

Ram Sai Teja Thatavarthi

BUSINESS ANALYST

Texas, USA | (270) 277-5634 | teja.thatavarthi1999@gmail.com | [LinkedIn](#)

SUMMARY

Business Analyst with 4+ years of experience in system implementation, process improvement, and data analysis within healthcare and insurance sectors. Skilled in gathering requirements, conducting gap analyses, and creating interactive dashboards using Power BI. Proven track record in driving operational efficiency, ensuring regulatory compliance, and enhancing system integration and functionality through cross-functional collaboration and effective SDLC management.

SKILLS

Methodology:	SDLC, Agile, Waterfall,
Programming Languages:	Python, C, R, SQL
Database Management :	MS XS, MS Excel, MS SQL Server
Documentations:	FRD, BRD, SRS, User Guide, User Stories, Use cases
Project Management Tools:	MS Project, MS Excel, MS SharePoint, Asana
Visualization Tools:	Tableau, Draw.io, MS Visio
Business Analysis:	Cost/benefit Analysis, Impact Analysis, GAP Analysis, Risk Analysis,
Tracking Tools:	Jira, HP Quality Center, Rational ClearQuest, RTM
Cloud Computing Platforms:	AWS (EC2, CloudFormation, CLI, Lambda Function, S3, IAM)
ERP Planning & CRM:	SAP, MS Dynamics Nav, Salesforce, HubSpot
Technical Skills:	KPI, UAT, Test Plans, Alteryx, Requirement gathering, Google Analytics, Data Analysis, JAD, Software development & testing, Data Modelling, Database Knowledge, Business Intelligence (BI) Tools, Process Mapping, User Experience (UX) Understanding, Prototyping, SAS Enterprise Miner, SQL Server Management Studio, SKLearn, ImbLearn, Feature Engine, Flask

EDUCATION

Master of Science in Data Science - University of Houston – Clear Lake, Houston, Texas, USA

Bachelor of Science in Computer Science & Engineering - Sathyabama University, Chennai, India

WORK EXPERIENCE

Business Analyst | Aetna, TX

Aug 2022 – Present

- Managed the implementation of a new Policy Administration System (PAS), optimizing the creation, modification, and maintenance of insurance policies, improving efficiency and system performance across operations.
- Ensured the new PAS complied with HIPAA and ICD standards, adhering to all regulatory requirements for health insurance processing, guaranteeing secure and compliant data handling throughout the system.
- Organized Joint Application Development (JAD) sessions to refine system requirements, aligning functionalities with stakeholder needs, leading to a 20% improvement in stakeholder satisfaction and engagement.
- Gathered and documented business and functional requirements (BRD, FRD) for the PAS, establishing accurate policy lifecycle management processes and creating detailed System Requirements Specifications (SRS) for development.
- Conducted gap, impact, and SWOT analyses to identify inefficiencies and recommended improvements, resulting in a 25% boost in operational efficiency and process optimization across departments.
- Collaborated with cross-functional teams to integrate data validation processes, enhancing policy data accuracy by 30%, and ensuring seamless integration between PAS, claims, and CRM systems.
- Developed UML diagrams, business process models in MS Visio, and real-time Power BI dashboards, reducing report generation time by 40%, and providing actionable insights into policy performance.

Business Analyst | Accenture, India

Jul 2019 – Jul 2021

- Directed the full implementation of a new Electronic Health Record (EHR) system for a mid-sized healthcare facility, significantly enhancing patient care quality, operational efficiency, and streamlining administrative and clinical processes.
- Managed requirements documentation throughout the Software Development Life Cycle (SDLC), ensuring complete traceability and applying the Waterfall methodology to align the system with stakeholder needs and expectations, ensuring project success.
- Utilized SQL for data extraction, analysis, and creating complex queries to ensure data integrity during the EHR migration process, while also supporting reporting efforts for operational and clinical performance monitoring.
- Developed detailed user stories and use cases in close collaboration with stakeholders, defining system functionality, user interactions, and business processes to guide development teams and ensure the EHR system met all requirements.
- Designed interactive Power BI dashboards to effectively visualize key performance indicators (KPIs), providing insights into project progress, team performance, and identifying potential risks to drive informed decision-making and project success.
- Conducted comprehensive cost/benefit analyses, integrated MS Dynamics NAV for financial management, supported AWS cloud deployment, and facilitated User Acceptance Testing (UAT) to ensure full system functionality and alignment with project goals.
- Coordinated end-user training sessions, provided ongoing support post-implementation, and ensured smooth adoption of the new EHR system by addressing user concerns and improving overall system efficiency and satisfaction.
