EDUCATION

St. Francis College

Master of Science in Information Technology

New York, NY

Jan. 2024 – Present

Lovely Professional University

Bachelor of Technology in Electronics and Communication Engineering

Punjab, India

Jun. 2017 – July 2021

EXPERIENCE

Software Engineer

VVDN Technologies

Jan. 2021 – Dec. 2023

Kerala, India

- Developed high-volume, low-latency, and interactive web applications using rich client-side technologies such as React.js and Angular, as well as MVC-based server-side frameworks like Spring Boot and Node.js with Express, ensuring high availability and optimal performance.
- Implemented and optimized features that directly contributed to revenue growth, such as improving user engagement and enhancing product functionality, which resulted in measurable impacts like a 30% boost in client revenue.
- Collaborated effectively within a cross-functional team, working closely with product managers, architects, UI designers, and QA engineers to align development efforts with project goals and timelines using agile methodologies and tools like Jira and Azure DevOps.
- Mentored junior developers by providing guidance on best practices, conducting code reviews, and offering support in problem-solving, fostering a culture of continuous learning and improvement within the team.
- Oversaw development work by reviewing and approving designs, ensuring compliance with project specifications and architectural guidelines, and performing thorough code reviews to maintain high code quality standards.
- Utilized version control systems like Git and implemented CI/CD pipelines such as Jenkins and GitLab CI to streamline the development process, improve code integration, and facilitate faster, more reliable deployments.
- Implemented robust testing strategies, including unit testing like JUnit, Jest, integration testing, and end-to-end testing with Selenium and Cypress, to ensure the reliability and stability of applications. Optimized application performance through techniques like code refactoring, implementing caching solutions through Redis, and fine-tuning database queries while using monitoring tools like New Relic and Prometheus to identify and address bottlenecks.

PROJECTS

| *Python, Flask, React, PostgreSQL, Docker*

June 2020 – Present

- Developed a full-stack web application using with Flask serving a REST API with React as the frontend
- Implemented GitHub OAuth to get data from user's repositories
- Visualized GitHub data to show collaboration
- Used Celery and Redis for asynchronous tasks

Simple Paintball | *Spigot API, Java, Maven, TravisCI, Git*

May 2018 – May 2020

- Developed a Minecraft server plugin to entertain kids during free time for a previous job
- Published plugin to websites gaining 2K+ downloads and an average 4.5/5-star review
- Implemented continuous delivery using TravisCI to build the plugin upon new a release
- Collaborated with Minecraft server administrators to suggest features and get feedback about the plugin

TECHNICAL SKILLS

Languages: Java, Python, SQL(Postgres), JavaScript, HTML/CSS,

Frameworks: React, Node.js, Express.js Angular, JUnit, Jest

Developer Tools: Git, Docker, VS Code, Visual Studio, Azure

other tools: Selenium, Cypress, Jira

Methodologies: Agile
