SUMMARY

Accomplished Data Analyst with around 4 years of experience transforming complex datasets into strategic insights that drive business growth. Proficient in Python, R, and SQL for data analysis, with expertise in designing and maintaining dashboards using Tableau and Power BI. I am proficient in Oracle, SQL Developer, and data analysis, with strong expertise in User Acceptance Testing, Regression Testing, and Functional Testing. I have worked on IT Business Analytics, Data Profiling, and ensuring data accuracy to drive business insights. With knowledge of Agile and Waterfall SDLC methodologies, I provide timely, data-driven solutions. My experience includes working with HIPAA compliance, Medicare billing, ICD coding, and EDI transaction validation. I excel in gathering requirements, creating use cases, and supporting system implementations. My analytical skills and ability to communicate effectively enable me to bridge the gap between clients and technical teams for successful project outcomes.

SKILLS

SQL: MySQL, PostgreSQL, Microsoft SQL Server, Oracle

Data Visualization: Tableau, Power BI, Qlik Sense

Data Warehousing: Amazon Redshift, Snowflake

ETL: Informatica PowerCenter, Talend, Apache Nifi, Microsoft SSIS

Data Profiling & Cleansing: Trifacta, Alteryx, Talend Data Preparation

ML & Predictive Analytics: Python (Scikit-learn), R (Caret, RandomForest), SAS

Cloud Platforms: AWS (Amazon Web Services), Microsoft Azure

Healthcare Data Standards: FHIR, HL7, ICD-10

Business Intelligence: Power BI, Tableau

Data Modeling: Erwin Data Modeler, Oracle SQL Developer

Big Data Processing: Apache Hadoop, Apache Spark

EDI: Mirth Connect, EDIFACT, HL7 Integration Engine

Data Security & Compliance: HIPAA Compliance, GDPR, Data Loss Prevention (DLP) tools

EXPERIENCE

Data Analyst | McKesson, USA

Jan 2023 - Present

- Leveraged Agile methodologies to optimize data analysis workflows, ensuring timely delivery of actionable insights to cross-functional teams.
- Developed advanced analytical and statistical models to predict, classify, and forecast key business metrics, facilitating informed decision-making and enhancing healthcare solutions.
- Managed data imports and updates through SSIS packages and SQL, addressing exceptions and ensuring the integrity of production data for business operations.
- Conducted comprehensive analysis of ICD-9 to ICD-10 mappings, contributing to system enhancements and ensuring smooth transitions in coding practices.
- Utilized ETL tools, SQL, and Crystal Reports for data validation and analysis, developing insights into healthcare outcomes, quality initiatives, and financial performance.
- Analyzed healthcare data files to understand data structure and business rules for transformation, ensuring accurate and efficient data processing.
- Developed and maintained data mapping documents for HIPAA X12 transactions to ensure seamless claims processing and data integration.
- Created custom administrative reports by accessing metadata from Tableau Server (PostgreSQL DB), enabling actionable insights for business decisions and reporting needs.

Data Analyst | Accenture, India

Jan 2019 – Jan 2021

- Analyzed complex raw healthcare claims and clinical data, identifying data patterns, addressing potential issues, and recommending quality improvement initiatives for enhanced clinical program effectiveness.
- Performed statistical analyses to evaluate clinical program outcomes, leveraging tools such as MS Access and SQL Server Reporting Services (SSRS) to create detailed, parameterized reports.
- Conducted comprehensive analysis of data warehouse requirements, working closely with users to identify dimensions and facts for analysis, supporting the design and implementation of the data warehouse.
- Developed and executed source-to-staging ETL jobs, ensuring data cleansing, validation, and standardization for consistent and accurate data transformation across systems.
- Designed and developed ETL processes to extract and load data from various sources (e.g., SQL Server, flat files) into Oracle databases, ensuring accurate data flow and integration.
- Created logical and physical data models using Erwin to capture current and future state data elements, applying Star Schema methodologies to design optimal data models for reporting.
- Developed and maintained data marts and warehouses using Star and Snowflake Schema models, creating complex views and integrating data for use in Tableau reports and other business intelligence tools.

EDUCATION

Master of Science in Computer Science | Stevens Institute of Technology, Hoboken, NJ

Dec 2022

Bachelors of Technology in Mechatronics Engineering | Mukesh Patel School of Technology Management & Engineering, Mumbai.

May 2020
