SUMMARY

Results-driven Product Owner and Data Analyst adept at stakeholder management, gathering and translating complex requirements, and ensuring communication to drive impactful solutions in Agile environments. Skilled in JIRA, SQL, Python, Tableau, and AWS services, leveraging data insights to deliver user-centric products that align with organizational goals.

TECHNICAL SKILLS

- **Programming Languages & Databases:** SQL, Python, R, MySQL, Oracle SQL, PostgreSQL, MongoDB
- **Data Analysis & Visualization Tools:** MS Excel, Tableau, Power BI, ArcGIS Online
- **Management Tools:** JIRA, YouTrack, GitHub
- **Cloud Platforms:** AWS (EC2, RDS, S3, Lambda, IAM, Glue, Athena, Redshift)
- **Certification:** AWS Certified Cloud Practitioner

EXPERIENCE

GenPX Inc. | *Data Analyst Intern*

10/2024 – Present

- Collaborated with stakeholders to define reporting needs, used JIRA to manage tasks, and built Tableau dashboards on hiring trends and candidate engagement, improving metric accessibility and boosting client engagement by 25%.
- Transformed candidate and client data using Excel & Python to improve data accuracy and retrieval for better talent matching, leading to a 40% increase in relevant candidate-job placements.
- Analyzed recruitment data using Excel and SQL to track time-to-fill roles and recruiter efficiency, ensuring compliance with data privacy policies while providing data-driven recommendations to improve the hiring process.

Accure Inc. | *Product Owner*

01/2024 – 05/2024

- Led the Agile development of an LLM pipeline, achieving a 70% reduction in data analysis time and enabling cross-domain non-technical users to interpret complex data effectively.
- Served as both Product Owner and Data Scientist, managing the product backlog, prioritizing features, and defining user stories using YouTrack.
- Gathered requirements from stakeholders, translated them into technical specifications, and delivered tailored solutions, while providing weekly progress updates.
- Executed SQL queries to extract information from the datasets and created Python-based visualizations to refine and validate LLM-generated outputs.
- Defined and executed UAT test cases to validate Streamlit app's functionality and ensure alignment with business needs.

Infosys Limited | *Systems Analyst*

02/2021 – 07/2022

- Served as the primary liaison between development teams and stakeholders in an Agile project for a top U.S. bank's wealth management system, gathering requirements, and using JIRA to track stories, tasks, and defects.
- Performed extensive data quality checks using Excel, achieving a 15% improvement in data integrity, ensuring accuracy for decision-making and reporting purposes.
- Led UAT testing, ensuring system changes met business needs and were seamlessly integrated into production.
- Implemented SQL-based processes to validate and improve data accuracy for dashboards, streamlining performance tracking and reporting.
- Developed and presented dashboards in Tableau to effectively communicate key metrics and insights to stakeholders during sprint meetings.

Infosys Limited | *Systems Analyst Intern*

10/2020 – 01/2021

- Automated workflows with Selenium to resolve data inconsistencies, reducing defects by 30% and enhancing accuracy and user experience for a retail banking website.
- Created data summaries and SQL-based reports, supporting project leads with insights and improved reporting accuracy.

EDUCATION

Master of Science in Data Analytics Engineering

George Mason University | GPA: 3.87

Bachelor of Technology in Computer Science and Engineering

SRM Institute of Science and Technology

PROJECTS

YouTube Analytics | AWS S3, Glue, Athena, Lambda, QuickSight

[Project Link](#)

- Engineered a data pipeline leveraging AWS services for securely managing, streamlining, and analyzing YouTube video data, focusing on video categories and trending metrics.

Sports Retail Sales Analysis | MySQL

[Project Link](#)

- Conducted MySQL-based analysis of sports retail data, revealing insights into high-profit brands and customer preferences to drive sales growth and optimize performance.
