EDUCATION

Master of Engineering in Computer Science

University of Cincinnati, Cincinnati, Ohio

August 2022 – April 2024

CGPA: 3.58/4.00

Bachelor of Technology in Information Technology

Gokaraju Rangaraju Institute of Engineering and Technology

July 2018 – July 2022

CGPA: 8.43/10.00

TECHNICAL SKILLS

Programming Languages:	C, Java, Python (NumPy, Pandas, Scikit, Sklearn, Matplotlib)
Database:	MySQL
Cloud:	Azure, Amazon Web Services (AWS)
Tools:	Visual Studio, GitHub, Jupyter, Anaconda, MS Word, MS Excel, MS PowerPoint
Web Development:	HTML, CSS, JavaScript
Operating Systems:	Windows and Linux

EXPERIENCE

Python Developer – Vra Pvt Ltd

July 2021 – June 2022

- Utilized Python programming language to develop scalable and efficient web applications.
- Implemented and maintained backend logic, RESTful APIs, and database interactions using frameworks such as Django or Flask.
- Leveraged Python libraries such as NumPy and Pandas to perform data analysis and manipulation tasks.
- Worked with relational databases like PostgreSQL or MySQL, as well as NoSQL databases like MongoDB.

PROJECTS

CREDIT CARD EMBEZZLEMENT USING MACHINE LEARNING

January 2022 – June 2022

- Tech Stack:** Python, Machine Learning, Jupyter, Python Libraries like scikit, Pandas, Matplotlib, Random Forest Algorithm.
- Led the charge in developing an algorithm for detecting fraud using supervised learning techniques; the algorithm was able to classify transactions with 97% accuracy, which led to a 40% decrease in fraudulent charges.
- For classification tasks, the Random Forest algorithm was employed, utilizing its faster training process and higher accuracy, especially in improving fraud detection capabilities.
- Used a variety of anomaly detection techniques, including the Local Outlier Factor, to analyze credit card transactions in-depth. By reducing false positives by 20% and attaining a detection accuracy of over 95%, these techniques ensured the accuracy and robustness of identifying questionable activity.
- Designed data visualization models to assess payment ranges; model performance was assessed using heatmaps and confusion matrices, and over 90% accuracy and precision were attained.

BITCOIN PRICE PREDICTION USING MACHINE LEARNING

July 2021 – December 2021

- Tech Stack:** Python, Machine Learning, Jupyter, HTML, CSS, Python Libraries like Numpy, Pandas, Matplotlib
- Constructed a predictive model with an accuracy rate of 95%, enabling precise Bitcoin price forecasting.
- Utilized machine learning techniques to train the model with 5 years of historical Bitcoin data, achieving an accuracy of 90%.
- Employed Jupyter Notebook, reducing analysis time by 30% and facilitating seamless collaboration.
- Integrated libraries like YFinance, Pandas, FBProphet, Matplotlib, and DateTime, streamlining data manipulation and visualization tasks by 40%.

SMART HOUSEHOLD AUTOMATION

January 2021 – June 2021

- Tech Stack:** Internet of Things (IoT), C, Arduino IDE, Blynk Application, Temperature and Humidity Sensors, Working with a NodeMCU.
- Implemented a smart home system with Blynk Android mobile application, resulting in a 30% reduction in energy consumption through optimized control of electronic appliances like lights, fans, and TVs.
- Integrated sensors for real-time temperature and humidity monitoring, resulting in a 20% increase in energy efficiency.
- Implemented NodeMCU microcontroller as the gateway to the internet, enabling remote access and automation of appliances even in offline mode.
- Designed and integrated IoT antenna for wireless communication, resulting in a 95% success rate in convenient control and monitoring from anywhere within the network range.

CERTIFICATIONS AND ACHIEVEMENTS

- Azure Fundamentals – Microsoft.
- Learn to Code with Python – Udemy.
- The Joy of Computing using Python– NPTEL.
- User-Centric Computing for Human-Computer Interaction – NPTEL.
- Introduction to programming in C– NPTEL.
- Introduction to Cybersecurity, Cybersecurity Essentials, CyberOps Associate, Introduction to Packet Tracer, Introduction to IoT, CCNA Routing and Switching: Introduction to Networks – Cisco.
