New York City, NY | (332)276-4728 | sa4317@columbia.edu | [LinkedIn](#)

EDUCATION

Columbia University

New York, NY

Master of Science, Management Science and Engineering, GPA: 3.6/4

Aug 2023 – Dec 2024

Courses: Operations Consulting, Game Theoretic Business Strategy, Digital Product Management Lab, Behavioral Economics and Decision Making, Business Analytics, Managerial Negotiations, Data Visualization, Operations Strategy, Supply Chain Management.

Experience: Teaching Assistant for Startup Fundamentals course

Sept 2024 - Dec 2024

University College of Engineering, Osmania University

Hyderabad, IND

Bachelor of Engineering, Electrical and Electronics Engineering, GPA: 3.56/4

July 2018 - May 2022

Courses: Statistics and Probability, Information Security, Software Engineering, Hybrid Electric Vehicles

Awards: Best Project in the Department of Electrical and Electronics Engineering for the academic year 2021-2022; Exemplary Student Volunteer Award for dedicated and committed services towards the IEEE Hyderabad Section SAC.

SKILLS

Programming: Python, SQL **Tools & Libraries:** NLTK, TensorFlow, Beautiful Soup, Pinecone, Metabase **Databases:** MySQL

Data Visualization: Tableau, Power BI, Matplotlib **Other Skills:** AWS, Spark, MS Office Suite, Smartsheets, Jira, Confluence.

Skills: A/B Testing & Experimentation, Product Management, Stakeholder Engagement, Cross-Functional Team Collaboration.

PROFESSIONAL EXPERIENCE

HEAR ME

New York, NY

Product Operations Intern

May 2024 – Aug 2024

- Collaborated with cross-functional teams to develop a scalable scheduling system, leveraging CRM tools to reduce coverage gaps by 15% and administrative workload by 20% through automation, while ensuring milestone tracking and stakeholder reporting.
- Implemented a quality auditing system that sampled 10% of interactions, improving service monitoring and feedback by 30%.
- Worked closely with CEO, COO and Business Dev. Teams to identify scheduling inefficiencies, integrated CRM tools to streamline communication, and presented recommendations that enhanced shift flexibility, reduced conflicts by 25% and manual oversight by 20%.

CSIR-IICT

Hyderabad, IND

ML Research Intern

Oct 2022 – Apr 2023

- Developed predictive machine learning models, using GBRT and ANN, with 698 experimental data points from 2010-2020 to predict syngas conversion and methanol selectivity with $R^2 \sim 0.95$, optimizing catalyst performance insights for decision making.
- Preprocessed and normalized datasets, reducing input parameters by 42% through advanced feature engineering, enabling robust predictions for catalyst compositions and reaction conditions.
- Identified key factors influencing catalytic activity, such as calcination temperature and catalyst composition, providing actionable insights for industrial methanol production.

ACADEMIC PROJECTS

Columbia University

New York, NY

An Interactive Imdb Dashboard For Actor-Centric Career Exploration

Sept 2024 - Nov 2024

- Designed and developed an interactive IMDb dashboard using Python and Tableau, analyzing about 900,000 records across several datasets to provide actor-specific insights, achieving a 20% increase in user engagement during testing.
- Cleaned and standardized large datasets, integrating key metrics such as genre performance and popularity trends, resulting in a 30% improvement in data accuracy and actionable insights.
- Delivered personalized filtering options and visual storytelling features, exceeding usability and engagement benchmarks by 15%, while showcasing scalability for real-world applications.

INDUSTRY PROJECTS - Year-long consulting projects with industry partners through Columbia University.

KEARNEY

New York, NY

ML Supply Chain Consultant

Aug 2023 – Apr 2024

- Led an 8-person team, planned and executed program milestones in developing a machine learning model to predict semiconductor process node size and die area, achieving over 70% accuracy, improving decision-making in supply chain optimization.
- Implemented agile methodologies and collaborated with cross-functional teams and internal & external stakeholders to integrate data sources, ensuring real-time forecasting, process improvements within timeline and budget constraints.
- Managed team roles, facilitated agile meetings, and employed advanced machine learning algorithms, resulting in significant reductions in analysis time and improved decision-making confidence in semiconductor manufacturing.

CHANGING ROOMS

New York, NY

AI/ML Product Consultant

Aug 2023 – Apr 2024

- Led an 8-person team to develop an “AI Stylist” chatbot, to provide users with fashionable clothing recommendations, utilized developer tools and API platforms to improve the functionality and scalability.
- Employed data aggregation techniques to automate and improve the chatbot’s recommendation accuracy by 14% and utilized the web scraping and crawler technologies to enrich the chatbot’s recommendation database, achieving an overall 65% accuracy rate.
- Managed collaborative sprints to deploy updates, prioritize feedback, and deliver product improvements using agile methodologies, thereby driving 75% user engagement and enhancing performance through ADO, A/B testing and JIRA-based defect tracking.
