PROFESSIONAL SUMMARY

Quality Engineer with 2+ years of experience in ISO-aligned manufacturing environments, supporting **product inspections, nonconformance investigations, and continuous improvement initiatives**. Proven ability to execute **quality inspections**, analyze process data, document deviations, and support **root cause analysis and CAPA implementation**. Strong cross-functional collaborator with a solid foundation in **electrical engineering, quality systems, and data-driven problem solving**.

SKILLS

Quality & Manufacturing: Product Inspection, In-Process and Final Inspection, Quality Standards Compliance, Nonconforming Material Identification & Disposition, Corrective and Preventive Action (CAPA), Root Cause Investigation, Continuous Improvement

Inspection & Testing: Measurement & Testing, Product Performance Evaluation, Inspection Procedures, Sampling Procedures (Foundational), Quality & Reliability Data Collection

Engineering & Technical: Electrical Engineering Fundamentals, Engineering Drawings Interpretation, Manufacturing Environment Exposure, Validation & Verification Support

Quality Systems & Documentation: SOP Development, QC Criteria, Controlled Documentation, Inspection Reports, Deviation Documentation, Quality Records Management

Continuous Improvement & Lean: Lean Manufacturing (Foundational), Kaizen Participation, 6S Audits, Process Audits, Quality Metrics Tracking

Analytical Tools: Microsoft Excel (Quality Data Analysis & Reporting), MATLAB, Simulink, Python (Basic)

Collaboration & Professional Skills: Cross-Functional Team Collaboration, Technical Communication, Attention to Detail, Problem Solving

Workplace & Safety: PPE Compliance, Safety-Critical Manufacturing Environments, Hands-On Inspection Work, Long-Duration Standing

WORK EXPERIENCE

Goldi Solar Pvt. Ltd.

Quality Engineer

Navsari, Gujarat, India

Jun 2021 – Jun 2023

- Executed incoming, in-process, and final product inspections to ensure compliance with **quality standards, engineering specifications, and SOPs** prior to product release.
- Investigated product and process nonconformances, documented deviations, and supported **root cause analysis and corrective/preventive action (CAPA) implementation**.
- Collaborated cross-functionally with production, inspection, and engineering teams during **internal audits** to evaluate process performance and data integrity.
- Developed and updated SOPs, inspection procedures, and quality documentation to improve process consistency, safety, and repeatability.
- Maintained controlled quality documentation, inspection records, and revision-controlled manuals in compliance with **quality system requirements**.
- Performed stage-wise material inspections, prepared inspection reports, and supported **disposition of nonconforming material** with senior Quality Engineers.

EDUCATIONS

Rowan University

Master of science in Electrical and Computer Engineering

Glassboro, NJ, USA

Jan 2024 – Dec 2025

Gujarat Technological University

Bachelor of Engineering in Electrical Engineering

Navsari, GJ, INDIA

Jul 2017 – May 2021

ACADEMIC PROJECT

Experimental Energy Harvesting System

- Designed and tested an experimental system, conducted performance testing, collected measurement data, and analyzed results to evaluate efficiency and reliability.

MATLAB-Based Analytical Modeling Project

- Developed MATLAB models to analyze system performance, validate assumptions, and generate data-driven engineering insights.

System Simulation & Validation (Python & Simulink)

- Simulated system behaviour executed test scenarios, and documented results to support validation and performance analysis.

CERTIFICATE

- **Certified Automation Professional** | Prologik Technologies – Industrial Automation Training
