

SRI CHARAN PRASAD DUBEY

Harrison, NJ | +1 (862) 410-5685 | sricharandubey@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Results-driven Data Analyst with hands-on experience in Python, SQL, Power BI, and Tableau, transforming complex datasets into actionable insights. Skilled in data cleaning, transformation, ETL, predictive modeling, and dashboard development, with expertise in cloud platforms (AWS, BigQuery, Snowflake) and automated reporting pipelines to optimize KPIs. Experienced in building interactive dashboards and analytics solutions that improve operational efficiency and stakeholder decision-making, with strong problem-solving, critical thinking, and communication skills.

TECHNICAL SKILLS

Data Analytics & Programming: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Statsmodels), R, SQL (MySQL, PostgreSQL, SQL Server), Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA), Statistical Analysis, Predictive Modeling, Machine Learning, Feature Engineering

Business Intelligence & Data Visualization: Power BI (DAX, Power Query, Power Automate, Paginated Reports), Tableau, Looker Studio, Excel (Pivot Tables, Power Query, Power Pivot), Dashboard Development, KPI Metrics, Reporting Automation, Data Storytelling

Data Platforms & Cloud: AWS (S3, EC2, Lambda, Redshift), Google BigQuery, Snowflake, ETL & Data Integration, Data Warehousing, Data Modeling, SQL Optimization, Data Pipeline Development

Tools & Collaboration: Jupyter Notebook, Git, GitHub, VS Code, Microsoft Teams, Google Workspace, Documentation & Knowledge Management

Professional & Analytical Skills: Problem Solving, Critical Thinking, Decision Support, Ambiguity Handling, Independent Learning, Cross-Functional Collaboration, Communication, Process Documentation

PROFESSIONAL EXPERIENCE

Data Analyst Intern

Jun 2022 - May 2023

Accolite Digital | India

- Leveraged Python (Pandas, NumPy) and SQL to extract, clean, and analyze datasets from multiple sources, delivering insights that improved reporting accuracy by 25% and streamlined operational decisions.
- Created interactive Power BI dashboards to visualize KPIs and performance trends, enabling leadership to quickly identify bottlenecks and optimize resource allocation, boosting efficiency by 30%.
- Applied exploratory data analysis and statistical techniques to uncover behavioral patterns in user data, producing predictive insights that guided strategic marketing and operational initiatives.
- Developed automated data pipelines with Python and SQL, reducing manual report preparation by 35% while ensuring real-time availability of actionable insights for cross-functional teams.
- Partnered with business and technical stakeholders to translate analytical requirements into visualizations and models, enhancing stakeholder adoption and accelerating data-driven decisions.
- Implemented comprehensive data validation and quality checks, maintaining dataset integrity and supporting accurate forecasting for customer engagement and operational KPIs, increasing model reliability by 20%.

PROJECTS

Prediction of Missing Values Using CART

- Implemented CART and regression-based imputation on multi-source datasets, improving data reliability by ~90% and ensuring consistency for downstream analytics.
- Performed data preprocessing, cleaning, and transformation using Python libraries, enhancing model performance and reducing inconsistencies by 50%.
- Automated pipelines for detecting and imputing missing entries, enabling stakeholders to leverage reliable insights for data-driven decision-making.

Interactive Sales & Operations Dashboard

- Developed an end-to-end Power BI dashboard integrating SQL Server data, automating refreshes, and improving operational visibility for executive teams.
- Applied DAX and Power Query to calculate complex metrics like YoY growth, demand forecasts, and conversion rates, enhancing predictive analysis.
- Created drill-down visualizations and interactive charts to monitor KPIs, sales gaps, and regional performance, supporting strategic resource allocation.

Customer Churn Prediction Model

- Built logistic regression and random forest models on cleaned and ETL-processed SQL data, achieving ~87% prediction accuracy for churn identification.
- Conducted feature engineering, correlation analysis, and EDA using Python, reducing false positives by 15% and improving model robustness.
- Developed reusable Python pipelines for ongoing customer analytics, enabling faster deployment of predictive insights across teams.

EDUCATION

Masters in Data Science

Sep 2023 - Dec 2024

New Jersey Institute of Technology | Newark, NJ, USA

Bachelor of Technology in Information Technology

Dec 2020 - Mar 2023

NRI Institute of Technology | Vijayawada, AP, India
