PROFESSIONAL EXPERIENCE

Medical outreach ministries

Healthcare Administrative intern

Sep 2025 - Nov 2025

Montgomery, AL

- Entered and maintained patient medical records in the electronic database with high accuracy and confidentiality.
- Scheduled patient appointments and coordinated follow-up visits using the scheduling software, decreasing missed appointments and improving patient flow
- Supported front desk operations by checking in patients, verifying insurance details, and responding to inquiries using the clinic's management software, which kept wait times short and maintained smooth daily flow
- Helped organize medical files, update logs, and streamline data entry processes to improve clinic efficiency.

Auburn University at Montgomery

Graduate Research Assistant

Jan 2025 - Dec 2025

Montgomery, AL

- Conducted research on healthcare operations, CMS and Medicaid policies, and population health trends using literature reviews and data extraction in Excel, which informed departmental policy recommendations
- Performed financial, statistical, and coding data analysis using SPSS, Excel, SQL, and Python, uncovering key patterns that informed the research team's recommendations
- Developed Power BI dashboards to visualize healthcare trends and support decision-making.
- Supported grant writing, proposal development, white papers, and project deliverables, contributing to the successful submission of two grant proposals
- Collaborated with interdisciplinary teams including faculty, public health professionals, and administrators, facilitating coordinated research efforts that advanced the project timeline
- Developed work plans and tracked project progress using Trello and Asana, keeping the project on schedule and improving team coordination

Balaji Medicals

Retail Pharmacy Assistant

Feb 2022 - Aug 2023

India

- Processed prescription transactions using the pharmacy POS system, managed medication inventory with Excel tracking, and maintained billing records, reducing errors and ensuring timely reimbursements
- Interacted with patients and ensured accuracy in billing and recordkeeping.
- Tracked payment issues in the pharmacy POS system and escalated discrepancies to the manager, leading to quicker resolution and fewer delayed reimbursements

Hindu College of Pharmacy

Academic Research & Lab Experience

2020 - 2022

India

- Conducted pharmaceutical microbiology, analysis, and pharmacology experiments using spectrophotometry, agar plating, and chromatography, and generated data that identified key microbial trends for the research project
- Completed training in aseptic techniques, microbial culturing, spectrophotometry, and chromatography, enabling accurate sample preparation for experiments
- Participated in mock regulatory submissions and prepared Common Technical Document (CTD) sections, helping the team meet simulated compliance deadlines

PROJECTS & COURSEWORK

Strategic Outreach and Marketing in Healthcare

- Developed a marketing plan to improve community healthcare access and ROI.
- Conducted competitive analysis and designed targeted communication campaigns.

Population Health Analysis in Alabama

- Researched healthcare disparities and the effectiveness of Medicaid expansion.
- Proposed telehealth-based interventions to improve access in underserved regions.

Substance Use Trends During COVID-19
