Objective

Motivated **Master's student in Information Technology** specializing in **Business Analytics**, actively seeking internships and full-time roles as a **Business Analyst** or **Data Analyst**. Skilled in **data analysis, visualization, SQL, Python, Power BI, Tableau** and **database management**, with familiarity with **C++, Java**. Passionate about leveraging data-driven insights to solve real-world challenges and contribute to organizational success. Certified as a **PEGA Senior System Architect (V8.4, V8.6)**, with additional skills in **Deep Learning** and **Machine Learning** from MathWorks, and currently advancing skills in **Microsoft Power BI** and **Google Cloud**.

Education

Lawrence Technological University

May 2023 – April 2025

Master of Science in Information Technology (MS)

- GPA: 3.9/4.0
- **Coursework:** : Systems Analysis and Design, Advanced Computer Networking, Python for Data Analysis and Visualization, Database Management Systems, Cyber Security, Data Science for Business, Project Management, Intro to Social Media Data Analytics, Business Analytics and Intelligence, Visual analytics.

Rajalakshmi Engineering College, India

August 2018 - May 2022

Bachelor of Science in Computer Science & Engineering (BS)

- GPA: 3.5/4.0
- **Coursework:** Problem-solving and Python programming, Data Structures, Digital System Design, Design and Analysis of Algorithms, DBMS, OOPS, Operating Systems, Computer Networks, Theory of Computation, Cryptography and Network Security, Internet Programming, Game Programming, Artificial Intelligence, Mobile Computing, Compiler Design, Data Warehousing And Data Mining, Internet of Things, Cloud Computing, Data Analytics, Software Project Management.

Experience

Data Optimization Intern

Detroit, MI, USA

Axios Professional Recruitment (CADE Program)

Jan 2025 - Apr 2025

- Collaborated with start-ups and incubator teams to refine business development plans, conduct market research, and assist with execution.
- Analyzed market trends and consumer behavior to identify opportunities for growth and propose data-driven solutions.
- Assisted in product and market development, providing valuable insights and contributing to system implementations.

Consumer Insights and Market Intelligence Extern ship

Michigan, USA

Beats by Dre

Oct 2024 – Nov 2024

- Conducted comprehensive research on macro-consumer trends, focusing on Gen Z behaviors and preferences, using methods like surveys and interviews to gather actionable insights.
- Performed a sentiment analysis to assess market perception and competitor positioning, presenting data-driven strategic recommendations to enhance Beats' connection with Gen Z.
- Developed critical thinking, leadership, and communication skills, excelling in time management and professionalism while collaborating in a dynamic setting.

Pega Developer Intern

Chennai, IND

Areteans

March 2022 - Sept 2022

- Led the development of complete case life cycles from analysis to implementation, ensuring 100% Guardrails compliance and on-time deployment of Pega applications.
- Designed and customized Pega workflows, processes, UIs, correspondence, SLAs, and reports, achieving a

20% increase in user satisfaction and 30% efficiency gains through optimized configurations and seamless integration.

- Enhanced application performance and reliability through REST connectivity, data modeling, and validation. Implemented agile methodologies including branching for efficient project management.

Python Developer Intern

Chennai, IND

Virtusa

Dec 2020 - Feb 2021

- Led a team of five to the semi-finals of Virtusa's hackathon, achieving a top 3% ranking for the Intelligence Edge use case.
- Developed a home surveillance system with precision 78%, employing live video frame analysis of CCTV with Python, OpenCV, and Google Colab.

Projects

Twitter Airline Feedback Analysis for Social Media Insights

- Conducted sentiment analysis on airline feedback tweets using Natural Language Processing (NLP) and implemented machine learning algorithms to classify sentiments.
- Tools Used: Python, Pandas, Matplotlib, Seaborn, NLP Libraries (NLTK/SpaCy), Machine Learning Algorithms

Sales Analysis Dashboard Development Using Power BI

- Developed an interactive Power BI dashboard that integrates data from SQL databases, utilizing DAX for complex calculations and real-time metrics.
- Tools used: Power BI, DAX, SQL

Consumer Insights and Analysis Extern ship at Beats by Dre

- Analyzed consumer data to derive actionable insights using advanced data analytics tools and statistical techniques, optimizing product positioning strategies.
- Tools Used: Python, SQL, Excel.

Analysis of Newborn Baby Names

- Analyzed naming trends and demographic data using Python and visualized the results with Matplotlib and Seaborn.
- Tools Used: Python, Matplotlib, Seaborn, Microsoft PowerPoint

Diabetes Prediction Model Development

- Built a machine learning model using k-means clustering for diabetes prediction and validated its performance using cross-validation techniques.
- Tools Used: Python, Scikit-learn, Pandas, Matplotlib

PEGA-Based Digital Transformation Projects

- Led various digital transformation initiatives using PEGA, automating workflows and integrating REST APIs to streamline processes across multiple business domains, including motor insurance, hardware sizing, loan origination, and laundry services.
- Developed and implemented PEGA-based rules engines, workflow automations, and optimized service delivery processes to improve operational efficiency and customer satisfaction.
- Tools Used: PEGA, REST API, Rules Engine, Workflow Automation, Data Modeling

Intelligent Edge Hackathon Project

- Built a home surveillance system using Python and OpenCV to analyze live CCTV video frames and detect activities with machine learning models.
- Tools Used: Python, OpenCV, Google Colab
