

# Nishanth Thouta

Dallas, Texas, USA | +1 940-765-7000 | [nishanththouta16@gmail.com](mailto:nishanththouta16@gmail.com) | [Linkedin](#)

## PROFESSIONAL SUMMARY

Systems-focused Data Analyst with 3+ years of experience supporting financial reporting, ERP system interfaces, and automated data workflows. Experienced in month-end close support, journal entry validation, payroll system interfacing, and financial data reconciliation. Strong background in SQL, ERP-integrated systems, and advanced Excel reporting, with the ability to collaborate cross-functionally to ensure financial data accuracy, compliance, and timely reporting. Master's in Data Engineering with expertise in financial systems automation and process optimization.

## TECHNICAL SKILLS

- **Programming & Scripting:** SQL, Advanced Excel/VBA, JavaScript, HTML/CSS, Python (Pandas, NumPy), R.
- **Data Visualization & BI Tools:** Power BI (DAX, Power Query), Tableau (LOD Expressions, Storyboards), Excel Dashboards, Matplotlib, Seaborn, Plotly, Streamlit, Reporting Usability, Performance Optimization.
- **Databases & Data Warehousing:** Advance SQL, Snowflake, Amazon Redshift, Azure, PostgreSQL, MS SQL Server, MySQL, Oracle
- **Big Data & Data Processing:** Apache Spark, Hadoop, Hive, Kafka, HDFS, MapReduce
- **Cloud Platforms & Integration:** AWS (EC2, S3, Redshift, Lambda), GCP (BigQuery), Snowflake, Hadoop, Hive, Spark, Scalability.
- **ETL & Data Engineering:** ETL Pipelines, Data Pipelines, Apache Airflow, Presto, SQL/NoSQL Databases, Azure (ADF, Azure DataBricks)
- **ETL & Workflow Orchestration:** Apache Airflow, Informatica, Talend, AWS Glue, SSIS, Ab initio
- **Machine Learning & Statistical Modeling:** Scikit-learn, XGBoost, Statsmodels, TensorFlow, NLP, Time Series Forecasting
- **DevOps & Version Control:** Git, GitHub, Bitbucket, Jenkins, CI/CD Pipelines
- **Documentation & Collaboration Tools:** Confluence, ServiceNow, Notion, Microsoft OneNote, SharePoint
- **Analytical Skills:** Data Mining, Data Cleansing, Statistical Analysis, Data Wrangling, Data Warehousing, Text Mining, A/B Testing, Critical Thinking, Problem Solving, Communication.
- **Professional Skills:** Cross-Functional Collaboration, Business Communication, Analytical Thinking, Optimization and Problem-solving

## CERTIFICATIONS

- **Google Data Analytics:** Performed real-time data analysis workflows including data cleaning, SQL querying, and exploratory analysis on business-style datasets to identify trends, anomalies, and performance insights. Built production-style dashboards and reports to communicate actionable findings to stakeholders, emphasizing data accuracy, documentation, and decision-ready insights.
- **IBM Data Science Professional Certificate:** Applied Python-based data analysis and machine learning workflows (Pandas, NumPy, scikit-learn) to clean, analyze, and model real-world datasets. Built and evaluated **end-to-end data science solutions**, including feature engineering, model validation, and insight communication through visualizations and reports.

## PROFESSIONAL WORK EXPERIENCE

### Rebecca Everlene Trust | Data Analyst

Remote, USA | Mar 2025 – Present

- Collaborated daily with engineering teams to track and analyze live system performance, application reliability, and operational health metrics across cloud-native environments, helping ensure stable and efficient system operations.
- Analyzed real-time logs, distributed traces, and monitored data using tools such as Datadog and Dynatrace to proactively identify performance degradation, recurring production issues, and root causes of system incidents.
- Delivered data-driven insights on microservices architecture, identifying scalability constraints and latency bottlenecks to improve response times, service reliability, and overall user experience.
- Evaluated CI/CD pipeline performance and release metrics to detect failure patterns, improve deployment stability, and reduce production defects during software rollouts.
- Supported modernization of legacy applications by assessing performance impact during system upgrades and validating measurable improvements after architectural or configuration changes.
- Assisted with production deployments and configuration updates, conducting post-release monitoring to ensure system availability, minimizing downtime, and quickly address operational risks.
- Worked hands-on with containerized Docker-based services and contributed to cloud migration readiness initiatives, aligning applications with GCP-oriented infrastructure and scalability best practices.
- Communicated real-time performance findings, incident analysis, and operational trends to engineering leadership and cross-functional stakeholders, enabling faster troubleshooting and informed technical decision-making.

PROFESSIONAL WORK EXPERIENCE

CSJ Technologies | Junior Data Engineer with AI Expertise

Hyderabad, Ind | Nov 2021 – Aug 2023

- Managed ERP financial data interfaces, ensuring accurate and timely processing of transactions between payroll, operational, and finance systems to support reliable reporting.
- Reviewed system-generated accounting data and performed coding corrections to resolve discrepancies, improve ledger accuracy, and maintain data integrity.
- Played an active role in month-end close activities by validating automated journal entries, reviewing financial imports, and confirming successful posting within the ERP system.
- Reconciled payroll outputs with general ledger records to ensure accurate recording of compensation, benefits, and related financial transactions.
- Conducted detailed transaction-level reviews to identify anomalies, inconsistencies, and control gaps, strengthening the accuracy and reliability of financial reports.
- Monitored daily automated workflows and system integrations to ensure seamless synchronization between enterprise platforms and prevent reporting delays.
- Participated in financial system testing and deployment activities, validating configuration updates and ensuring system enhancements did not disrupt financial operations.
- Developed and maintained comprehensive documentation for financial system processes, workflows, and reporting procedures to support compliance and operational continuity.
- Provided functional support to internal stakeholders by troubleshooting reporting issues, answering system-related inquiries, and guiding proper financial system usage.

PROJECTS

- **Sales Insights Dashboard with Automated ETL Pipeline (SQL + Power BI + Power Platform)** Dec 2024  
Built analytics-ready datasets from CRM, Finance and accounting sources using SQL and automated ETL pipelines and designed KPI-driven dashboards (DOMO-style) focused on market trends, revenue performance, and operational optimization.
- **Voice recognition system (AI Project)** May 2025  
Developed an automated speech-to-text recognition system using whisper architecture and a hybrid CNN-Transformer model. And utilized hugging face transformers for model development and achieved Word Error Rate metrics
- **Customer Segmentation Using Database** May 2024  
Applied statistical clustering and segmentation to identify customer behavior patterns and support targeted marketing strategies and conducted data analysis, preprocessing, and feature engineering to enhance model accuracy and interpretability. And communicated findings clearly through visualization using python (Matplotlib, Seaborn)

EDUCATION

**The University of North Texas** | Master of Science in Data Engineering 3.6 CGPA  
**Coursework:** Big Data, Machine Learning, Information retrieval, Graph Theory, Fundamentals of Database, Empirical Analysis, Natural Language Processing, Software development of AI, Distributed parallel and database systems, Scientific Data Visualization.
