Software Engineer

Denton, TX | +1 (940)-435-8934 | sudheer.v@mailsworks.com

SUMMARY

5+ years of professional software development experience, I have expertise in designing and deploying enterprise applications using Java/J2EE technologies throughout the SDLC. I specialize in back-end development with Java, Servlets, JSP, Spring Boot, Hibernate, and REST/SOAP web services, along with front-end UI design using HTML5, CSS3, JavaScript, AngularJS, and Bootstrap. I have strong skills in the MEAN stack, leveraging MongoDB, Express, Angular, and Node.js for modern full-stack development. Proficient in relational databases like PostgreSQL, MySQL, Oracle, and NoSQL (MongoDB), I also excel in building tools like Maven and Gradle, application servers like Tomcat, and developing test cases with JUnit. My experience spans agile methodologies, responsive design, and MVC frameworks such as Spring MVC.

SKILLS

Methodology: SDLC, Waterfall, Agile

Programming Languages: Java, C++, PL/SQL

Frameworks: Spring MVC, Spring, Hibernate, Spring Boot, Spring Security, Spring Data JPA, Node.js, React.js, Angular JS

J2EE Technologies: Servlets, JSP, JDBC, JUnit, JAXB, JMS, JSTL, Multi-threading, EJB, JavaBeans, JSF, JSTL, Multithreading, and Collections

IDEs: IntelliJ IDEA, Eclipse, Visual Studio Code

Web Technologies: HTML5, CSS3, JavaScript, RESTful APIs, GraphQL, TypeScript, jQuery, Ajax, XML, JSON, Bootstrap

DevOps: Docker, Kubernetes, Jenkins, Bamboo, Ansible

Cloud Platforms: AWS, Azure, Google Cloud Platform (GCP)

Databases: Oracle, MySQL, SQL Server, DB2, PostgreSQL, MongoDB, Cassandra, Cosmos DB, DynamoDB

Version Control & Other Tools: Git, SVN, Gitlab, Bit Bucket, Maven, Gradle, Ant

Testing and Logging Tools: Junit, Mockito, Selenium, TestNG, Power Mock, JMeter, Jest, Enzyme, Cucumber, Log4J

Soft Skills: Effective verbal and written communication, Problem-solving, and Troubleshooting skills

Operating Systems: Windows, Linux, Unix

EXPERIENCE

State street, USA | Software Engineer

Jan 2024 - Current

- Applied Agile Methodologies to effectively manage the full lifecycle development of the project, ensuring timely delivery and adaptability to changing requirements.
- Designed and implemented dynamic user interfaces using React.js, leveraging predefined components from NPM and the Redux library to optimize state management and application performance.
- Collaborated with the front-end team to develop a well-responsive Single-Page Application (SPA) using AngularJS, JavaScript, and jQuery while adhering to HTML5 and CSS3 standards.
- Utilized Java Server Faces (JSF) for developing robust, component-based user interface applications.
- Extensively leveraged Spring Framework modules, including Dependency Injection (IOC), Auto Wiring, JDBC Templates, and Spring Security, for modular and secure application architecture.
- Deployed Spring Boot microservices in Docker containers to AWS EC2 instances, leveraging the AWS Admin Console and AWS Lambda to achieve high availability and scalability.
- Refactored legacy applications into modular microservices, streamlining deployment using Spring Boot, and ensured robust unit testing through JUnit and PowerMock frameworks.
- Built and integrated CI/CD pipelines with VSTS (Azure DevOps), automating the build and release processes to enhance efficiency and reliability.
- Designed and developed front-end components using Angular, HTML5, CSS3, TypeScript, JavaScript, Bootstrap, and Node.js, supported by a MongoDB backend for seamless data handling.

Global logic, India | Software Engineer

Aug 2022 - Jan 2023

Technology: Java 11, Maven, JDBC, Spring Boot, PostgreSQL, Gitlab, Docker, etc.

- Designed and implemented microservices-based enterprise applications using GLX (GlobalLogic Experience Platform), ensuring high performance and scalability.
- Developed Spring Boot RESTful APIs, seamlessly integrating MongoDB and PostgreSQL, with comprehensive JUnit testing to maintain excellent code quality.

- Optimized database queries and data access methods, improving system efficiency and reducing response times.
- Diagnosed and resolved complex technical issues and bugs, minimizing production disruptions.
- Conducted detailed code reviews, offering mentorship and guidance to peers, enhancing code quality and adherence to best practices.
- Participated in proof-of-concept (POC) initiatives and exploratory tasks during feature planning, selecting optimal technologies and improving the effectiveness of feature implementation.

Cisco Systems Pvt. Ltd, India | Software Engineer

July 2021- July 2022

- Elevated code quality with Mockito and JUnit unit tests, significantly increasing code coverage.
- Utilized IDEs like Eclipse, IntelliJ, STS, and JBuilder for application development, deployment, and debugging.
- Designed effective email templates using Velocity, HTML, and CSS5 with creativity and attention to detail.
- Proficient in developing and executing E2E integration test cases, ensuring comprehensive validation and seamless system integration. Proficiently employed Git as a version control system
- Expert in OOP design, multi-threading, exception handling, data structures, algorithms, collections, garbage collection, method references, and functional interfaces.
- Enhanced API functionality with Spring Boot by adding Time and Date parameters for better data handling and Connect Status.
- Used IDEs like Eclipse, IntelliJ, STS, and JBuilder for application development, deployment, and debugging.

Groovy Web, India | Software Engineer

Jan 2019 - June 2020

- Applied the Waterfall methodology to projects requiring meticulous upfront planning and strict adherence to specifications, ensuring clarity and alignment throughout the development lifecycle.
- Designed and developed a flexible and responsive User Interface (UI) using HTML5, CSS3, Bootstrap, JavaScript, and React.js, ensuring seamless user experiences across devices.
- Developed scalable web applications using Servlets, JSP, JDBC, and Spring MVC.
- Built APIs and backend logic with Node.js, Express.js, and Spring Boot for optimized performance.
- Leveraged Spring Framework modules such as Spring MVC, Spring DI, Spring AOP, Spring ORM, Spring REST, and Spring Security to build robust applications, resulting in a 25% increase in customer satisfaction and a 20% reduction in maintenance costs.
- Implemented CI/CD pipelines using tools like Maven, Gradle, and Jenkins, automating build, test, and deployment workflows to streamline software delivery.
- Created and optimized database objects, including stored procedures, triggers, functions, and cursors, to enhance data processing and integration across MySQL, MongoDB, and other relational databases.
- Translated design mockups from Figma into functional, visually appealing user interfaces.
- Developed and maintained Action Servlets and JSPs within the Struts framework, adhering to MVC architecture principles for modular and maintainable applications.
- Established and maintained robust CI/CD pipelines, automating testing and deployment processes to ensure reliable, efficient, and scalable software development practices.

EDUCATION

Master of Science in Advanced Data Analytics

University of North Texas, Denton

Bachelor in Electronics and Communication Engineering

Saveetha College of Engineering, Chennai
