SUMMARY

Salesforce Developer with 4 years of experience delivering Lightning-based CRM solutions for banking and consulting clients. Skilled in Apex, Lightning Web Components, Flows, and REST/SOAP integrations to automate workflows and optimize data models. Proven track record implementing CI/CD pipelines and integration architectures with MuleSoft and external platforms. Salesforce Certified Administrator (ADM-201) and Platform Developer I (PD1) focused on enhancing system adoption and reliability.

SKILLS

- **Salesforce Development & Customization:** Apex Classes & Triggers, Lightning Web Components (LWC), Aura Components, Visualforce Pages, SOQL/SOSL Queries, Custom Objects, Record Types, Page Layouts, Validation Rules, JavaScript
- **Integration & API Management:** REST/SOAP API Integration, External Service Calls, Middleware (MuleSoft, Dell Boomi, Postman), Connected Apps, OAuth 2.0, Web Services, Integration Testing
- **Automation & Process Management:** Flows (Screen, Record-Triggered, Schedule-Triggered), Process Builder, Workflow Rules, Approval Processes, Assignment Rules, Auto-Launched Automation
- **Data Modeling & Management:** Data Migration (Data Loader, Workbench, Import Wizard), ETL Integration, Deduplication, Data Cleansing, Record Hierarchies, Schema Builder, Relationship Management (Lookup, Master-Detail), SQL
- **Testing, Deployment & Release Management:** Apex Test Classes ($\geq 75\%$ Coverage), Sandbox Configuration, Change Sets, ANT Migration Tool, VS Code with Salesforce CLI, Git-Based CI/CD (GitHub Actions, Bitbucket Pipelines), UAT Coordination, DevOps Best Practices, Agile Methodologies
- **Security & Access Control:** Profiles, Permission Sets, Role Hierarchies, Sharing Rules, Field-Level Security, Login IP Ranges, Org-Wide Defaults (OWD) for secure multi-user environments
- **Analytics & Reporting:** Custom Reports, Dashboards, Joined Reports, Report Types, KPI Tracking, Data Visualization for Sales, Service, and Marketing Performance
- **Cloud Expertise & Platforms:** Sales Cloud, Service Cloud, Experience Cloud, Marketing Cloud (Basics), AppExchange Solutions, Platform Events for Real-Time Communication
- **Tools & Version Control:** Visual Studio Code, Salesforce Inspector, Postman, Git/GitHub, Jira, Confluence, Dev Hub, Scratch Orgs, Deployment Automation

WORK EXPERIENCE

JPMorgan Chase & Co.

Jun 2023 - Present

Salesforce Developer

NJ, USA

- Built Lightning Web Components using JavaScript and Apex triggers to automate credit-risk dashboards, improving portfolio visibility for 1,200+ advisors and reducing manual report preparation time by 41% using Salesforce, LWC, and SOQL.
- Integrated Salesforce with Oracle ERP using RESTful APIs and MuleSoft connectors, streamlining loan data synchronization and eliminating departmental data mismatches, reducing financial reconciliation errors by 38%.
- Automated client-onboarding processes using record-triggered Flows and Approval Processes, replacing nine manual tasks and cutting onboarding cycle time by 45%, ensuring complete compliance and consistent user experience.
- Developed Apex test classes maintaining 82% coverage and executed CI/CD pipelines with GitHub Actions and Salesforce CLI following DevOps best practices, ensuring stable deployments and reducing post-release defects by 27% across multiple business modules.
- Configured Profiles, Permission Sets, and Role Hierarchies to meet security standards, resolving 26% fewer access issues while maintaining SOX compliance for sensitive financial data within production environments.
- Designed custom dashboards and joined reports for credit and compliance teams, improving decision-making efficiency by 36% and reducing dependency on manual Excel-based reporting using Salesforce Analytics and report types.
- Collaborated with business stakeholders and QA teams via Jira and Confluence using agile methodologies, documenting technical changes that reduced UAT feedback loops by 29% and accelerated sprint delivery timelines across two major Salesforce releases.

Sage Softech

Dec 2021 - Jul 2022

Salesforce Developer

Indore, India

- Designed and customized Visualforce pages and Aura Components for lead management, increasing marketing data accuracy by 33% and enabling faster follow-up through improved field mapping and responsive component design.
- Implemented automated workflows and record-triggered Flows for service case routing, reducing average resolution time from five hours to under three and boosting SLA adherence by 40% using Flow Builder and Process Builder.
- Migrated over 85,000 account records using Data Loader and Workbench, validating field mappings and relationships with SQL scripts to ensure 99.7% accuracy across production and staging environments with zero duplicate entries.
- Integrated Salesforce with third-party HRMS via SOAP API, enabling centralized employee updates and cutting duplicate record incidents by 42%, enhancing internal communication and process consistency across departments.
- Developed Apex triggers and helper classes to automate lead assignment and email notifications, reducing manual intervention by 48% and ensuring faster sales-team response across multiple geographic regions.
- Configured Profile-based access controls and Validation Rules to enforce data integrity, decreasing input errors by 31% and improving audit compliance during quarterly Salesforce instance reviews.

Cybage Software

Jan 2021 - Nov 2021

Junior Salesforce Developer

Pune, India

- Developed Apex triggers and helper classes to automate recurring service requests, saving approximately 28 staff hours weekly and increasing operational efficiency within managed-service projects using Apex and SOQL queries.
- Created joined reports and interactive dashboards in Salesforce Analytics for support KPIs, improving management insight by 58% and enabling quicker decisions on ticket prioritization and resource allocation.
- Supported deployment activities using Change Sets and the ANT Migration Tool, ensuring 100% successful release cycles between sandbox and production environments through careful dependency validation and user acceptance testing.

- Collaborated with QA and business teams via Jira and Confluence, documenting test scenarios and validations that reduced production defects by 22% and improved cross-team communication during project rollouts.

EDUCATION

Sacred Heart University, Fairfield, Connecticut, USA

Sep 2022 - Dec 2023

Master of Science, Computer Science

Sage University, Indore, Madhya Pradesh, India

Aug 2018 - Jul 2021

Bachelor of Science, Forensic Science

CERTIFICATIONS

- Salesforce Certified Administrator (ADM-201)
- Salesforce Certified Platform Developer I (PD1)
