

Pawan Panthi

Data Analyst

Irving, TX | 972-325-6166 | panthipawan221@gmail.com

Visa: USC

SUMMARY

- Possess over **4+** years of robust experience in data analysis, specializing in data mining across vast structured and unstructured datasets, ensuring meticulous data validation, advanced data visualization, and proficient web scraping techniques.
- Well-versed in utilizing Integrated Development Environments (IDEs) including Visual Studio Code and PyCharm for efficient coding and debugging.
- Expert in executing complex Data Extraction, Transformation, and Loading (ETL) processes utilizing industry-standard tools such as SSIS, SSAS, and Informatica.
- Proficient in leveraging powerful visualization tools including Tableau, PowerBI, and Microsoft Excel to transform data into actionable insights.
- Demonstrated ability to ensure data integrity through effective cleaning, pre processing, and validation techniques.
- Strong understanding and practical experience with databases like MySQL and SQL Server, ensuring secure and efficient data handling.
- Working knowledge of all project lifecycle phases, from data acquisition, cleansing, and pre-processing, through feature engineering, exploratory data analysis, model development, testing, validation, to insightful data visualization.

SKILLS

Methodologies: Agile, Waterfall

Language: Python, R, SQL, SAS

IDEs: Visual Studio Code, PyCharm, Jupyter notebook

Packages: NumPy, Pandas, Matplotlib, SciPy, Plotly, SQLAlchemy, BeautifulSoup, Spark, ggplot2

Visualization Tools: Tableau, PowerBI, Microsoft Excel

ETL Tools: Data stage, SSAS, SSIS

Database: MySQL, SQL Server, Mongo DB

Cloud Technology: Azure, AWS

Other Skills: Data Cleaning, Data Wrangling, Critical Thinking, Communication Skills, Presentation Skills, Problem-Solving

Operating System: Windows, Linux, MacOS

EXPERIENCE

Unum, TX | June 2022– Present

Data Analyst

- Efficiently applied Agile and Waterfall methodologies to manage and streamline complex data analysis projects, ensuring timely delivery and adherence to best practices.
- Demonstrating expertise in Python, R, SQL, and SAS for data manipulation, statistical analysis, and algorithm development, contributing to data-driven decision-making processes.
- Proficiently utilized IDEs such as Visual Studio Code, PyCharm, and Jupyter Notebook for writing, testing, and debugging code, enhancing project efficiency and code quality.
- Mastered a suite of packages including NumPy, Pandas, Matplotlib, SciPy, Plotly, SQL Alchemy, Beautiful Soup, Spark, and ggplot2 for sophisticated data analysis, visualization, and interpretation.
- Skilled in creating compelling data visualizations and dashboards using Tableau to communicate findings to technical and non -technical stakeholders.
- Managing and maintaining databases including MySQL, SQL Server, and Mongo DB, ensuring data accuracy, security, and optimal Performance.
- Leveraging cloud platforms such as Azure and AWS for scalable, secure, and efficient data storage and computing, optimizing the data infrastructure.

Cigna, TX | Jan 2020 – May 2022

Data Analyst

- Implemented Waterfall methodology for structured software development lifecycle management.
- Developed Python programs using NumPy for efficient array manipulation.
- Utilized data science packages (Pandas, NumPy, matplotlib, SciPy) for advanced Python data analysis.
- Maintained and optimized PowerBI reports, ensuring accurate and impactful data presentation.
- Skilled in leveraging tools like Tableau, PowerBI, and Microsoft Excel to transform complex datasets into intuitive and impactful visual reports, driving insightful business decisions.
- Crafted SQL tables and complex queries with SQL Server Management Studio for robust data management.
- Ensured clear communication with management for precise requirement gathering.
- Conducted data wrangling and cleansing using SQL and Python, maintaining data integrity and quality.

EDUCATION

Bachelors in physics | Tribhuvan University- Katmandu, Nepal
