EDUCATION

- **Seattle University** Washington, USA
Master of Science in Computer Science; GPA: 3.81 Sept. 2022 – April. 2024
- Course completed: Fund of Software Engineering, Distributed Systems, Parallel Computing, Ethics in Computing, Cloud Computing, Software Testing and Debugging.
- **Dhirubhai Ambani Institute of Information and Communication Technology** Gandhinagar, India
Master of Science (Information Technology); GPA: 3.33 (7.95/10.0) Aug. 2018 – June. 2020

EXPERIENCE

- **Tata Consultancy Services (T.C.S)** Mumbai, India
Software Engineer August 2020 - August 2022
 - Assistant Systems Engineer on a team of 12 in the Marathon Technologies organization responsible for developing new features and supporting existing features like Leader-board, Result and Tracking that participants use for training and competing in marathons such as London Marathon, NYC half Marathon etc.
 - Added a new feature to manually record run times for virtual participants in the base Marathon product which can be customized for future use.
 - Improved the user experience for the Amazon LEX-powered chat bot using Android Speech Recognizer.
 - Implemented a feature to add up to 2 supporters to virtually track the runner during the marathon. This feature is estimated to be used by nearly 5000 participants
 - Tools and Technologies: Kotlin, Android Studio, Firebase
- **Abbott Healthcare Pvt.Limited** Mumbai, India
Software Engineer Intern Jan 2020 - April 2020
 - Interned with the cloud infrastructure team for abbottstore.com.
 - Automated the process to spin up cloud infrastructure to launch the Magento2 web server which is used to host the B2C application on Amazon Web Services, thereby reducing the setup time by 90%.
 - Built a serverless prototype for an ECS Fargate-based containerized solution that utilizes Docker for seamless scaling and a more secure execution environment reducing the operational load of the infrastructure team.
 - Tools and Technologies: AWS, CloudFormation, JSON.
- **R.M Consultancy** Vadodara, India
Software Engineer Intern May 2019 – July 2019
 - Following General Data Protection Regulation (GDPR), developed an end-user notification workflow for use by the IT team and the Data Protection Officer in case of a breach using Salesforce Apex language and Apex Trigger.
 - Migrated Legacy workflow of Governance Request Page to Lightning Web Components.
 - Tools and Technologies: Salesforce, Visualforce, Apex.

PROJECTS

- **Responsive Web Design for News Website** : Developed and hosted a responsive website, compatible with a variety of screen sizes, for organizing news. Implemented features like infinite scroll for reading articles, lazy loading below the fold content and support for rich content like video playback and image slideshow.
- **Canteen Management Application** : Built an end-user-facing android application to view daily menu and order food with payment gateway (Paytm) integration and Cash on Delivery options and to provide feedback to the management. Developed a web application for canteen vendors to manage their daily menus and accept or decline orders as per food availability.
- **CRM Application for Electrical Appliance Company** : Developed an android application for use by owner and sales representatives to coordinate new customer acquisition and streamline communication with clients using Google Firebase Cloud DB for sending notifications and messages. Implemented features to share customer leads across the team and set reminders for contacts using Google Contacts and Calendar APIs. Implemented administration feature to add/remove application device installations using Firebase Cloud.

PROGRAMMING SKILLS

- **Languages:** Java, Kotlin, HTML5, CSS3, JavaScript, Python, Json
- **Technologies:** Android SDK, AWS Cloud Formation, MySQL, Git
