

Nitin Reddy Soma

Memphis, TN, USA | +1(901) 765-9131 | nitinsoma9059@gmail.com | [LinkedIn](#) | [GitHub](#)

OBJECTIVE

Entry-level Java Developer with software engineering experience in building scalable applications using Java and Spring Boot. Improved backend performance by tuning APIs and optimizing workflows, reducing latency by 35%. Skilled in JWT authentication, SQL database management, and problem-solving, eager to expand expertise through hands-on development and continuous learning.

EDUCATION

University of Memphis, TN, USA

Master's degree, computer science

- **GPA:** 3.54

Bharat Institute of Engineering and Technology

Bachelor's degree, computer science

- **GPA:** 3.2

SKILLS

- **Languages:** Python, Java, JavaScript, PL/SQL, C++, C
- **Frontend:** React.js, Next.js, HTML5, CSS3, Material UI, Styled Components
- **Backend:** Spring Boot, GraphQL, REST APIs, JWT Authentication
- **Databases:** MySQL, PostgreSQL, MongoDB, Redis, NoSQL, PL/SQL
- **Cloud & Tools:** AWS (Lambda, SQS), Git, GitHub, MongoDB Atlas, Compass, Node-RED
- **ML & AI:** LSTM, RNN, SVM, TF-IDF, Sentiment Analysis, NLP, Prophet, ARIMA
- **Concepts:** Data Structures, Algorithms, Performance Optimization, Agile, A/B Testing, Object-Oriented Programming
- **Soft Skills:** Problem Solving, Communication, Team Collaboration, Accountability, Quick Learning, Ownership

PROFESSIONAL EXPERIENCE

Experion Technologies

Aug 2022 - Jul 2023

Software Engineer

- Migrated legacy frontend to React.js and Next.js, modularizing UI into personalized cards and scrollable feeds with Material UI and Styled Components.
- Engineered JWT-based authentication and Spring Security access control using Java, reducing unauthorized usage by 30%.
- Tuned Spring Boot APIs and GraphQL queries using object-oriented programming principles, improving backend performance and reducing latency by 35%.
- Built asynchronous workflows using AWS Lambda functions in Java and Amazon SQS, cutting response times for personalized AI features by 50%.
- Developed PL/SQL triggers and stored procedures to automate backend workflows and optimize SQL queries, reducing API-side load by 25%.
- Led Agile sprints, enhancing communication with designers and product teams to launch A/B-tested features focused on resale value and user behavior.

ACADEMIC PROJECT

E-Commerce Backend Modernization

- Redesigned and migrated a traditional e-commerce backend from MySQL to MongoDB, enabling flexible schema modeling and faster access to unstructured product data.
- Implemented full-text search, mood-based filtering, and dynamic pricing logic, enhancing personalization and UX. Achieved a 60% improvement in query speed and API throughput.

Medical Condition Prediction Using Drug Reviews

- Built predictive models to identify medical conditions such as diabetes and depression from patient-submitted reviews using advanced NLP pipelines and TF-IDF weighting.
- Applied deep learning (LSTM) and classical ML algorithms, achieving higher accuracy and stronger sequential pattern recognition with LSTM on temporal data.

Giant Breed Dog Platform

- Developed a community-driven platform for dog enthusiasts, featuring breed-specific filters, educational content, and an intelligent Q&A system with photo-matching capability.
- Integrated custom views and data filtering tools, improving user navigation and engagement.

Sentiment Analysis on Amazon Reviews

- Conducted sentiment classification using supervised learning models (Random Forest, SVM) on product review data, with 87% prediction accuracy.
- Visualized customer sentiment patterns using word clouds and trend plots to drive actionable product feedback insights.

Crime Clustering & Classification

- Merged crime incident records with U.S. census and TIGER shapefiles to identify crime-prone zones in Memphis through clustering and decision trees.
- Built an interactive heatmap dashboard, enabling visual analysis of felonies vs. misdemeanors and demographic influences.
