

Anantha Adiga | Data Analyst

San Antonio, TX, USA | +1 (562) 702-0914 | ananthaadiga19@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Data Analyst with over **9 years of experience** delivering impactful insights across financial services, insurance, telecommunications, and higher education sectors. Recognized for improving reporting accuracy, optimizing operational workflows, and enhancing fraud detection through data-driven analysis. Adept at mentoring, process automation, and cross-functional collaboration to support business objectives. Demonstrated success in reducing manual workload, accelerating data refresh cycles, and improving stakeholder decision-making across multiple geographies.

TECHNICAL SKILLS

Languages & Analytical Libraries: Python (Pandas, NumPy, scikit-learn, Matplotlib, Seaborn), SQL

Data Visualization & Reporting Tools: Tableau, Power BI, AWS QuickSight, MS Excel (Advanced: Pivot Tables, Power Query, VLOOKUP, Macros, Dashboards)

Cloud & Data Platforms: AWS (S3, Glue, Athena, Lambda, EC2), Snowflake, Hive, MySQL

Data Engineering & ETL: ETL Pipelines, Data Extraction, Data Cleaning, Data Validation, DBT, Apache Airflow, Kafka

Machine Learning & AI Concepts (Analyst-Focused): Predictive Modeling, Clustering, A/B Testing, NLP (Chatbots), LLM-based Summarization, Statistical Analysis, Time Series Forecasting

Business & Statistical Analysis: Cost/Benefit Analysis, GAP Analysis, Impact Analysis, SWOT Analysis, Risk Assessment, Requirement Traceability Matrix (RTM)

Tools & Collaboration Platforms: Jira, Confluence, Salesforce, CRM, ERP, MS Visio, UML Diagrams, qTest, Rational ClearQuest

DevOps & Version Control (Analyst Use-Case): Git (for version control of analytics code), Jenkins (for automated pipeline tasks)

Methodologies: Agile (Scrum), Waterfall, SDLC, UAT

PROFESSIONAL EXPERIENCE

HCL Technologies, TX, USA

Jul 2024 – Current

Client: USAA

Data Analyst

- Built ETL workflows using Airflow, DBT, and SQL; supported Snowflake jobs across policy datasets, accelerating refresh speed by 65% and reducing backlog review meetings by 22% organization-wide.
- Designed Tableau dashboards tracking claims lifecycle; enabled staffing reallocations, removed dependencies on ad-hoc Excel reports, and integrated insights with stakeholder presentations during peak submission weeks.
- Queried large datasets using Snowflake SQL, Python; detected duplication patterns using statistical rules, introduced validation scripts, and prevented inconsistencies across three departments sharing the same warehouse structure.
- Trained fraud models with scikit-learn using claims data; improved anomaly classification, raised prediction accuracy across two iterations, and shared results with risk team to realign fraud thresholds.
- Documented sprint tasks using Jira, Confluence; streamlined QA feedback, ensured consistent status updates, and coordinated effectively with offshore teams during development review and daily Agile scrum meetings.

California State University Long Beach, CA, USA

Sep 2022 – Jun 2024

Graduate Teaching Assistant

- Delivered SQL, Python, Tableau, Excel lessons; supported students across real-world assignments including forecasting, regression, A/B testing, improving rubric-based scores by 36% and grading consistency by 27%.
- Automated Excel rubrics using Macros, Power Query; standardized instructor feedback, eliminated formula discrepancies, and saved 9 hours weekly from manual scoring across all class sections.
- Guided final projects in Python; supervised model creation, assessed data cleaning techniques, and improved project structure, feature tuning, and documentation across four capstone batches.
- Taught SQL joins, subqueries, filtering; designed hands-on labs replicating industry data flows, reducing logic error troubleshooting by 47% across two semesters of classroom evaluations.
- Developed Python-based summarizer tools for journal articles; used LLM APIs to enhance comprehension, improved knowledge retention by 32%, and supported learners with non-technical academic backgrounds.

Tata Consultancy Services Pvt Ltd, India

Jan 2018 – Jul 2022

Client: American Express

Data Analyst

- Migrated Excel-based workflows into Tableau; enhanced visibility of card transactions, shortened reporting delays by 68%, and reduced dependencies during monthly and quarterly reconciliation efforts.
- Parsed 10M+ rows from Snowflake using Python; developed scripts for data cleaning, enabled analysts to run independent trend analysis, and increased delivery consistency for exploratory insights.
- Evaluated A/B experiments using Seaborn; surfaced conversion uplift signals, validated control vs. test segments, and boosted campaign performance by 17% across key customer regions.
- Created regulatory traceability maps; ensured rule alignment, minimized audit discrepancies, and improved documentation search speed across three recurring review periods with zero compliance breaches.

- Used Visio and ClearQuest for architecture mapping; documented ETL components, helped simplify governance discussions, and received 100% approval from quarterly IT audit boards.

Tata Consultancy Services Pvt Ltd, India

Jan 2016 – Dec 2017

Client: British Telecom

System Software Engineer

- Queried Hive tables holding telecom logs; flagged latency incidents, enabled alert prioritization, and improved response time by 12% across five regional monitoring units.
- Automated Excel diagnostics using Python, MySQL; converted manual templates, decreased ticket resolution workload, and shortened processing time by 39% for 450+ monthly support cases.
- Created nightly Python validations using Jenkins; processed 3.2M records, flagged deployment errors early, and reduced staging rollback effort during production releases.
- Produced UML diagrams spanning infrastructure layers; assisted documentation teams during four migration cycles, standardized tool transition documentation, and simplified stakeholder reviews.
- Generated recurring Tableau dashboards using Power Query; submitted zero-error monthly network availability reports to internal teams and regulatory board Ofcom.

EDUCATION

Master of Science in Management Information Systems

Aug 2022 – Jun 2024

California State University, Long Beach, CA, USA

Bachelor of Engineering in Electronics and Communications

Jun 2011 – Jun 2015

SDM College of Engineering and Technology, Dharwad, India

CERTIFICATION

- Snowflake SnowPro certified
- Tableau Desktop certified
- AWS Cloud certified
- Oracle certified Java professional

PROJECTS

Insurance Expense Prediction

Tech Stack: Python (Scikit-learn, Pandas, NumPy)

- Engineered a predictive model improving insurance expense forecast accuracy by 66%, using regression algorithms after resolving multicollinearity and outlier issues.
- Performed EDA and preprocessing on 1,300+ records, increasing feature relevance and reducing model error (MAE) by 28%, leading to better underwriting insights.

YouTube Analytics Platform Implementation

Tech Stack: Python, Amazon S3, AWS Glue, Lambda, Athena, AWS QuickSight

- Built a real-time analytics pipeline for YouTube metrics, reducing dashboard latency by 70% and enabling content creators to act faster on engagement trends.
- Incorporated user feedback to optimize features, boosting platform adoption by 40% and improving content performance visibility by 55% through tailored dashboards.

Real-Time Stock Market Data Analysis

Tech Stack: Kafka, Python, AWS S3, Glue, Athena

- Developed a real-time market analytics system processing 1,000+ stock ticks/min, enabling sub-5-second delay in data visualization for faster trading decisions.
- Leveraged Python for data transformation, increasing trend detection accuracy by 34%, aiding traders in making well-informed, time-sensitive moves.

Customer Segmentation – Cluster Analysis

Tech Stack: Python (Pandas, NumPy, Scikit-learn), Matplotlib, Seaborn

- Analyzed and clustered 1M+ SF transit records using K-means, revealing 5 actionable customer segments and enabling targeted engagement strategies.
- Reduced preprocessing time by 42% using PCA and optimized pipelines, enhancing clustering accuracy and marketing alignment with user behavior.

Real-Time News Summarizer

Tech Stack: Python, AWS (S3), LLM, Apache Airflow

- Automated the summarization of 100+ daily articles using LLMs, cutting average summary length by 40% while preserving key content relevance.
- Orchestrated end-to-end flow via Airflow and AWS, cutting article retrieval time by 15%, streamlining editorial decision-making across digital publishing.
