SUMMARY

Frontend Developer with 3+ years of experience in developing and optimizing responsive web applications. Proficient in React.js, and Spring Boot, with a strong focus on improving user engagement through pixel-perfect UI design. Skilled in optimizing performance, implementing responsive designs, and fostering team collaboration. Proven track record of developing reusable component libraries, Adept in Agile methodologies to ensure high-quality, scalable solutions.

SKILLS

Methodologies: SDLC, Agile, Waterfall

Programming Languages: Java, HTML5, CSS3, JavaScript (ES6+), Node.js, Typescript

Frameworks and Libraries: React.js, Angular, Vue.js, Spring Boot, jQuery, AJAX

Version Control & Development Tools: Git, GitHub, Eclipse, IntelliJ IDEA, Visual Studio Code, NetBeans

Front-End Technologies: RESTful APIs, Responsive Web Design, Progressive Web Apps (PWAs)

UI/UX Design Tools: Figma, Moqups, Adobe Creative Suite, Sketch, Axure RP, Balsamiq

Testing tools: Junit5, Mockito, Jest, Cypress

Software Development Concepts: Object Oriented Programming, Data Structures & Algorithms, Microservices

Containerization Tools: Docker, Jenkins, Kubernetes

Cloud Platforms: AWS (EC2, S3, CloudWatch, RDS, IAM, VPC)

Soft Skills: Problem Solving, Communication, Adaptability, Attention to Detail, Team Collaboration

EDUCATION

Master of Science in Computer Software Engineering | Northeastern University, Boston, MA

May 2024

Bachelor of Technology | University of Mumbai, India

June 2021

PROFESSIONAL EXPERIENCE

Epsilon, California | Frontend Developer

August 2023 - Current

- Architected responsive web applications using **HTML5, CSS3, JavaScript (ES6+), and TypeScript** for Epsilon's digital marketing solutions, leveraging **React.js** with TypeScript to build type-safe, interactive dashboards and data visualization components, ensuring cross-browser compatibility and optimal performance across devices.
- Coordinated with **UX designers** using **Figma** and **Adobe Creative Suite** to implement pixel-perfect, interactive user interfaces, resulting in a 30% improvement in user engagement and reducing bounce rates for key client dashboards.
- Utilized Agile for project management, participating in daily stand-ups and sprint planning meetings, while consistently delivering high-quality code that adhered to Epsilon's coding standards and best practices, employed **Git** and **GitHub** for version control and collaborative development.
- Championed **Redux** for efficient state management in complex **React** applications, enabling seamless data flow across multiple components in Epsilon's digital marketing platforms.
- Spearheaded to the development of a reusable **React** component library, reducing development time for new features and ensuring consistency across Epsilon's suite of marketing technology products.
- Engineered robust **RESTful APIs** using **Express.js** and integrated them with **PostgreSQL** databases, optimizing data flow and reducing query response times by 40% for digital marketing platforms.

Trigent Software, India | Frontend Developer

July 2020 – August 2022

- Orchestrated the design and develop responsive and user-friendly frontend web applications using **HTML, CSS, and React**, resulting in a 30% increase in user engagement.
- Crafted and implemented **RESTful APIs** using **Node.js** and **Express.js**, integrating them seamlessly with React frontend applications. Leveraged **Axios** for efficient HTTP requests, improving data fetching performance by 25% and enhancing overall application responsiveness.
- Optimized complex web applications using **React.js, and TypeScript** for multiple clients in the IT services sector, leveraging static typing to improve code quality and reduce runtime errors.
- Pioneered the creation of a modular component library in **React**, streamlining development workflows and ensuring uniform **UI/UX** across client applications, employed **AJAX** to enhance functionality and user experience.
- Utilized **Redux** for state management, ensuring a centralized and predictable state flow across complex applications, achieved a 30% reduction in rendering time.

- Integrated real-time data display features using **React** and **WebSocket** connections, enabling users to receive instant updates and contributing to improvement in data freshness.
- Actively participated in cross-functional team meetings and sprint planning sessions, contributing ideas for improvements and bug fixes, consistently met sprint goals and deadlines while maintaining a focus on code quality, performance optimization, and cross-browser compatibility.

PROJECTS

Cloud-Based Webapp Application using AWS - EC2, Terraform

- Orchestrated the deployment of a web application built using **Java**, Spring Boot, and MySQL on AWS, utilizing Terraform for infrastructure as code, and implementing Autoscaling groups, Elastic Load Balancer, and Packer generated machine images to optimize traffic management and scalability.
- Established a robust Continuous Integration (CI/CD) pipeline using GitHub Actions and Packer for seamless code integration and automated deployment of AMIs, significantly reducing server setup and deployment time by 50%
- Leveraged AWS services such as RDS, S3, DynamoDB, CloudWatch, SNS, and Lambda to enhance application functionality, performance, and scalability, including custom DNS configurations and notification triggers.
- Deployed RESTful APIs and managed logs with CloudWatch, setting up alerts for critical application metrics, thereby improving system reliability and proactive issue resolution.

Travel Getaway Portal

- Spearheaded the development of a comprehensive hotel reservation system using the **MERN** (MongoDB, Express.js, React, Node) stack. Successfully implemented **CRUD** operations, authentication, and role-based authorization, showcasing expertise in full-stack architecture.
- Demonstrated a deep understanding of **Node.js** and **Express.js** by effectively incorporating middleware for improved API functionality. Implemented best practices for error handling, ensuring a robust backend infrastructure.
- Skillfully integrated React Context API for state management and employed JWT for secure user authentication within the React front-end.

TravelLuxe: Elevating travel experiences

- Designed a robust booking system in **Figma**, resulting in a 20% reduction in the average time users spend planning and booking their travel arrangements through the TravelLuxe app.
- Implemented intuitive and visually appealing interfaces, leading to a 25% improvement in overall user satisfaction with the application. Infused knowledge of usability principles and techniques into the information architecture.
- Applied design thinking and user-centered methods during the project, ensuring a keen focus on user needs, conducted comprehensive user testing sessions to refine the app's user experience.

CERTIFICATIONS

AWS Certified Solutions Architect – Associate
