U.S. Citizen & Eligible for Security Clearance

Backend Engineer specializing in the Java/Spring ecosystem. Passionate about building robust RESTful services, optimizing SQL databases, and implementing scalable design patterns like DAO and DTO.

SKILLS

- **Languages:** Java, SQL, C.
- **Backend & Frameworks:** Spring Boot, Spring MVC, Spring Web, Spring Security.
- **Data & API Development:** Hibernate ORM, Spring Data JPA, RESTful APIs (JSON/XML).
- **Databases:** Oracle, H2, PostgreSQL.
- **Data Modeling:** Relational Schema Design, Data Integrity, Normalization, SQL Query Optimization.
- **Architecture & Patterns:** Dependency Injection (DI), DAO & DTO Patterns, MVC, CRUD.
- **Testing:** JUnit: JUnit 5, Test Automation, Integration Testing.
- **Environment & Tools:** Maven, Git/GitHub, Postman, Linux, IntelliJ IDEA, Eclipse, Jira.
- **Methodologies:** Agile (Scrum), SDLC, CI/CD.
- **Web Fundamentals:** HTML, CSS.

EDUCATION

Bachelor of Science in Computer Science

George Mason University, Fairfax, VA

Graduated: December, 2025

Relevant Coursework: Data Structures & Algorithms, Database Systems, Software Engineering, Networking, Software Testing, Artificial Intelligence.

PROJECTS

E-Commerce REST API Backend

Tech Stack: Java, Spring Boot, Spring Data JPA (Hibernate), H2/Oracle, Maven, Postman.

- **Architected** a scalable backend service using **Spring Boot** and **MVC architecture**, implementing **RESTful APIs** and **DAO/DTO patterns** to ensure modularity and secure data transfer.
- **Implemented** data persistence using **Hibernate ORM** and **Spring Data JPA**, mapping entity relationships to an **H2 in-memory database** while enforcing **Data Integrity constraints**.
- **Validated** API functionality and performance using **Postman**, performing comprehensive endpoint testing to ensure 100% functional accuracy and consistent **JSON** responses.

Network Routing Simulator

Tech Stack: Java (Multithreading, TCP Sockets), Eclipse, Git.

- **Engineered** dynamic network convergence by implementing **Distance Vector Routing** using **TCP Sockets** and **Multithreading**, enabling synchronized, real-time routing table updates across distributed nodes.
- **Optimized** pathfinding logic by implementing **Link State Routing** via **Dijkstra's Algorithm**, conducting a comparative analysis of convergence efficiency and network stability.
- **Developed** a comprehensive logging system for per-round routing updates, streamlining the verification of convergence patterns and improving debugging efficiency for complex network states.

WORK EXPERIENCE

Data Entry & Accounts Receivable – Envira, VA (2025):

- Maintained 100% data integrity for large financial datasets by applying rigorous validation and normalization.
- Streamlined accounts receivable tracking to ensure cross-record consistency and eliminate data redundancy

Front Desk & Administration – Wyndham Garden Manassas, VA (2018–2025):

- Resolved complex operational and scheduling conflicts using systematic problem-solving.
- Reconciled daily financial reports and resolved billing discrepancies with 100% accuracy.
