Dearborn, MI, USA 48126 | +1 313-818-7769 | thrinu1999@gmail.com

SUMMARY

Dedicated AI Engineer with 3+ years in IT, specializing in AI-powered chatbots and virtual assistants. Expertise in Generative AI, LLMs, NLP, and cloud technologies like Dialogflow CX and Vertex AI. Skilled in prompt engineering, RAG, AI optimization, and performance analysis. Passionate about leveraging AI to drive innovation, streamline processes, and enhance decision-making.

EDUCATION

University of Michigan

Dearborn, MI

Masters in Data Science

PROFESSIONAL EXPERIENCE

Symplore. Inc

MI, USA

AI Engineer

Jun 2024 - Present

- Developed and optimized AI-powered virtual assistants using Dialogflow CX, implementing structured conversational flows and Playbooks for enhanced interactions.
- Fine-tuned GPT-3, GPT-4, and BERT for content generation, summarization, and chatbot development, improving response accuracy.
- Integrated Retrieval-Augmented Generation (RAG) techniques with Pinecone and FAISS to enhance chatbot contextual understanding and retrieval accuracy.
- Deployed and managed AI models using Google Cloud Vertex AI, implementing fine-tuning and model optimization strategies for improved performance.
- Designed and implemented prompt engineering strategies to refine AI-generated responses, increasing relevance and user satisfaction.
- Monitored AI performance using BigQuery and Looker Studio, identifying key areas for improvement and refining response quality.

Konigtronics Private Limited

Bangalore, India

Data Analyst

May 2020 - Jun 2022

- Analyzed large datasets from multiple sources, delivering actionable insights that boosted operational efficiency by 15% and increased customer satisfaction scores by 12%.
- Designed and automated data pipelines using Python, SQL, ETL tools, reducing data processing time by 30% and developed interactive dashboards and reports using Tableau, enabling stakeholders to monitor KPIs and make data-driven decisions in real time.
- Collaborated with cross-functional teams to identify trends and anomalies, contributing to a 10% reduction in customer churn through targeted marketing strategies.
- Conducted A/B testing for product launches, analyzing user behavior and increasing user engagement by 25%.

Mylon Ltd.

Bangalore, India

Data Analyst Intern

Aug 2019 - Feb 2020

- Conducted extensive data mining and analysis across multiple databases to optimize investment strategies and product offerings in wealth management.
- Tailored analytics solutions to meet specific needs in wealth management, enhancing product development and investment performance.

TECHNICAL SKILLS

Programming Languages: Python, C, SQL, R.
Generative AI: GPT-3, GPT-4, OpenAI APIs, LLMs, LangChain, RAG, Hugging Face Transformers, Pinecone, FAISS, Dialogflow CX, Vertex AI.
Natural Language Processing: TensorFlow, PyTorch, BERT, Docker, Kubernetes.
Databases: MySQL, MS SQL Server, ETL.
Cloud Technologies: AWS, Google Cloud, Azure.
Data Visualization Tools: Microsoft Excel, Tableau, Power BI.

PROJECTS

Conversational AI Chatbot for Healthcare

- Developed and deployed a GPT-4-powered chatbot capable of handling over 10,000 patient interactions daily with 95% query resolution accuracy.
- Integrated LangChain and Retrieval-Augmented Generation (RAG) with Pinecone to provide factually accurate responses from healthcare databases.
- Deployed the chatbot on Google Cloud Vertex AI, achieving a 99.9% uptime rate and ensuring secure data processing compliant with healthcare standards (HIPAA).

Data-Driven Insights for E-Commerce Optimization

- Analyzed large datasets from multiple sources, driving a 15% improvement in operational efficiency and a 12% boost in customer satisfaction. Created real-time Tableau and Power BI dashboards, enabling stakeholders to make data-driven decisions.
- Developed models using Pandas, NumPy, and Scikit-learn, improving sales forecasting accuracy by 20%.
