/Prime Faces, Struts 2, Hibernate, HTML5/CSS3, JavaScript/jQuery, XML/XSLT, Oracle DB, UNIX Shell Scripting, Maven, Jenkins, Eclipse IDE

Key Responsibilities:

- Frontend Development: Designed and implemented responsive UI using HTML5, CSS3, XHTML, and JavaScript in

accordance with W3C standards, optimizing the user experience across browsers and devices.

- Enhancing Interactivity: Leveraged jQuery for interactive elements, dynamic form validation, and AJAX integration to improve user engagement.
- JSF Integration: Developed dynamic views and page navigation using JSF Prime Faces, and configured JSF components and navigation rules to create seamless user interfaces.
- Struts Framework Development: Developed Action Forms, Action Servlets, and Action classes to handle web requests, ensuring smooth form processing and data validation.
- Data Access Logic: Implemented Hibernate for ORM-based data persistence, optimizing database interactions and transaction management.
- Automation: Created UNIX Shell Scripts for automating the extraction and reporting of daily, weekly, and monthly data, reducing manual effort and improving reporting accuracy.
- Batch Jobs & Data Transfer: Developed batch jobs for data transfer between servers using UNIX Shell Scripts, ensuring efficient system integration.
- CI/CD Integration: Utilized Maven for build management and integrated Jenkins for continuous integration, automating build processes and ensuring faster, error-free deployments.
- Agile Scrum: Actively participated in Agile Scrum methodology, contributing to design, development, and UAT while attending daily stand-ups and sprint reviews to ensure timely delivery of features.

SKILLS

Technical Skills

- Languages: Java (8+), JavaScript, SQL, Shell scripting
- Frameworks: Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, Struct2 etc.,
- Web Technologies: REST APIs, SOAP, JSON, XML, JWT, OAuth 2.0
- Databases: MySQL, PostgreSQL, MongoDB, Oracle
- Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, Kubernetes, Jenkins, OpenShift
- Tools & IDEs: IntelliJ IDEA, Eclipse, VS code, Git, Maven, Postman, Swagger, SoapUI, Splunk
- Testing: JUnit, Mockito, Postman, Serenity BDD
- Methodologies: Agile (Scrum/Kanban), CI/CD, TDD

CERTIFICATIONS

Java & J2EE Developer Certification from Edureka.

AWS Certification Training - Solution Architect from Edureka.
