

Shaker Dasari

Data Analyst

Farmington Hills, MI 48335 | (989) 944-9060 | shaker.analytics9@gmail.com | [LinkedIn](#)

Summary:

Accomplished Data Analyst with 4 years of specialized experience in data analytics, process optimization, and business intelligence, adept at transforming complex datasets into actionable insights that drive operational efficiency. Highly proficient in utilizing Celonis for process mining, leveraging PQL to pinpoint inefficiencies and streamline workflows. Experienced in collaborating with cross-functional teams to design and implement innovative data-driven solutions that enhance business performance. Skilled in cloud platforms, advanced data visualization, and optimizing critical business processes such as AR, AP, procurement, and case management. Certified in process mining, with a proven ability to convert data insights into strategic business value, fostering accelerated growth.

Skills:

Programming & Scripting:	Python, SQL, Java, Scala, R, PySpark, PQL
Data Analytics & Visualization:	Tableau, Power BI, Qlik Sense, Amazon QuickSight, Celonis Dashboards, Advanced Excel, Pandas
Databases & ETL Tools:	Microsoft SQL Server, Teradata SQL, Snowflake, Cassandra, MongoDB, SSIS, Informatica, Alteryx
Big Data Technologies:	Apache Spark, HDFS, Kafka, PySpark, Nifi, Oozie, HBase
Cloud Platforms:	Amazon Web Services (AWS): EC2, EMR, S3, Redshift, Lambda, Glue, Athena, Kinesis Microsoft Azure: Azure Synapse Analytics, Data Factory, Databricks, Blob Storage, HDInsight, Cosmos DB, Azure Functions
Process Mining & Optimization:	Celonis, Process Query Language (PQL)
Functional Expertise:	Data Analysis, Data Pipelining, Data Transformation, Data Integration, Data Streaming
Artificial Intelligence & Machine Learning:	Supervised & Unsupervised Learning, Regression, Clustering, Sentiment Analysis, Support Vector Machines (SVMs), Natural Language Processing (NLP), Large Language Models (LLMs), BERT, Retrieval-Augmented Generation (RAG), Deep Learning
Software Development & Methodologies:	Agile, Scrum, SDLC, CI/CD (Git, Jenkins)

Experience:

Verizon Jan 2024 – Present Data Analyst (Remote – MI)
- Directed end-to-end Software Development Life Cycle (SDLC) processes, integrating Agile methodologies to deliver robust and scalable solutions. - Boosted prediction accuracy by 25% through the design and deployment of machine learning models using Python and TensorFlow, enabling data-driven insights that enhanced marketing outcomes. - Orchestrated process mining initiatives in Celonis, producing comprehensive blueprints and standardizing methodologies, cutting project implementation timelines by 25%. - Enhanced operational efficiency by streamlining data pipelines with Alteryx and SQL, achieving a 25% reduction in processing time for critical reporting. - Designed a Python-based correlation matrix algorithm, significantly advancing analytical capabilities for identifying data relationships. - Built scalable SSIS packages, improving ETL performance by 10% for large-scale data operations. - Developed interactive Redshift dashboards, empowering stakeholders with real-time analytics and improving decision-making by 15%. - Optimized order-to-delivery workflows using Celonis insights, reducing cycle times by 30%. - Strengthened regulatory compliance by establishing rigorous QA processes, mitigating risks for financial and trust-related reporting.

Tools and Technologies: SQL, Python, Jupyter Notebooks, Azure Synapse Analytics, PySpark, Tableau, MySQL, Amazon Redshift, AWS S3, SSIS, Advanced Excel, Alteryx, Jira, GitHub

Enziq Solutions, India October 2019 – August 2022 Senior Data Analyst
- Architected real-time data streaming solutions using Apache Kafka, Spark Streaming, and PySpark, enhancing data ingestion efficiency. - Led Celonis-driven process optimization projects, achieving a 30% reduction in cycle time for procurement, accounts payable, and case handling operations. - Managed a team of offshore engineers, delivering projects 15% faster by implementing QA protocols and aligning team objectives. - Delivered 50+ Qlik Sense dashboards for cargo tracking and invoicing, improving decision-making efficiency by 30% for key business stakeholders. - Designed real-time Power BI dashboards that provided actionable insights to 20+ stakeholders, driving operational excellence. - Improved query performance and data accessibility for enterprise users by optimizing Snowflake-based star schema models. - Automated data integration workflows using Python scripts, improving data accuracy by 60% and saving 10 hours of manual effort weekly. - Implemented CI/CD pipelines with Git and Jenkins, streamlining big data architecture deployment on AWS platforms.

Tools and Technologies: SQL, Python, Microsoft SQL Server, Oracle, SSIS, SSRS, Snowflake, Qlik Sense, Power BI, AWS

Enziq- Solutions, India April 2019 – September 2019 Business Analyst Intern
- Advanced KPI reporting capabilities by creating dynamic Tableau dashboards, resulting in a 15% improvement in reporting accuracy and actionable insights. - Coordinated with global teams across the USA and India, delivering multilingual dashboards for international clients, improving customer satisfaction by 20%.

Academic Project:

Real-Time Cuisine Flavor Folio – Capstone Project
Developed an AI-powered, user-friendly platform for food enthusiasts, serving as an advanced search engine for diverse cuisines.
- Designed and implemented real-time data pipelines using Apache Spark Streaming, ensuring efficient ingestion, cleaning, and tokenization of large datasets, and integrated sentiment analysis with NLTK to categorize feedback into Positive, Negative, or Neutral sentiments. - Engineered an AI-driven search algorithm with Python, JavaScript, and PyTorch, delivering precise, personalized results while enhancing scalability and performance through distributed storage in Snowflake. - Built interactive Tableau dashboards to visualize sentiment trends and key insights, enabling data-driven decision-making for users and administrators, and optimized multi-screen interfaces using Python and Tkinter for seamless navigation. Ensured compliance with data privacy regulations while optimizing storage systems and integrating advanced functionality for real-time analytics and system performance improvements.

Education:

Central Michigan University, Mount Pleasant, MI	August 2022 – May 2024
Master of Science - MS, Information Systems	GPA: 3.56/4
Mahatma Gandhi Institute of Technology, Hyderabad, India	2019
Bachelor of Engineering, Robotics & Automation technology	

Certifications	Publications
Process Mining (Celonis): From Theory to Execution	"An Overview on Business Intelligence, Big Data Analytics, and Typical Requirements of Clustering in Data Mining" Published in IJERT (11IS030007)
Lean Six Sigma Green Belt (CSSGB): Certified	
Cloud Platforms: AWS, Azure, Salesforce	
Data Camp: Advanced Python, SQL, R Programming
