Profile Summary

- Experienced Full Stack Software Developer with 2 years of expertise in developing scalable high-performance applications, focusing on both backend and frontend technologies.
- Strong experience with cloud technologies and DevOps practices, including CI/CD pipeline management, ensuring seamless deployment, scalability, and high availability.
- Proficient in optimizing database performance with MySQL, PostgreSQL and Mongo DB, integrating APIs, and leveraging Agile methodologies to deliver enterprise-level SaaS applications that are both efficient and reliable.
- Skilled in software testing with Junit, Mockito, and Selenium, and experienced in deep learning techniques, particularly in face recognition systems using Python, OpenCV, CNN, and the Viola-Jones Algorithm.

Companies

Spark Cloud INC – Software Developer Full Stack

Aug 2024 – Present

EY – Software Engineer Full Stack

April 2021 – Aug 2022

Projects

Scalable Microservices Application with Cloud Deployment and Automation, Spark Cloud INC

Developed scalable backend applications with a microservices architecture, ensuring efficient database integration and optimized performance. Designed responsive front-end applications to deliver seamless user experiences, integrating them with backend services. Managed deployment and ensured scalability and high availability in cloud environments. Automated development processes and maintained high application quality through thorough testing and security practices. | *Java, Spring Boot, Microservices Architecture, MYSQL, PostgreSQL, React JS, Restful APIs, AWS, Docker, Kubernetes, CI/CD, Jenkins, GitLab, Junit, Mockito, Selenium* |

High-Performance SaaS Application Development, EY

worked on building and maintaining enterprise-level SaaS applications that were scalable and high-performing. My role involved creating efficient solutions, integrating APIs seamlessly, optimizing database performance, and ensuring the software was reliable through thorough testing. I collaborated closely with cross-functional teams and followed Agile practices to deliver quality results.

| *Java, SQL, PL/SQL, JavaScript, Angular, HTML, CSS, XML, JSON, Junit, MongoDB, Restful API s, Agile, OOP, Data Structures & Algorithms* |

Deep Learning for Face Recognition under complex illumination conditions, Lamar University

Designed and developed an automated face recognition attendance system that ensures accurate feature extraction and robust performance across diverse environments by optimizing model functionality under varying conditions. The system replaced manual attendance tracking, significantly reducing human error and improving operational efficiency through real-time implementation, enabling seamless and precise face recognition during live operations.

| *Python, Open CV, LPBH, CNN, Viola-Jones Algorithm, Deep Learning Frameworks* |

Technical Skills

Programming Languages: java, JavaScript, Python, SQL, PL/SQL.

Backend Development: Spring Boot, Microservice Architecture, RESTful APIs.

Frontend Development: React JS, Angular, HTML, CSS, XML, JSON.

Database: Oracle, MySQL, PostgreSQL, Mongo DB.

Cloud & DevOps: AWS, Azure, Docker, Kubernetes, CI/CD, Jenkins, Terraform, Git, GitLab, GitHub.

Operating Systems: Windows, Linux.

Testing & Tools: Junit, Mockito, Selenium, Agile, Data structures & Algorithms, Eclipse, IntelliJ, VS Code.

Education

Lamar University

Master of Science in Computer Science – CGPA: 3.45/4.0

Aug 2022 – May 2024

Beaumont, Texas, USA

Bharath University

Bachelor of Technology in Computer Science – CGPA: 7.88/10.0

Aug 2017 – April 2021

Chennai, Tamil Nadu, India
