WORK EXPERIENCE

Ally Finance, USA | Business Analyst

April 2023 - Current

- Conducted user interviews, both in-house and external, to gather and analyze requirements using Agile Scrum.
- Collaborated with project management to collect, analyze, and document functional/business requirements.
- Initiated utilization of SharePoint server to document requirements for customer-specific invoicing and for other documents such as test results.
- Used SQL queries to extract and manipulate ERP data, cutting data analysis time by 40% and enhancing decision-making insights.
- Conducted Gap Analysis of current (As-Is) and target (Should-Be) processes to identify and address gaps in business operations.
- Managed both functional and non-functional requirements within Jira, effectively incorporating new requests while ensuring project clarity.
- Developed RTM using MS Excel to ensure that the software application is designed per business requirements.
- Analyzed data to identify business issues and financial impacts, and provided recommendations to help business units improve their processes.
- Designed and maintained interactive Tableau dashboards, empowering stakeholders with real-time insights into key performance indicators.
- Facilitated and participated in Joint Application Development (JAD) sessions with stakeholders to gather Business, Functional and Non-Functional Requirements.
- Conducted successful UAT testing, actively collaborating with business users to secure approvals and ensure system acceptance.

Veritas Software, India | Business Analyst

Sep 2019 - Feb 2022

- Leveraged Waterfall and SDLC methodologies to manage project execution, incorporating Storyboards for effective requirements gathering.
- Authored comprehensive BRDs and FRDs, ensuring project clarity and providing a robust foundation for development.
- Performed impact analysis and document analysis to identify business rules for new solutions, optimizing operational efficiency.
- Maintained key project documentation (requirements, design documents, presentations) to support communication and stakeholder alignment.
- Analyzed business operations and revenue cycle, offering recommendations that secured project approval.
- Specialized in Business Requirements Elicitation, Process Modeling, Risk analysis, SWOT analysis, and drafting Functional Specifications.
- Effectively managed stakeholder expectations to ensure project alignment, leading to a 20% reduction in scope creep.
- Led UAT script development and testing sessions for system deployments of varying sizes, improving deployment success rates by 35%.
- Build the strategic dashboard using Power BI to build the forecasting target and the sales strategy to achieve the goals.
- Refined and input business requirements in the HP Quality Center for traceability to test requirements.
- Coordinated the development and execution of business acceptance test cases for adding new banks to the incoming money processes.
- Involved and interacted with various business user groups for gathering requirements for CRM implementation.
- Successfully managed business analysis tasks for multiple projects, contributing to a 20% increase in on-time project delivery.
- Performed in-depth business analysis in operations and revenue cycle management, identifying areas for improvement and securing project approval to enact positive change.
