

SAI PRANAY KRUPA

Delray Beach, FL | pranay.k@itjobmail.com | +1 (786) 238-5710

SUMMARY

Software Engineer with around 6 years of experience designing, developing, and maintaining end-to-end web and enterprise applications. Strong experience in front-end development with React.js and back-end development using Java, Spring Boot, and Node.js. Skilled in building secure REST APIs, integrating databases, deploying applications to the cloud, and supporting production systems in Agile environments.

EXPERIENCE

Atlassian, USA | Software Engineer

Aug 2025 - Current

- Designed and developed full-stack features by building responsive user interfaces in React.js and scalable backend services in Spring Boot, supporting core business workflows.
- Created and maintained RESTful APIs to enable secure and efficient communication between front-end applications and backend systems.
- Implemented authentication and authorization using Spring Security and JWT, ensuring secure access control across applications.
- Integrated front-end components with backend APIs using Axios, including error handling, request validation, and response mapping.
- Optimized backend performance by refactoring business logic and tuning SQL queries, resulting in faster API response times.
- Wrote unit and integration tests using JUnit, Mockito, Mocha, and Chai to improve code reliability and reduce production issues.
- Containerized applications using Docker and deployed microservices to AWS ECS, ensuring scalability and high availability.
- Built and maintained Jenkins CI/CD pipelines to automate code builds, testing, and deployments.
- Collaborated closely with product owners, QA, and DevOps teams while following Agile Scrum practices.

Accenture, India | Packaged App Development Analyst (Full Stack Developer)

May 2021 - Oct 2023

- Developed and deployed responsive web applications using AngularJS, .NET, and SQL Server for internal application of the Accenture called **mySolutionPlanner** to manage client data, resources, and revenue tracking.
- Enhanced code quality and reduced defects by 20% through code reviews and optimization.
- Collaborated with Agile teams to meet project deadlines and client requirements.
- Boosted application performance by 15% via database and UI optimization.
- Automated application deployments using Azure DevOps Pipelines, streamlining the release process and reducing deployment errors by 30%.
- Performed manual testing and validation of front-end and back-end components to ensure feature integrity and meet client expectations.
- Conducted regular code reviews and provided mentorship to junior developers, enforcing best practices and improving team code quality.
- Acted as a liaison between technical teams and stakeholders by gathering requirements, conducting sprint demos, and incorporating client feedback for iterative improvements.

Cybage Software, India | Software Engineer

Sep 2018 - April 2021

- Participated in all phases of the Software Development Life Cycle (SDLC), including requirements analysis, development, testing, deployment, and production support.
- Developed dynamic and interactive front-end pages using HTML, CSS, JavaScript, jQuery, React.js, and Angular to enhance user experience.
- Designed and implemented backend services using Java, Spring Framework, Hibernate, and RESTful web services.
- Built Node.js and Express.js APIs to handle CRUD operations, data validation, and business logic processing.
- Integrated front-end applications with backend systems using AJAX and JSON for smooth data exchange.
- Implemented Kafka consumers in Java to process events and enable asynchronous communication between microservices.
- Deployed backend services on AWS EC2 and hosted front-end static files on AWS S3.
- Configured Kubernetes services to provide load balancing and service discovery.
- Developed database interaction layers using JDBC and optimized MySQL queries to improve application performance.
- Fixed production defects, improved system stability, and supported application releases.
- Participated in code reviews, followed clean coding practices, and collaborated with senior engineers.

SKILLS

Methodologies: SDLC, Agile (Scrum), Waterfall, Test-Driven Development (TDD)

Programming Languages & Core Concepts: Java, Python, C, C++, C#, Data Structures (Arrays, Lists, Stacks, Queues, Hash Maps, Trees), Object-Oriented Programming (OOP), System Design Basics

Front-End & Web Technologies: HTML5, CSS3, JavaScript, TypeScript, React.js, Redux, Angular, Next.js, Bootstrap, jQuery, AJAX, JSON, GraphQL

Back-End Technologies: Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Spring Batch, Spring Cloud, Hibernate, Servlets, JSP, JDBC, Struts2, Node.js, Express.js, RESTful APIs, Microservices, .NET, Flask

Messaging: Apache Kafka

Databases: Oracle, MySQL, PostgreSQL, SQL Server, MongoDB, Cassandra

Cloud & DevOps: AWS (EC2, EKS, S3, RDS, Lambda, CloudWatch, ELK Stack), Azure, GCP, Docker, Kubernetes, Jenkins

Testing, Logging & Monitoring: JUnit, Mockito, Selenium, Cucumber, Jasmine, Mocha, Chai, Log4j2, Splunk

Tools & Version Control: Git, GitHub, Bitbucket, Jira, Postman, Maven, Gradle, IntelliJ, Eclipse, Spring Tool Suite (STS), Visual Studio Code

Operating Systems: Windows, Linux

EDUCATION

Master of Science in Data Science | Florida Atlantic University, Boca Raton

Bachelor of Engineering in Computer Science | Sri Chandrasekarendra Saraswathi Viswa Maha Vidyalaya, Kancheepuram, India

CERTIFICATIONS

Mendix Rapid Developer (Accenture - 2023)

MySQL (Udemy - 2021)

Agile Methodology (Accenture - 2021)
