EDUCATION

University of Maryland, College Park

MPH, Biostatistics

May 2022

Capstone Project: "Evaluating the Relationship Between Substance Use and Suicide Ideation Among Adolescents: ADD Health Wave I"

BS, Biochemistry

May 2018

WORK EXPERIENCE

Statistician I

June 2022 – Present

Noridian Healthcare Solutions, Fargo, ND

- Conduct advanced statistical analyses and sampling to support fraud, waste, abuse, medical necessity, and overpayment investigations in compliance with CMS and regulatory requirements
- Develop proactive analytics and statistical models to identify anomalous billing patterns, provider trends, and program integrity risks across large Medicare claims datasets
- Extract, prepare and analyze large, multi-source datasets using SQL (Teradata, Snowflake), SAS, Python, Business Objects, and Excel
- Design, validate, and automate recurring and ad-hoc reports, visualizations, and dashboards to communicate findings to technical and non-technical stakeholders
- Ensure data accuracy, statistical validity, and methodological soundness through rigorous data validation, testing, and quality control processes
- Translate complex analytical findings into actionable insights and recommendations for senior leadership, Medical Directors, and external stakeholders
- Lead data-driven initiatives and cross-functional collaborations to define objectives, analyze trends, and forecast outcomes
- Provide mentorship, documentation, and governance leadership, including training team members, streamlining workflows, and authoring policies on data access, authorization and privacy

ORISE Fellow

June 2021 – June 2022

CDC National Center for Health Statistics, Hyattsville, MD

- Conducted predictive analyses of race/ethnicity using CDC RANDS I & II survey data in SAS, applying machine-learning methods including regression trees and random forests
- Identified and evaluated sources of bias in health survey estimates using qualitative and quantitative methods, including data visualization and data science techniques
- Contributed to survey methodology research by analyzing how socio-demographic and cultural factors influence respondent interpretation and processing of survey questions
- Co-authored a peer-reviewed study leveraging National Vital Statistics System data to quantify changes in age-adjusted mortality rates, injury mechanisms, and racial/ethnic disparities among U.S. youth before and during the COVID-19 pandemic

PUBLICATIONS

Rossen, L. M., Resendez, A., **Behdin, A.**, St Louis, M., *et al.* (2024). *Trends and disparities in deaths among young persons in the US during the COVID-19 pandemic. Annals of Epidemiology*, 91, 37-43. doi:10.1016/j.annepidem.2024.01.009.

SOFTWARE & TOOLS

- Microsoft Office Suite, SAS, R, SQL, Python, Snowflake, Databricks, Business Objects, Power BI
