SKILLS

Programming Languages:

Python (libraries: NumPy, Pandas, Matplotlib, SciPy), R (libraries: ggplot2), SQL (including experience with SSIS, SSRS, and SSAS), Java, Apache Spark, AWS Lambda, Azure Functions.

Database Technologies:

MySQL, SQL Server, Jupyter Notebook, Snowflake, Amazon Redshift, Google BigQuery, Microsoft Azure SQL Database, MongoDB, Cassandra

Data Visualization Tools:

Seaborn, Tableau, Power BI, Google Data Studio, Streamlit, Plotly

Data Analysis and Machine Learning:

Data Cleaning, Data Wrangling, Data Mining, Machine Learning, Natural Language Processing, Deep Learning

Cloud Computing:

AWS, Azure, Google Cloud Platform, Microsoft Azure Synapse Analytics

Business Intelligence (BI) Tools:

Qlik Sense, Looker

Statistical Software:

SPSS, SAS

Other Skills:

Data Storytelling, Communication and Presentation Skills, Problem-Solving and Critical Thinking, SDLC, Agile, Waterfall

Operating System:

MacOS, Windows, Linux

EDUCATION

Master of Science in Computer Science

The University of Texas at Arlington, TX - USA

Bachelor of Technology in Computer Science

J.B. Institute of Engineering and Technology

SUMMARY

- Results-driven Data Analyst with 4 years of experience in financial services and data management industries
- Expertise in Python, SQL, Tableau, and Power BI for financial data analysis, risk assessment, and predictive modeling
- Strong understanding of banking regulations, financial reporting standards, and data security protocols
- Proven track record of developing automated systems for fraud detection and risk management
- Demonstrated ability to translate complex financial data into actionable insights for stakeholders
- Committed to continuous learning in financial analytics, machine learning, and emerging FinTech trends

EXPERIENCE

PNC Financials, TX | Oct 2022 - Current

Data Analyst

- Increased client sales conversion by 15% through market trend analysis and competitor identification using Power BI data models and reports
- Reduced marketing costs by 10% and improved content creation efficiency by 50% through automated web scraping tools developed in Python
- Accelerated decision-making by 20% for key stakeholders by developing interactive Tableau dashboards visualizing critical financial metrics
- Achieved a 95% reduction in data errors by leading data quality initiatives, meticulously investigating and resolving data discrepancies
- Supported regulatory compliance and risk mitigation by collaborating with Operations Compliance and Control department, leveraging data analysis for training programs and regulatory reports
- Generated insightful capacity planning reports using Python libraries (NumPy, Pandas, Matplotlib, SciPy) to aid strategic financial decision-making
- Designed and implemented Power BI data models and reports for client analysis of market trends, competition, and customer behavior
- Streamlined data collection and backlog process, enhancing team productivity by 20%
- Performed data quality investigations, identifying and improving issues based on operational assessments and customer inquiries
- Developed comprehensive reports and dashboards using Tableau, Power BI, and Python libraries for diverse stakeholders

Data One, India | Jan 2020 - Nov 2021

Junior Data Analyst

- Developed and maintained ETL processes using Python and SQL, processing over 500GB of financial transaction data daily with 99.9% accuracy
- Implemented data validation checks that reduced reporting errors by 75%, ensuring high data quality for financial analysis
- Created interactive dashboards using Power BI, improving stakeholders' ability to analyze key financial metrics and make data-driven decisions
- Built predictive models using machine learning algorithms to forecast market trends, achieving 85% accuracy in short-term predictions
- Automated report generation for daily financial summaries, saving the team 15 hours per week and improving information delivery timeliness
- Conducted statistical analysis on customer financial behavior, identifying patterns that led to a 20% improvement in customer segmentation strategies
- Optimized SQL queries for large datasets, reducing processing time for complex financial reports by 40%
- Collaborated with the compliance team to develop data-driven alerts for potential regulatory violations, enhancing the company's risk management capabilities
- Utilized advanced Excel functions and VBA macros to create a tool for scenario analysis, enabling faster and more accurate financial planning
- Participated in a cross-functional team to implement a new data warehouse, improving data accessibility and analysis capabilities across the organization
