PROFILE

- **Full Stack Software Engineer** with **4+ years** of experience building scalable web applications and enterprise solutions.
- Proficient in modern JavaScript frameworks (**React.js, Node.js, Vue.js**) and cloud platforms (**AWS, Azure, Docker**).
- Experienced in **microservices architecture, RESTful APIs, database optimization, and CI/CD pipelines**.
- Skilled in **Web3 and blockchain technologies**, including **smart contract development** and cryptocurrency integration.
- Strong coding expertise in **JavaScript, Python, and Java** with a focus on clean, maintainable, and efficient code.
- Proven ability to **mentor junior developers** and thrive in **agile**, collaborative environments.
- Adept at translating **business requirements into technical solutions** that improve performance and user experience.
- Track record of **delivering high-impact projects on time**, balancing innovation with reliability in production systems.

SKILLS

Programming Languages — Python, C, C#, JavaScript, Java, HTML5, CSS3, SQL, VB Script, APEX, Node.js

Frameworks/Libraries — ASP.NET , ASP.NET  MVC, Entity Framework, jQuery, AJAX, Bootstrap, Lightning WebComponents (LWC), React.js

Database Technologies — Microsoft SQL Server, MySQL, Oracle SQL, MongoDB, SSIS, SSRS, SQL Profiler, T-SQL, PostgreSQL

Version Control & DevOps — Team Foundation Server (TFS), GitHub, Jenkins, Kubernetes, Docker, CI/CD Pipelines, Automated Testing

Cloud Technologies — AWS (EC2, S3, Lambda, RDS, CloudWatch, EKS), Azure, Google Cloud Platform, Salesforce

Web3 & Blockchain — Ethereum, Solidity, Web3.js, Ethers.js, DeFi Protocols, Cryptocurrency Integration

PROFESSIONAL EXPERIENCE

DoJoGa, Software Engineer

06/2025 – Present | Austin, Texas

- Developed **full-stack Web3 applications** using **React.js, Next.js**, and **Ethereum blockchain** technologies for decentralized platforms.
- Built **scalable backend services** with **Node.js, Express.js**, and **MongoDB** supporting **5,000+ concurrent users**.
- Implemented **smart contracts in Solidity** and integrated **Web3.js** for seamless blockchain interactions.
- Created **responsive UI components** with **Material-UI** and **Tailwind CSS**, incorporating **real-time features via WebSockets**.
- Conducted **market research** and **competitive analysis** to inform technical architecture and business strategy.
- Delivered **production support** ensuring **99.9% uptime** and optimal application performance.
- Enhanced **system security** by implementing **role-based authentication** and **blockchain data encryption**.
- Collaborated with product managers and designers to launch new features that **increased user engagement by 20%**.

HCL Technologies, Software Engineer

05/2020 – 08/2023 | Bangalore, India

Client: Dollar General - Enterprise Retail Application Development

- Led **software testing**, monitored **critical paths**, and implemented **corrective actions** to ensure project stability.
- Collaborated with development and production teams to **analyze and resolve production issues** within **strict SLAs**.
- Coordinated **database deployments** across environments, **reducing rollback incidents**.
- Attended regular team meetings to share project updates, propose solutions, and resolve technical challenges.
- Developed **knowledge base** of common issues/resolutions, **improving team efficiency** and response time.
- Created **SSRS reports** and **dashboards** for business stakeholders, providing **real-time visibility** into sales, inventory, and operational metrics.
- Built comprehensive **data validation queries** in collab with QA teams, **improving defect detection rate by 25%**.
- Recommended **process improvements** to Dollar General, streamlining workflows and enhancing prod support.
- Designed and executed **system enhancements**, **reducing incidents** and improving overall system reliability.
- Built **scripts to automate** data migration and validation tasks, **cutting down execution time by 40%**.
- Partnered with cross-functional teams to implement **code-level optimizations**, **improving performance by 15%**.
- Utilized tools such as **ServiceNow** and **Putty** to manage incident lifecycles and monitor system logs effectively.

EDUCATION

University of Texas at Arlington, Masters in Computer Science

08/2023 – 05/2025
