

Sai Chand Meda Full Stack Developer

saichand@workwebmail.com | (720)-313-4354 | USA | [LinkedIn](#)

Summary

Proficient Full Stack Developer with over 3 years of experience in designing, developing, and maintaining scalable web applications. Expertise in Angular, ASP.NET Core, Java, Spring Boot, and integrating advanced features like payment gateways and real-time updates. Skilled in database optimization, CI/CD pipelines, and deploying applications using cloud technologies like Azure and AWS. Strong focus on delivering high-quality, secure, and user-friendly solutions while adhering to best practices in unit testing, system performance, and application security. Proven ability to work across the software development lifecycle and collaborate in Agile teams.

Technical Skills

- **Frontend Development:** Angular, JavaScript (ES6+), TypeScript, HTML5, CSS3, Bootstrap, jQuery, SASS
- **Backend Development:** ASP.NET Core, Java, Spring Boot, Spring MVC, REST APIs, Microservices, SignalR
- **Database Management:** MySQL, PostgreSQL, Azure SQL Database, Redis, NoSQL Databases, Sequelize ORM
- **Cloud & Deployment:** Azure App Service, Azure SQL Database, Azure DevOps, Apache Tomcat, AWS
- **CI/CD & DevOps:** GitHub Actions, Jenkins, Azure DevOps, Docker, Kubernetes, Terraform
- **Security:** OAuth2, JWT, SSL/TLS, Cross-Origin Resource Sharing (CORS), Data Encryption
- **Testing & Quality Assurance:** JUnit, Jest, Postman, Selenium, React Testing Library
- **Version Control & Collaboration:** Git, GitHub, GitLab, Bitbucket, Jira, Confluence
- **Other Tools:** Swagger, Postman, Agile/Scrum Methodology, API Documentation, Microservices Design

Professional Experience

Full Stack Developer, Capgemini

01/2024 – Present | Remote, USA

- Developed a feature-rich e-commerce platform using Angular for a responsive frontend, ensuring seamless navigation, product browsing, and user-friendly interfaces to enhance the shopping experience across desktop and mobile devices.
- Built and integrated a scalable ASP.NET Core backend for managing product listings, customer accounts, order processing, and inventory management, ensuring smooth data flow and real-time synchronization between the frontend and backend systems.
- Implemented advanced features such as personalized product recommendations, dynamic pricing, and real-time inventory updates, utilizing machine learning algorithms and integration with Azure Cognitive Services to enhance user engagement and conversion rates.
- Integrated a secure payment gateway (e.g., Stripe or PayPal) into the platform, enabling smooth transactions and ensuring compliance with security standards, including PCI-DSS and data protection regulations for secure payment processing.
- Utilized Azure DevOps for CI/CD pipelines, automating the deployment of application updates to Azure App Service, improving deployment efficiency, reducing downtime, and ensuring faster delivery of new features and bug fixes to the production environment.
- Wrote and executed unit tests for key application components, ensuring high code quality and application reliability, and collaborated with QA teams to perform integration testing, resolving any issues to meet performance and security standards.

.Net Application Developer Sr Associate, Resideo Technologies

10/2020 – 07/2022 | Hyderabad, India

- Collaborated with an agile team to build, support, and manage a B2B e-commerce platform, leveraging .NET Core, MVC, C#, Angular, and Azure technologies to meet functional requirements and improve system performance.
- Optimized SQL database queries, improving response times by 40% and boosting user engagement by 25%, while leading front-end development efforts with C# and Angular to enhance UI functionality and customer satisfaction by 30%.
- Developed responsive web applications using Angular, implementing advanced features like two-way data binding, dependency injection, and reactive programming to improve user experience, system performance, and scalability.
- Designed and integrated RESTful web services with OAuth 2.0 and JWT security, enhancing system performance, scalability, and data flow while improving security for better integration with external systems.
- Engineered .NET-based microservices, reducing manual effort by 90%, improving system reliability, and enabling real-time APIs to increase responsiveness and operational efficiency.
- Implemented Azure DevOps CI/CD processes, achieving a 20% increase in successful deployments, while optimizing web applications with Azure App Service to improve performance, reduce downtime, and enhance reliability.
- Applied Azure SQL Database for high-availability systems with automatic backups, reducing downtime by 40%, and implemented Azure AD multi-factor authentication and role-based permissions, reducing user onboarding time from five to two days.

Full Stack Developer Intern, EPAM Systems

01/2020 – 09/2020 | India

- Developed a real-time chat application using ASP.NET Core and SignalR for real-time messaging, integrating JWT authentication and OAuth for secure user login and registration, ensuring data privacy and security across the platform.
- Fabricated the frontend using Java with Spring Boot and Thymeleaf to create an intuitive user interface, including user login, real-time message displays, and chat room functionalities, utilizing Spring Security for authentication and authorization.
- Designed and implemented RESTful APIs with ASP.NET Core for user profile management, message history retrieval, and chat room creation, ensuring smooth data flow between frontend and backend, while optimizing for performance and scalability.
- Deployed the application using Apache Tomcat for backend hosting and MySQL for managing user data, chat history, and authentication tokens, ensuring efficient database performance and implementing security measures for data integrity and reliability.

Education

Master of Science, California State University - Fullerton

08/2022 - 05/2024 | California, USA

Information Technology

Bachelor of Technology, GITAM University

06/2016 - 04/2020 | Hyderabad, India

Certifications

- **AZ-204** : Microsoft Certified Azure Developer Associate

07/2024
