SUMMARY

Business Analyst with experience supporting supply chain and operations teams through AI driven data analysis, process improvement, and decision support. Skilled in translating business problems into analytical solutions using SQL, Excel, Power BI, and Python, with hands-on experience in process optimization, forecasting, and performance reporting.

TECHNICAL SKILLS

Data Analysis & BI:	SQL, Excel (advanced formulas, Pivot Tables), Power BI, Tableau, decision support analysis, KPI definition & tracking, ad-hoc analysis, performance reporting.
Advanced Analytics & Modeling:	Predictive modeling, Forecasting, Risk analytics, Statistical analysis, Machine learning, LLM-based analysis (Ollama).
Programming & Optimization:	Python, R, scikit-learn, XGBoost, Optimization (Solver, Gurobi).
Process & Operations:	Process analysis, Process optimization, Lean Six Sigma, DOE, Root Cause Analysis.
Tools & Platforms:	SPSS, Minitab, ServiceNow, Power Platform, Git.
Training Boot Camp:	AWS Machine Learning Engineer Associate Certification.
Certification:	Six Sigma Green Belt

WORK EXPERIENCE

Avnet <i>Business Analyst - Capstone</i>	June 2025 - December 2025 <i>Phoenix, AZ, USA</i>
· Built a Supply Chain Control Tower dashboard in Power BI by integrating multi-source OEM, supplier, and inventory datasets, delivering real-time visibility for planning and operations. · Built and configured AI-powered operations assistant leveraging Ollama LLMs, Python, and Copilot to perform supply gap analysis, demand forecasting, risk detection, delay prevention, and inventory optimization, reducing operational analysis time by 30% across global operations.	
ASU Supply Chain Operations <i>Supply Chain Analyst</i>	October 2025 - December 2025 <i>Tempe, AZ, USA</i>
· Executed current-state process analysis and waste identification (motion, waiting, labor misallocation) across inbound logistics and distribution workflows, driving operational efficiency improvements. · Applied Lean Six Sigma and continuous improvement methodologies to optimize workflow design, resource utilization, and service-level performance for campus-wide materials distribution.	
Pdc <i>Analyst - Lean Six Sigma Project</i>	June 2025 - December 2025 <i>Scottsdale, AZ, USA</i>
Applied Lean Six Sigma, Design of Experiments (DOE), and statistical analysis using Excel and Minitab to identify manufacturing process constraints and drivers of throughput and scrap, improving throughput by 22% and supporting data-backed decisions for daily operations and capacity planning.	
AI in Supply Chain Management <i>Research Assistant</i>	June 2025 - December 2025 <i>Tempe, AZ, USA</i>
· Collaborated with faculty and Microsoft to develop AI-driven supply chain use cases using large language models, Microsoft 365 Copilot, AWS-based automation, and predictive modeling to support demand forecasting, procurement analytics, inventory optimization, and logistics planning workflows.	
Accenture <i>Packaged App Development Associate</i>	September 2022 - July 2023 <i>Chennai, India</i>
· Analyzed system incidents and operational data using SQL, ServiceNow and Qlik while automating Power BI and Power Platform workflows which improved system stability and reduced troubleshooting time by 30%.	

PROJECTS

LLM Request Routing Optimization	March 2025 - May 2025
· Analyzed cost, latency, complexity, and capacity constraints to evaluate request-routing decisions across multiple LLM backends, using optimization techniques in Python (Solver/Gurobi) to support data-driven decisions on cost control and system scalability.	

EDUCATION

Arizona State University, Tempe, Arizona, USA Masters of Science in Business Analytics	January 2025 - December 2025 4.0 CGPA
Sri Ramachandra Institute of Higher Education and Research, Chennai, India Bachelor of Science in Data Science	July 2019 - July 2022 3.84 CGPA
