EXPERIENCE:

National Criminal Justice Association	Washington, DC (Remote)
Senior Data Analyst	July 2023 – Present

National 501(c)(3) non-profit, non-partisan, member association dedicated to assisting criminal justice agencies in the development and implementation of effective criminal justice policy.

- Improved data processing efficiency by creating automated reporting queries for national crime data
- Developed client facing Umbraco hosting site with partitioned data reporting access based on user grouping (ex: State Organization, Report Access, etc.)
- Established and documented reporting standards for report development
- Used Microsoft Power Apps to create internal tools for reporting and tracking
- Developed interactive reporting interface using Power BI, Looker, and Tableau
- Ad hoc data reporting technical assistance to support state needs
- Developed/maintained data models to ensure accuracy of data

Safe-Guard Products International	Atlanta, Georgia (Remote)
Senior Incentives Data Analyst	February 2022 – July 2023

Leading provider of branded vehicle protection products in the finance and insurance space to the automotive, RV, marine and motorcycle/power sports industries.

- Developed and maintained functionality of proprietary incentive platform reporting suites partitioned by user roles
- Compiled, analyzed, and published national reported data using data analysis tools such as SQL, Looker, Power BI, and Microsoft Excel
- Collaborated with stakeholders to understand business requirements and translate them into interactive dashboards (Power BI, Looker, and Tableau) along with accompanying training documents

Andrue Delgado

Data Analyst

andrue.delgado@gmail.com
323.594.0310

- Coordinated with Development team using Jira to input/modify/test system rules and programming in production, UAT, and development environments to meet changing business needs
- Utilized program management tools (Smartsheet, Microsoft Teams, and Agile methodologies) to complete deliverables within requested deadlines
- Utilized data analysis and visualization tools (Tableau, Power BI, and Looker) to identify trends, patterns, and insights to increase program profitability and team process efficiency

Los Angeles County Department of Health Services

Los Angeles, California

Business Analyst (Contract)

June 2021 – February 2022

Integrated health system focused on advancing the health of patients and community through compassionate, inclusive care.

- Worked as a key member of LA County's COVID-19 Response Team within Policy and Procedures Department
- Managed 3rd party development of Personal Health Information (PHI) tracker application and established automated integration with California Immunization Registry (CAIR)
- Served as a liaison between Los Angeles County and its vendors to gather business requirements needed for system modifications and implementations
- Designed technical specifications and process flows using Microsoft Visio
- Performed data management and data quality assurance

Family Promise of San Gabriel Valley

Los Angeles, California

Project Manager

September 2016 – June 2021

National 501(c)(3) non-profit dedicated to eradicating family homelessness across the country.

- Created client database accessible through SQL for more accessible data analysis
- Established new office management protocols to enhance productivity, efficiency, and time management
- Streamlined contact directories and updated technological automation using Microsoft and Google suites
- Coordinated with regional directors and local stakeholders, organized schedules, and led events for the successful fulfillment of the organization's goals
