Kansas City, MO (Willing to Relocate), 4692659450, sohamambekar21@gmail.com, [linkedin.com/in/sohamambekar](https://www.linkedin.com/in/sohamambekar)

SUMMARY

Skilled Data Analyst/IT Security professional with expertise in tools such as Tableau, Power BI, and Excel. Experienced in database management with MySQL, Oracle SQL, and Microsoft SQL Server. Proficient in coding with Python, PowerShell, and PySpark. Strong background in data modeling, data science, and risk management. Seeking opportunities to leverage technical skills in a dynamic work environment.

WORK EXPERIENCE

ECCO Select (North Kansas City Hospital), Kansas City, US

09/2024 – Present

Data Analyst/ IT Security

- Cataloged Power BI organizational assets, including users, reports, dashboards, and workspaces by Invoking MicrosoftPowerBIMgmt Cmdlets in PowerShell, enhancing operational risk visibility.
- Led the creation of a security group containing a Microsoft Entra application in cross-functional collaboration for utilizing Scanner APIs in the organization, facilitating the identification of sensitive metadata in data sources.
- Produced Active Directory Organizational Unit group lists through PowerShell scripting, pinpointing strategic user groups to grasp the current understanding of which users have what level of access to key resources.
- Analyzed previous implementation documentation and dataflow diagrams of a 3rd party healthcare analytics vendor to optimize fundamental data governance understanding of analytics and reporting pipelines.
- Orchestrated meetings with vendor representatives and business owners as part of a security review, engaging in process management to check compliance with existing dataflow policies.
- Automated the end-to-end workflow for ingesting, validating, & archiving MSSP (Medicare Shared Savings Program) files by integrating MFT with PySpark, ensuring 100% CMS compliance.

Kroger Co., Remote, United States

05/2023 – 08/2023

Technology Intern

- Operationalized business intelligence pipelines by conducting data cleansing with PowerPivot to optimize and categorize raw data to be added to data lakes. Presented and understandably communicated the findings.
- Designed Power BI dashboards integrated with multiple data sources, enabling KPI monitoring and reporting, exhibiting findings to stakeholders, boosting business-driven decision-making by 50%.
- Strengthened application security by mitigating vulnerabilities, reducing high-severity risks by 75%. Participated in Agile CI/CD processes, completing 100% of assigned user stories.

Ingram Micro, Mumbai, India

06/2019 – 04/2022

Business Data Analyst

- Discovered dead carts & proposed a 30-day auto-delete mechanism to prevent inventory holding on large orders.
- Pioneered 10+ complicated views using SQL/DAX that powered Power BI dashboards used by 4 internal teams.
- Leveraged functional expertise & automated HTTP/SFTP protocols to process data to clients with 99% accuracy.
- Managed simultaneous projects in a fast-paced environment using Jira, ensuring 100% on-time delivery and alignment with stakeholder expectations.
- Processed ad-hoc requirements using MS Excel functions like VLOOKUP and Pivot Tables to business analysts.

EDUCATION

MS in Information Technology and Management

The University of Texas at Dallas • Richardson, TX

BE in Computer Science

University of Mumbai • Mumbai, India

CERTIFICATIONS

[Google Data Analytics](#)

[Oracle Cloud Infrastructure](#)

[Oracle Data Management](#)

[Databricks Lakehouse Fundamentals](#)

PROJECTS

[Instacart Market Basket Analysis](#)

- Focused on identifying top 10 products, peak traffic hours, best-selling product category, customer buying cycles, and most frequently repurchased items through time series analysis to uncover the bigger picture in consumer behavior.
- Launched 7+ dashboards displaying the Service, Product, and Category evaluations & designed a compelling data story.

[Natural Disasters Impacting Refineries](#)

- Pinpointed tornadoes and flooding as top disproportionate risks, jointly accounting for 50% of disasters threatening Texas/Louisiana ExxonMobil refineries through calculated data synthesis.
- Championed an interactive multi-map spotlighting vulnerable refineries, enhancing disaster risk identification by 20%.

[Credit Risk Analysis](#)

- Demonstrated proficiency in handling imbalanced datasets, feature engineering, visualization libraries using cross-validation, hyperparameter tuning, and interpreting machine learning models to derive valuable business insights.
- Programmed credit risk prediction model using XGBoost, achieving a 0.72 recall score in identifying bad credit risks.

Pricing Analysis of Airlines

- Identified key pricing parameters across destinations by analyzing Excel flight datasets, reducing pricing errors by 11%.
- Formulated aggregate functions, pivot tables, and filter controls to uncover pricing trends, empowering informed business strategy and travel decisions through data-driven insights.

SKILLS

Languages: R, Python, PySpark, Oracle SQL, Microsoft SQL Server, NoSQL, PowerShell

Visualization: Tableau, Power BI, Visio

Cloud: Microsoft Azure, Amazon AWS

Others: Microsoft Office, Matplotlib, Pandas, Numpy, XGBoost, Decision Trees, Logistic Regression, Clustering, Data mining, Forecasting, Hypothesis Testing, Bayesian Analysis, Big Data, Risk Management, Data Governance
