SUMMARY

Results-driven Java Developer with 6+ years of experience in designing, developing, deploying scalable, high-performance applications using Java 8/17/21, Spring Boot, and Microservices, Experience in UI design and development using HTML5, CSS3/4, JavaScript, and jQuery, ES5, ES6 and TypeScript. Strong experience in Spring Framework modules such as Spring Boot 3.x, Spring MVC, Spring WebFlux (Reactive) Spring Security, Spring Data, and Spring Cloud Spring Boot, Spring Microservices, Strong knowledge of RESTful APIs, GraphQL, and Web Sockets for backend development

TECHNICAL SKILLS

- **Languages:** Java 8/17/21, Python, SQL, PL/SQL
- **Frameworks:** Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate
- **Microservices:** Spring Cloud, REST APIs, WebFlux (Reactive Programming)
- **Databases:** MySQL, PostgreSQL, MongoDB, Redis
- **Cloud:** AWS (Lambda, EC2, S3, RDS), Azure Basics
- **Messaging:** Kafka, RabbitMQ
- **DevOps Tools:** Git, Maven, Jenkins, Docker, Kubernetes, SonarQube
- **Testing:** JUnit 5, Mockito, Postman, REST Assured
- **Others:** CI/CD Pipelines, Agile/Scrum, Design Patterns, GitHub Actions

PROFESSIONAL EXPERIENCE

UBS

New York, NY

Java Developer

March 2024 – Present

Technologies: Java 8/17/21, Spring Boot, Spring Security, Spring JPA, Hibernate, AWS, IAM, EBS, EC2, S3, SQL, PLSQL, Log4J 2, MSSQL, Maven, HTML5, CSS 3, Git, Eureka, Junit, JIRA, Postman, Jenkins, Docker, Kubernetes, OpenShift, Selenium Web Driver, JMeter, Selenium Grid, Junit Splunk, Kafka

- Worked within Agile/SCRUM teams to build responsive Single Page Applications using **HTML5, CSS3, JavaScript, TypeScript, Angular, React, jQuery**, and **Bootstrap**.
- Built scalable **REST APIs** and integrated them with **PostgreSQL** and **MongoDB** databases.
- Worked on **Java 17/21** features such as Lambda expressions for making anonymous inline function calls by using Functional Interfaces which makes **code readable** and concise.
- Designed, implemented and tested services in a **Micro service** -oriented architecture and has implemented the **REST** based **Micro services** using the **Spring Boot, Spring Data** with **JPA** (Java Persistence API).
- Developed server-side application to interact with database using Spring Boot and Hibernate ORM.
- Involved in using **AWS (Amazon Web Services)** services like **EC2, VPC, Cloud Watch, Cloud Front, Cloud Formation, IAM, S3, Amazon RDS, Elastic Cache, SNS, SQS**.
- Used **MySQL** database for **SQL, PL/SQL** scripts, stored procedures, functions, **triggers**.
- Enhanced application **security** using **Spring Security, OAuth2**, and **JWT** authentication.
- Applied **TDD** practices with **JUnit 5** and **Mockito** to build robust unit and integration test suites supporting high-quality, maintainable code.
- Used **docker** compose to containerize the application and **Kubernetes** to deploy the application on multiple **Pods**.
- Implemented messaging solutions using **JMS** and **ActiveMQ**, showcasing strong expertise in message queues and asynchronous processing.
- Used **Maven** automated **build** scripts to **compile** and package the application and implemented **Log4j** for the project.
- Utilized **Git** and **Git Bash** to handle source control, branching strategies, and team-based code collaboration

Java Developer

January 2022 – November 2023

Technologies: React, Redux, JDK 1.8/11, Spring Boot, Spring Security, Spring JPA, Hibernate, AWS, IAM, EBS, EC2, S3, SQL, Log4J 2, Tableau, Azure data Studio, Teradata, MSSQL, Maven, HTML 5, CSS 3, Git, Eureka Junit, JIRA, Postman, Jenkins, SonarQube, Selenium Web Driver, JMeter, Junit Splunk, Kafka.

- Assisted in developing backend modules using **Core Java, Spring Boot, Hibernate, and MySQL**.
- Designed and developed **Microservices architectures** and components in the applications.
- Worked in **Agile** environments participating in story grooming, estimations, retrospectives, and sprint planning.
- Designed and developed Single Page Applications using **React, Node.js, CSS, Material UI, Bootstrap, and HTML5**.
- Worked on unit testing of JavaScript applications using **Karma** and **Jasmine**.
- Developed front-end screens using **React.js**, leveraging reusable components from **NPM** and **Redux** libraries.
- Used **Microservice architecture** with **Spring Boot** services interacting through **REST APIs**.
- Built applications in **Microservice-Oriented Architecture (MSOA)** and developed **Single Page Applications (SPA)**.
- Deployed and monitored **Spark applications** on **AWS EMR, Google Dataproc, and Azure HDInsight**, using IaC tools like **Terraform** or **CloudFormation**.
- Developed and deployed applications using build tools such as **Jenkins, Gradle, Splunk, and Node.js**.
- Used **JUnit** for writing unit test cases and **Postman** for testing REST-based services.
- Worked with **MongoDB** to store and retrieve non-relational data from collections.
- Worked with **Jenkins, GitHub, Artifactory**, and other internal **CI/CD** systems for enterprise-level Java-based cloud orchestration tools.

Olympia Software Technology

Hyderabad, INDIA

Software Engineer

July 2019 – December 2021

Technologies: Java, spring, Angular JS, Hibernate, HTML5, CSS3, JMS, EJB, Log4j, JUnit, ANT, SOAP, SQL, MySQL, and Windows.

- Involved in all phases of the **Software Development Life Cycle (SDLC)** using **Agile Methodology**.
- Developed **Spring MVC** REST controllers and services for backend interactions.
- Used the **Spring Framework** for application logic and business service integration.
- Developed web services using **SOAP, WSDL, JAX-WS, and Apache CXF**.
- Worked with **NoSQL databases** to store and manage JSON-like dynamic data.
- Followed **TDD (Test-Driven Development)** and created unit tests using **JUnit** for all developed modules.
- Built front-end components using **HTML, CSS, JavaScript** to interact with **Python** backends.
- Developed UI screens using **AngularJS, JSP, JavaScript, HTML5, and jQuery**.
- Collaborated with the **ETL/Informatica** team to define data models, UI requirements, and reporting structures supporting **Cognos** reports.
- Worked in **cloud environments**, consuming **RESTful API** services.
- Used **JavaMail** and **JMS (Java Messaging Service)** APIs for sending notifications.
- Implemented **SOA Architecture** with web services using **SOAP, WSDL, UDDI, XML**, and the **CXF framework**.

EDUCATION

Master of Science in Information Technology
Lindsey Wilson College

Aug 2025

Bachelor of Science in Computer Science
TKR College of Engineering & Technology

Sep 2020
