PROFESSIONAL SUMMARY

Junior Java software engineer with five months of hands-on experience developing Java applications, leveraging Apache Maven, SQL and OOP principles. Strong foundation in data structures, algorithms and design patterns, complemented by agile development coursework and academic projects. Proven ability to identify improvements, estimate development tasks and collaborate with stakeholders to deliver high-quality code. Motivated learner with a proactive approach to closing knowledge gaps.

Ivy Tech Community College, Valparaiso, IN

May 2020

Associate in Science (A.S.), Software Development

- **GPA:** 3.53 / 4
- **Achievements:** Dean's List 2018-2020

PROJECTS

TheLightAngel - Java Discord Bot

Jan 2020 - Present

- TheLightAngel is an application that enforces some integrity rules within the SAFE Crew Discord Server, a server with over 6,000 discord accounts that have joined.
- SAFE Crew is a community that hosts private Grand Theft Auto: Online sessions.
- We have established a discord server to communicate with people inside and outside the session.
- TheLightAngel's responsibility is to enforce our integrity rules for each player.
- Each player must display a name that matches their Social Club username, and that's only one of the four things this bot enforces.
- TheLightAngel starts 4 instances of the Java Discord API, creating 4 connections to Discord, allowing each section of the bot to run independently rather than waiting for one another.
- Source Code: <https://github.com/TheDarkAngel7/TheLightangel>

EXPERIENCE

Southlake McDonald's - SNJ Management

Sep 2022 - Sep 2024

Crew Member

Hobart, IN

My Managers that would know me best:

- Nataly Geminder, Department Manager
- Nicole Goin, General Manager
- James Campbell, Operations Consultant
- Processed drive-thru transactions, ensuring order accuracy within 10 seconds and corrections within 25 seconds to enhance customer satisfaction.
- Prioritized and executed time-critical tasks, improving order turnaround and reducing customer wait times.
- Maintained timely service and adhered to sanitation protocols, contributing to a clean and efficient work environment.
- Prepared french fries to menu standards, safety policies and company procedures.
- Addressed customers with friendly greetings and conversations.
- Personalized guest experiences, going extra mile to satisfy customer needs.
- Cross-trained across multiple stations, supporting team capacity during peak periods.
- Kept wait times low through fast order taking and payment processing.
- Upheld professional standards and met performance targets through consistent quality service delivery.
- Filled up stations with cutlery, sauces and napkins.
- Displayed proper image to customers and adhered to company dress code and uniform standards.
- Assisted guests to select menu choices, review club cards, and participate in add-on sales.
- Conducted regular temperature checks on food items to ensure safe serving temperatures were maintained.
- Handled customer transactions accurately.
- Created cold drinks and dessert beverages using machines or hand-blending methods.
- Completed closing procedures depending on assigned shifts.

SKILLS

- **Programming Languages:** Java, HTML5, SQL
- **Tools & Technologies:** Apache Maven, MySQL, Microsoft Office
- **Networking & Hardware:** Networking, Computer Networking, Computer Hardware Assembly
- **Methodologies & Core Concepts:** OOP Principles, Data Structures, Agile Development

- **Interests:** New Technologies, Motorcycles, Video Games

CERTIFICATIONS

- **Microsoft Office Solutions Associate:**04/2021, Present
- **PC Pro Certification:**05/2018, Present

VOLUNTEER

Waze

Jul 2023 - Present

Level 4 Map Editor

- Draw in new roads
- Place House Numbers on those roads
- Map Businesses and their perspective parking lots, including hospitals and entire strip malls.
- Respond to Road Closures posted by the Indiana Department of Transportation and numerous other sources throughout my editing area. With that response, I close the road on Waze, and anyone who was previously routed through then receives a different route.
- Add lane guidance to intersections where there are multiple lanes for different movements.

SAFE Crew

Jun 2019 - Present

Team Member

- Accepting New Players into the Crew
- Help players into the private sessions if needed
- Maintain the hardware and software for the sessions
- Moderate chat in the subreddit and discord server
