SUMMARY

Business Analyst with over 3+ years of experience delivering data-driven solutions and process improvements. Skilled in requirement elicitation, process mapping, workflow optimization, and Agile project management using tools such as JIRA, Confluence, Visio, Lucidchart, and Balsamiq. Proficient in data analysis, ETL, SQL, Tableau, Power BI, and Snowflake, with a proven track record of driving operational efficiency, risk reduction, and strategic decision-making. Adept at collaborating with cross-functional teams, translating business needs into actionable deliverables, and ensuring compliance and quality in project execution.

SKILLS

Business Analysis & Documentation: Requirement Elicitation, BRDs, FSDs, User Stories, GAP Analysis, SWOT Analysis, Cost-Benefit Analysis, Process Mapping, Workflow Analysis, Use Case Models

Project Management & Agile: Agile/Scrum, Sprint Planning, Backlog Grooming, Retrospectives, JIRA, Confluence, Stakeholder Management, Cross-functional Collaboration

Data Analysis & Reporting: SQL, Excel, ETL Analysis, Data Validation, Data Modeling, KPI Tracking, Tableau, Power BI, Snowflake

Process & Workflow Tools: Visio, Lucidchart, Balsamiq, Wireframing, Process Flow Diagrams, Process Optimization

Testing & Quality Assurance: UAT, Test Case Preparation, Defect Tracking, Functional Testing, Validation

Domain Knowledge: Healthcare Claims Processing, Insurance Workflows, ERP Systems, Regulatory Compliance

Soft Skills & Others: Communication, Stakeholder Alignment, Documentation, Training & Knowledge Transfer, Risk Assessment, Problem Solving, Automation Recommendations

EXPERIENCE

Business Analyst | United Healthcare Group, USA

Jan 2025 - Present

- Gathered and documented business requirements by conducting JAD sessions, stakeholder interviews, and workflow analysis, ensuring alignment between product owners, compliance teams, and development.
- Translated business needs into functional requirements, BRDs, and user stories in JIRA/Confluence, supporting Agile sprint planning and backlog refinement.
- Collaborated with cross-functional teams to design ETL workflows and data mappings for claims data migration into a centralized data warehouse (SQL, Snowflake), enabling more accurate and faster claims adjudication.
- Created process flow diagrams, use case models, and wireframes using Visio/Balsamiq, helping to streamline manual claims handling and reduce cycle time by 30%.
- Developed UAT test cases, coordinated with QA teams for validation, and utilized Tableau/Power BI dashboards to provide KPIs on claims automation efficiency, regulatory compliance, and SLA adherence.

Analyst | Capgemini ITC, India

Oct 2021 - Dec 2022

- Proactively facilitated sprint planning, backlog grooming, and retrospective sessions using Jira, significantly boosting Agile delivery velocity by 25%.
- Designed, developed, and deployed interactive Power BI dashboards for real-time claims tracking, effectively reducing operational reporting time by 30% and enhancing executive decision-making.
- Conducted comprehensive SWOT and risk assessments across complex insurance workflows, implementing process improvements that resulted in a 25% reduction in claims errors.
- Authored detailed BRDs and SRS documentation, ensuring 98% requirements traceability and seamless alignment between technical teams and key stakeholders.
- Created visual process workflows and diagrams using Visio and Lucidchart, and performed thorough GAP and cost-benefit analysis, optimizing business processes and improving overall ROI.

Business Analyst | Experion Technologies, India

May 2020 - Sep 2021

- Conducted requirement elicitation sessions with stakeholders across Finance, HR, and Operations to gather and document functional and non-functional requirements, ensuring alignment with business objectives.
- Created BRDs, FSDs, and user stories using JIRA and Confluence to facilitate Agile development sprints.
- Collaborated with cross-functional teams to analyze business processes, map workflows, and identify process gaps, resulting in recommendations for system enhancements and automation.
- Assisted in data modeling, data validation, and ETL process analysis using SQL and Excel, ensuring accurate migration of legacy data into the new ERP platform.
- Developed wireframes, process diagrams, and use case models with Visio/Balsamiq, enabling developers and QA teams to understand and implement requirements effectively.
- Coordinated User Acceptance Testing (UAT) by preparing test cases, tracking defects in JIRA, and ensuring solutions met functional requirements before production deployment.
- Created interactive dashboards and KPI reports using Power BI/Tableau, providing stakeholders with insights into ERP adoption, system efficiency, and process compliance.

EDUCATION

Masters in Information Systems and Business Administration | University of Memphis and Memphis

Dec 2024

Bachelors in Electronics and Communication Engineering | MRITS, Hyderabad, INDIA

May 2021
