PROFESSIONAL SUMMARY

A results-driven **PL/SQL Developer**, **Oracle APEX Developer**, and **Database Manager** with 4+ years of experience in creating robust database solutions, optimizing business processes, and delivering actionable insights. Expert in developing scalable Oracle APEX applications, writing high-performance PL/SQL queries, and leveraging data analytics tools to support business decision-making. Adept at translating complex business requirements into intuitive, efficient, and user-friendly database systems.

My skill set encompasses **SQL & PL/SQL**, **Oracle APEX**, **RESTful Web Services**, **Power BI**, and **Data Analytics**. I am passionate about optimizing database performance, creating dynamic reporting solutions, and providing insightful analytics to drive business success. Proficient in **ETL processes**, **data migration**, and lifecycle management of data-centric projects.

Key Skills:

- **Data Analytics & BI:** Power BI, Tableau, advanced DAX calculations, and data-driven decision-making.
 - **Database Management:** Tuning queries, managing schemas, indexes, and materialized views for improved performance.
 - **Business Intelligence & Visualization:** Translating complex data into actionable insight
 - **PL/SQL & SQL Development:** Advanced expertise in PL/SQL, SQL queries, triggers, stored procedures, and dynamic SQL.
 - **Oracle APEX:** Application development, report generation, workflow automation, and performance optimization.
 - **RESTful Web Services:** Integrating external services with Oracle databases.
- Eligible under Military Spouse Noncompetitive Appointment Authority.
-

PROFESSIONAL EXPERIENCE

Data Analyst & Business Intelligence Specialist

Synaxus BI Solutions GmbH – Germany

Feb 2022 – Oct 2024

Project 1: Power BI Reporting & Data Analysis

- Developed advanced **Power BI dashboards** that visualized critical business metrics and performance indicators, providing actionable insights for decision-makers.
- Utilized **SQL** and custom queries to extract data from **Oracle databases** for analysis and visualization, ensuring data accuracy and integrity in all reports.
- Applied **DAX** to build advanced measures and calculations, providing enhanced analytics and deeper insights into business trends and performance.
- Worked closely with business stakeholders to gather reporting requirements, ensuring that dashboards and reports were aligned with the strategic goals and KPIs of the organization.

- Integrated **Power BI** with **Oracle databases** to ensure real-time access to data, automating the ETL (Extract, Transform, Load) process and streamlining the reporting cycle.
- Conducted **ad-hoc analysis** to identify patterns and trends, presenting findings through interactive visualizations that helped shape business strategies.
- Ensured high-quality data by performing **data cleansing** and integrating data from various sources to ensure consistency and reliability in reports.
- Collaborated with other teams to perform **data integration**, ensuring smooth data flow across systems for reporting and analysis.
- Delivered **UAT (User Acceptance Testing)** for all BI reports and dashboards, providing necessary training and support to end-users for optimal usage.

Key Technologies: Microsoft Power BI, SQL, Azure Databricks, Data Modelling, Data Visualization, Oracle Database, Jira, Microsoft Teams

Oracle Apex Developer and Database Manager

Synaxus BI Solutions GmbH – Germany

Jan 2021 – Oct 2024

Project 2: Oracle APEX Application Development & Database Optimization

- **Oracle APEX Development:** Developed and maintained **Oracle APEX applications**, creating scalable, high-performance applications that met business requirements for data entry, reporting, and workflow automation.
- **PL/SQL Development:** Wrote and optimized **PL/SQL code** for business logic, including the creation of **stored procedures, functions, triggers**, and **dynamic SQL** to support complex data processing needs.
- **Database Design & Management:** Designed and implemented **database schemas**, including tables, indexes, and relationships, ensuring a robust, normalized database structure for optimal performance.
- **Database Performance Optimization:** Conducted comprehensive **query optimization** by analyzing **Explain Plans** and implementing indexing strategies to improve the performance of complex queries. Tuned long-running queries, reducing execution times and enhancing application responsiveness.
- **Materialized Views & Data Aggregation:** Implemented **materialized views** to store summarized data and improve performance for reporting queries. Leveraged advanced **PL/SQL** features like **Bulk Collect** and **FORALL** for efficient data processing.
- **RESTful Web Services:** Developed and integrated **RESTful Web Services** within Oracle APEX to enable seamless data exchange between APEX applications and external systems, supporting real-time data access and integration.
- **Database Monitoring & Maintenance:** Managed **database jobs** using **DBMS_JOB** and **DBMS_SCHEDULER** for task automation and used **DBMS_SQL** to dynamically execute complex SQL statements. Ensured regular database backups and recovery processes were in place for data integrity.
- **Data Migration & Version Upgrades:** Led the migration of Oracle APEX applications from **version 19 to version 21**, ensuring all functionalities were preserved and optimized for performance under the new version. Addressed any compatibility issues and enhanced existing features.
- **Report Generation:** Developed and optimized reports in Oracle APEX, including **interactive reports, charts**, and **dynamic PDF reports** using **APEX Print Engine** and **FO Designer**, ensuring clear and actionable reporting for stakeholders.

- **Collaborative Stakeholder Engagement:** Worked closely with business users and stakeholders to gather requirements, refine application specifications, and deliver solutions that align with organizational goals. Provided ongoing technical support throughout the project lifecycle.

Key Technologies: Oracle APEX, SQL, PL/SQL, Oracle TOAD, Oracle SQL Developer, HTML, CSS, JavaScript, Tortoise GIT, Azure DevOps, FO Designer, Microsoft Excel, Microsoft Teams, Asana.

Intern - Data Manager

Campstar Worldwide Camping GmbH – Germany

Dec 2018 – Feb 2019

- Managed and processed large-scale data sets to ensure accurate and efficient data handling, utilizing big data management techniques.
- Identified potential partners and optimized business collaboration strategies through effective data management and analysis, contributing to organizational growth.
- Performed data mapping and integration across multiple data sources to enhance data quality, improve accessibility, and streamline business processes.
- Led data cleaning initiatives to identify and rectify inconsistencies, enhancing data accuracy and overall reliability.
- Implemented data quality improvement strategies, continuously optimizing data integrity and ensuring compliance with quality standards.
- Utilized **Python** for data scraping, automating the extraction of critical information from online sources to support business analytics and decision-making.
- Leveraged Python's BeautifulSoup library to parse HTML and XML documents, simplifying data extraction from complex web pages and streamlining data scraping processes.
- Conducted thorough data source research to identify and integrate new data streams, contributing to comprehensive and actionable datasets.
- Provided operational support, ensuring smooth data management workflows and improving overall business efficiency.

Key Technologies: Python, Project Jupyter Notebook, Web Scraping, BeautifulSoup, Big Data Techniques, Data Mapping, Microsoft Excel, Jira, Confluence, Trello

EDUCATION

Master of Science in Information Engineering

University of Applied Sciences Kiel – Germany

Oct 2016 – Nov 2020

Bachelor of Engineering in Computer Science

CVSR College of Engineering – India

Oct 2012 – May 2016

TECHNICAL SKILLS

Programming & Databases: Oracle SQL, PL/SQL, HTML, CSS, Python

Database Tools: Oracle SQL Developer, TOAD

IDE: Oracle Application Express (APEX), Eclipse

BI Tools: Tableau, MS Excel, Power BI

Project Management Tools: Jira, Slack, Confluence, Azure DevOps, Freedcamp, Trello, Asana

Version Control Systems: GitHub, SVN (Tortoise)

Operating Systems: Windows

Design Tools: FO Designer

Other Tools: MS Office (Word, Excel, PowerPoint, Teams)

PROJECTS

Master Thesis: Impact of Rapid Change from Traditional Teams to Virtual Teams

University of Applied Sciences Kiel – June 2020 – Oct 2020

- Conducted a study on the challenges faced by organizations during the transition from traditional teams to virtual teams, focusing on communication barriers, productivity shifts, and team dynamics.
- Designed and administered interviews and questionnaires to collect qualitative and quantitative data from team leaders and employees across multiple industries.
- Utilized **Tableau** for data visualization, presenting a comparative analysis of traditional versus virtual team performance and identifying critical success factors for virtual team management.
- Analyzed the impact of technology adoption, team collaboration tools, and remote work policies on overall team effectiveness.
- Proposed strategic recommendations to enhance team collaboration, employee engagement, and productivity in virtual environments.

Master Project: Collecting and Analyzing Web Data Using Scraping Methods

University of Applied Sciences Kiel – April 2019 – July 2019

- Developed a **Python-based web scraping solution** to extract large volumes of structured and unstructured data from various websites for analysis.
 - Applied **Beautiful Soup** and **requests libraries** for parsing HTML and XML data, automating the extraction process to improve data retrieval efficiency.
 - Cleaned, structured, and processed the scraped data to ensure accuracy and readiness for analysis.
 - Created interactive dashboards using **Tableau** to visualize key trends and insights, driving more informed decision-making.
 - Explored ethical considerations and best practices in web scraping to ensure compliance with legal guidelines and respect for data privacy.
-

LANGUAGES

- **English:** Professional Proficiency
 - **German:** Limited Working Proficiency (A2 Level)
 - **Hindi:** Working Proficiency
 - **Telugu:** Native proficiency
