Work Experience

Life Sciences Analyst, Cognizant | Orlando, FL

August 2024 - Present

Currently deployed at Bayer as a Product Developer, supporting global LabVantage LIMS initiatives through system enhancements, user adoption strategies, and digital lab solutions.

- Analyzed, designed, and implemented system enhancements in the LabVantage LIMS application based on stakeholder requirements, improving functionality and user experience for 200+ end users across multiple lab sites.
- Translated complex business needs into effective system configurations, achieving a 90% on-time delivery rate of critical requests and reducing rework by 20%.
- Partnered with cross-functional teams including Quality, Business Users, IT, and Development to deliver seamless system support, improving cross-team efficiency and reducing resolution times by 30%.
- Developed and maintained high-quality documentation, including 15+ user guides, technical specifications, and configuration records, increasing knowledge transfer effectiveness and reducing onboarding time by 25%.
- Proactively identified, troubleshooted, and resolved system issues, minimizing downtime by 40% and ensuring uninterrupted business continuity.
- Composed comprehensive training materials for new hires in lab system support, adopted as standard onboarding resources that reduced ramp-up time by 2 weeks and improved team readiness scores by 30%.
- Contributed to the development and submission of 5+ client Requests for Proposals (RFPs), supporting requirements gathering, solution design, and preparation of proposal materials that helped new business acquisitions.
- Selected to undergo advanced training on IoT-based laboratory monitoring systems, gaining hands-on expertise in real-time data collection, environmental monitoring, and data-driven solutions to improve lab efficiency.

IT Support Specialist, Boston University | Boston, MA

January 2021 - May 2023

Provided frontline technical support for faculty, staff, and students across the university, ensuring reliable IT operations and user satisfaction.

- Resolved 500+ technical issues related to hardware and software, achieving a 95% customer satisfaction rating.
- Deployed and re-imaged over 100 devices, including laptops, desktops, and Apple products for university staff and faculty.
- Delivered IT support via in-person, email, and phone channels, maintaining 1,000+ technical documents through ServiceNow.

Research Intern, Boston Children's Hospital | Boston, MA

October 2021 - May 2023

Supported neuroscience research in the Brain and Eye Pain Imaging (BEPI) Lab through instrumentation assembly, participant data collection, and advanced MRI data analysis.

- Led assembly of an Ophthalmic Photosensitive Analyzer (OPA) at the Brain and Eye Pain Imaging (BEPI) Lab.
- Collected and meticulously documented data from 100+ participants, ensuring accuracy in Excel worksheets.
- Analyzed MRI data using the Functional Magnetic Resonance Imaging of the Brain (fMRIB) Software Library.

Education

Bachelor of Science, Biomedical Engineering, Boston University | Boston, MA

- **Lung Acoustics Diagnostic Biomarker Capstone:** Designed and prototyped a negative pressure chamber to inflate and deflate a pig lung for resonance testing.
- Performed diverse data analyses in Matlab, including densitometry for band quantification, qPCR curve fitting, spectral absorption of solutions, image processing of blood smears using Fourier and Gaussian filters.

Areas of Expertise

Professional Skills

Client Interfacing | Data Analytics | Time Management | Project Planning & Implementation | Creative Problem Solving | Report Generation | Collaboration

Technical Skills

Python | SQL | API/REST | LabVantage LIMS | ELN | Microsoft Suite | Matlab | ServiceNow | Elemental Machines
