PROFESSIONAL SUMMARY:

- **8.3 Years** of experience in **Salesforce as Developer & Administration** with domain experience including analysis, requirement gathering, design, developer, enhancements, testing, deployment and maintenance of standalone object-oriented enterprise applications.
- Good experience in developing Salesforce **Lightning Apps, Components, Controllers and Events**.
- Experience with the SDLC process in **agile** methodology. Strong implementation and rollout experience with Salesforce.com, Communities, Sites and Force.com platform, post implementation support.
- Built **Lightning components** using Aura framework with backed Apex Logic.
- Experience in SFDC development using **Apex** classes and **Triggers, VisualForce, S-Controls, Force.com** IDE, SOQL, SOSL.
- Experience in CRM Application such as **Salesforce.com, Sales Cloud, Marketing Cloud, Service Cloud**.
- Excellent skills in creating/troubleshooting/modifying Apex code and visual force pages.
- Proficiency in **SFDC** Administrative tasks like creating Profiles, Roles, Users, Page Layouts, Email Services, Approvals, **Workflows, Validation rules, Tasks** and actions.
- Experience in creating, maintaining and enhancing visual flows, workflows, approval processes, formula fields, validation rules, field dependencies, automated alerts, and field updates according to application requirements.
- Good understanding of configuration and maintenance of security settings such as implementing organization wide defaults, role hierarchies, criteria/ owner-based sharing rules, profiles and **permissions, setting login hour, and IP** ranges in compliance with organizational needs.
- Experience in Data Migration using Import Wizard and other integration tools like Infosphere, **Apex Data Loader**
- Experience working on Eclipse IDE with Force.com Plug-in for writing business logic in **Apex**
- Experience in web technologies like **HTML, XML, CSS, JSP, JavaScript, WSDL, and SOAP**.
- Created the visual force pages and integrated with external legacy systems using **REST** based web services.
- Experience with data integration (batch and real time) using various kinds of data sources via **SOAP and REST**.
- Worked on Developing the interfaces between on-premise database and Salesforce using **REST** Web Services.
- Experience in developing Integration Solution using **MuleSoft API Gateway and Talend ETL** to Fetch data from Legacy Applications.
- Experience in **DocuSign CLM Integrating** in Salesforce and Conditional tags and Merge fields to fetch the data from Salesforce.
- Worked on **DocuSign CLM Workflow Builder** for Contract Management.
- Designed, developed and deployed various **Data Integration** interfaces.
- Worked with **Integration** and web services. Integrated Salesforce with legacy systems using **Apex Web services and outbound messaging**.
- Have good working knowledge in querying salesforce.com database using **SOQL & SOSL** queries using Force.com Explorer.
- Developed custom **Reports** and **Dashboards**, for management using **Tabular, Summary, Matrix and Joined** reports.
- Migrated data from Siebel to Salesforce using **Data Loader, Cast Iron and Informatica ETL** tool.

TOOLS AND TECHNOLOGIES:

Salesforce.com CRM	Salesforce CRM, Salesforce SFA, Apex Language, Apex Classes/ Controllers, Apex Triggers, SOQL, SOSL, Visual Force Pages / Components, S Controls, Salesforce Outlook, Marketing & Community Cloud, Apex Web Services, AJAX, Workflow & Approvals, Dashboards, Analytic Snapshots, Case Management Automation, Custom Objects, Apex Data Loader, SOAP API, REST API, Informatica cloud.
Salesforce Tools	Eclipse, Force.com Eclipse IDE Plug-in, Force.com Explorer, Force.com, Data Loader, Force.com Excel Connector, Force.com Platform, Informatica cloud.
Source Control	Git, GitHub
Tools	Force.com IDE, Eclipse IDE Plug-in, Force.com Explorer, AppExchange, Data Loader, MuleSoft.
Java Skills	Java, J2EE
Web Technologies	Web Services, XML, HTML, CSS, JavaScript, jQuery.
Methodologies	Agile, Scrum
Computer Skills	SQL, PL/SQL, Advance Excel (Data functions, Pivot tables, Reference Lookups etc.), Access.
Language	Apex, C, C++, Java, Java Script, Action Script, UML, HTML, XML, XHTML, DHTML, SQL, VB Script
Databases	Windows NT / 2000 / Vista, Windows Server [...] UNIX, Windows 7.
Servers	Apache Tomcat, Web logic
Operation System	Windows [...] UNIX (Solaris, HP-UX), MS Word, MS Excel, MS Office.

PROFESSIONAL EXPERIENCE:

Client: Charter Communications 2022 – Till Date Role: Salesforce Developer/Admin	Feb
--	-----

Responsibilities:

- Worked closely with business users, analysts for requirements understanding, analyzing, and preparing technical documents for the functional requirements.
- Developed complex application and update throughout **SDLC**, including analyzing business requirements, developing technical specifications, planning, coding, testing implementation and QA.
- Developed **Visual Pages** to include extra functionality and wrote **Apex Classes** to provide functionality to the visual pages.
- Created workflow rules and defined related tasks, email alerts, and field updates.
- Implemented Pick lists, Dependent picklists, lookups, Master detail relationships, Validation, and formula fields to the Custom objects.
- Created page layouts, search layouts to organize fields, custom links, related lists, and other components on record pages.
- Wrote an **Apex Trigger** on **Contact** for cross-object field update for reporting purposes.
- Creating a new **User Interface** using **JavaScript**, **HTML** and **CSS** in VisualForce Pages.
- Used the sandbox **for testing and migrated the code to the deployment instance** after testing.
- Extensively used **Informatica debugger** to figure out the problems in mapping

- Extensively used **Informatica debugger** to figure out the problems in mapping.
- Created **workflows for automated Lead Routing, Lead Escalation, and Alerts & Custom**

Coaching Plans.

- Integrated salesforce data with external systems by writing salesforce **REST Web Services** for Inbound classes and used Http Request methods to call external application **REST API** endpoints.
- Developed the **Apex Classes, Standard & Custom Controllers, Visualforce pages, Apex Triggers** for various functional needs in the application.
- Used **field level security** along with page layouts to manage access to certain fields.
- Using **workflow rules** created time-based workflow rules.
- Worked on integration of **Apptus CLM with Docusign**.
- Experience in **Apptus CLM, X-Author, Apptus Approval Management**
- Worked on **Docusign Conga queries and Conga reports** to extract the data for Contract Management.
- Experience in Understanding **Conga templates, eSignatur tags, Merge tags** in Docusign Conga.
- Created forms, **Configuration, Libraries, Eforms In DocuSign CLM and Implemented Workflow** to Send the Contracts to Email.
- Experience In **CLM User Management, eSignature and to run SOQL** to determine Salesforce User access.
- Add **CLM custom buttons to Lightning and Classic page layouts** so users can trigger a **Document Generation template with a single click**.
- Experience in creating **workflows, Documents, Eforms, Grouping Logic to Templates using CLM Application**.
- Experience in customizing the **activities of each workflow step and variables and further automate by using C# expressions**.
- Integration with your supply chain **management system** allows for better visibility into customer demands, helping to optimize inventory levels and production planning.
- Experience in release management in our **salesforce** platform, ensuring the team is **properly** utilizing DevOps deployment tools like Copado and best practices.
- Worked as a release coordinator for two teams during deployment, developed and trailed Demos on Copado.
- Service Cloud can be utilized to handle **customer inquiries**, complaints, and returns related to your supply chain. This can lead to quicker issue resolution and improved customer satisfaction.
- Experience in requirements gathering, surveys/Questionnaire development, Business **requirement documents (BRD), Functional requirement documents (FRD)**.
- Experience in **Case Management, Knowledge Base Workflow and Approvals, Service Analytics, Telephony Integration,Service Cloud Voice,Visual Remote Assistant**.
- Written **Validation Rule for maintaining clean data** and enforcing restrictions based on business requirements.
- Involved in **administering, configuring, maintaining Salesforce.com application** user profiles, roles, Permissions and Page Layouts.
- Involved in developing, implementing & testing on the Sandbox environment.
- Worked on **Tab permissions, Record Type permissions and Field Level Security to implement Component-based security**.
- Involved in querying sales force tables using **SOQL & SOSL queries using Force.com Explorer**
- Integrated Salesforce.com with external systems like **Oracle and SAP using SOAP API and REST API**.

- Implementation of Lightning components using the **Lightning Design System (LDS)** in Aura Framework and **Lightning Web Components (LWC)**.
- Worked on creating **Workflows** and workflow actions to send emails, update fields and assign tasks.
- Worked with **Dynamic Apex to access S-Objects** and field describe information, execute

dynamic **SOQL, SOSL and DML queries**.

- Created modern Enterprise **Lightning Apps combining Lightning Design System, Lightning App Builder and Lightning Component features**.
- Worked on **Tabular, Summary and Matrix reports** to create Standard reports and Custom reports.
- Design and Develop the Apex Classes, **Standard & Custom Controllers, Visualforce pages, Apex Triggers** for various functional needs in the application.

Environment: SOQL, SOSL, Data Loader, Eclipse, Salesforce 1 Sandbox Simulator, Bit Bucket, Git Bash, JSON, Lightning App Builder, Copado, WorkBench, VisualForce (Pages, Component & Controllers), Workflow & Approvals, Reports, Lightning, Custom Objects, Custom Tabs, Email Services, Reports, SOAP, REST API, DocuSign, Apex Triggers.

Client: Salesforce.com 2021 - Dec 2021 Role: Salesforce Developer	Jul
--	-----

Responsibilities:

- Worked on **Integrations, Sales cloud, supported cases, developed workflows and triggers** for automated case resolution.
- Created many Reusable **Lightning Components with SLDC framework** like **Spinner**, components. Worked on **Metadata API** to add or remove lightning components or buttons in page layouts with single click.
- Participated in enhancements to **salesforce deliverables by involving in user acceptance testing (UAT)** and working internal areas within the organization.
- Experience in **API Documentation** describing the endpoints, explaining which is accessible to both beginners and more advanced users.
- Experience in **Documenting REST APIs, Resource required to use the API, possible error messages when interacting with the API and terms of Use**.
- Implementation of lightning components using **Lightning Design System (LDS) in Aura Framework** and developed **Lightning Web Component (LWC), Apex, VisualForce components**.
- **Worked on Apex, controller and controller extension**.
- Worked with **Lightning Design System, Lightning App Builder, Lightning Component Framework, Lightning customizations, Lightning CSS Framework**.
- Experience in creating Custom Objects, Lookup and Master detail Relationship on the Objects and created **Junction objects to establish connectivity among Objects**.
- Created UI Pages as per business Requirement using **Lightning Web Components (LWC)**.
- Created and Invoked **Apex methods to read data from Custom Objects in LWC**.
- Worked on **SOSL and SOQL Queries with consideration to Governor Limit to export bulk data and data modification**.
- Experience in creating **Named Credential using Password Authentication**, and modifying

those in Apex class.

- Performing **Inbound and Outbound callouts** with external systems using **REST API, SOAP web service API and JSON sterilization and sterilization**.
- Involved in creating **Apex class, visual Force pages for RFP** (Request for Proposal) as per business.
- Worked with various Applications in App Exchange like **Apttus, Field trip trial, Riva cloud, DocuSign** and implemented them.
- Performed **Data Modeling, Data Extraction and Transformation** using Informatica on Demand.

- Developed **Workflow Rules, Time-Dependent workflow actions, Email Alerts and Field updates**.
- Analyzing the **existing code and adding new Methodologies** to the existing without any impact.
- Worked with **Validation Rules, Workflows, Approval Process and Reports & Dashboards**.
- **Single sign-on, connected apps, social sign-on for community portal authentication, Two-factor authentication for Community's**.

Environment: Salesforce.com CRM Application Platform, Force.com Apex Language, SOQL, SOSL, Visual Force, Data Loader, Eclipse, Salesforce 1 Sandbox Simulator, Salesforce1 Mobile App, Sublime Text, Bit Bucket, GitHub, Aura Framework, SLDS, HTML, CSS, JSON, Lightning App Builder, Jira, Work Bench, Bootstrap, JavaScript, Scrum Methodology, Apttus.

Client: Mosaic (Phoenix, AZ)

Dec 2019 – June 2021

Role: Salesforce Developer

Responsibilities:

- Participated in requirements gathering from clients, estimating the number of hours required for the development work.
- Worked on multiple projects, designed, developed and deployed **Apex Classes, Controller Classes, Extensions and Apex Triggers** for various functional needs in the application using the **Eclipse IDE**.
- Worked on Salesforce Lightning Components for building customized components replacing the existing ones.
- Experience in modifying Visualforce pages to be supported in Lightning Experience and good understanding of lightning mode and its features.
- Created workflow rules and defined related tasks, time triggered tasks, email alerts, filed updates to implement business logic.
- Involved in migration of Chatter capability to new **Salesforce1 platform** for over 8,000 users including definition, guidelines and usage of Chatter and integration with **Salesforce1 platform**.
- Integrated Salesforce with external master detail using **REST** and **SOAP** API's.
- Worked with Integration and web services. Integrated Salesforce with legacy systems using Apex Web services and outbound messaging.
- Implementation of **Lightning components** using the **Lightning Design System (LDS)** in Aura Framework and **Lightning Web Components (LWC)**.
- Used third party tool - File exporter for migrating Documents, Attachments objects.
- Integrated the web services using REST and SOAP by generating the necessary stubs from the

WSDL files for extracting the data from the home-grown applications.

- Implemented Sales cloud and incorporated the enhanced features as required to streamline the **business process**.
- Designed, developed, and **deployed Apex Triggers, Apex Classes**, Visualforce Pages, Controller & **Extension Classes**, and Test Classes for Unit testing and for various functional needs in the application.
- Created new sandbox and freshened them with Production as and when required.
- Configured Creating Roles, **Security Access, Profiles, Email Services, Page Layouts, Workflow Alerts**, Actions, and Approval Processes.
- Lightning Experience - Formatting and migrating user data into LE, Implemented Salesforce Lightning Components for a small set of users within the organization.
- Built Customized Lightning Components replacing the existing one's using Java script on the client side and apex on the Server side.

- Enabled **Aura Framework** by adding Aura Attributes and Aura Handlers for Events to focus on Logical and Interactions in Lightning Application.
- Worked on **Service Cloud** and involved in configuring and integration of **CTI** for Inbound and Outbound calls.
- Worked on **Sales Cloud** and **Service Cloud** with functionalities like Opportunity Management and Case Management.
- Worked on Salesforce communities which replace Salesforce customer and partner portals.
- Used **SOQL & SOSL** with in Governor Limits for data manipulation needs of the application
- Worked with **Multi-Currency, Multi-Language, Product** & Price book set-ups.
- Used the sandbox for testing and migrated the code to the deployment instance after testing.
- Created page layouts, search layouts to organize fields, custom links, related lists, and other Components on a record detail and edit pages.
- Worked on Salesforce standard objects like Accounts, Contacts, Opportunities, Products, Price Books, and Opportunity Line Items etc. Worked on analyzing data while migrating from MS Dynamics to **Salesforce**, performed data cleansing /merging and prepared Data Dictionary for migration.
- Designed and deployed Custom Tabs, Validation rules, Approval processes and Auto-response for automating business logic.
- Worked on consolidation of all existing Workflow rules in the new Lightning Process builder flows and created one process builder for each object and managed all actions in the single flow.
- Worked on migrating components using **Force.com** Ant migration tool, Change Sets and Workbench from **DEV** to **QA, ST, UAT** and production instances.
- Worked on High Level Design document and Solution Document in addition to Business Requirement Document.

Environment: Salesforce.com platform, Salesforce Lightning, Apex Language, Visual Force (Pages, Component & Controllers), Workflow & Approvals, Reports, Lightning, Custom Objects, WSDL, Custom Tabs, Email Services, HTML5, CSS3, Controllers, Data Loader, JavaScript, SOAP, REST API, Eclipse IDE, Window 7.

Responsibilities:

- Create and Customize Custom Objects, Formula Fields, Cross Object Formulas, Roll up summary fields, validation rules, dependent picklists, and complex page layouts.
- Create **complex workflows** and Approval processes.
- Implemented Data segregation through Record Types and **Field level security**.
- Developed and maintained validation rules and custom workflow.
- Created Workflows, **Email Alerts** and Field updates as required.
- Worked on the Salesforce1 **Mobile App**.
- Prepared User document to help understand the app. Had one on one interaction with users to solve salesforce 1 app issues.
- Worked on the web to lead forms.
- Created page layouts, search layouts to organize fields, custom links, related lists and other components on a record detail and edit pages.
- Worked on **SOAP** and **REST API** web service calls.
- Used eclipse Force.com toolkit for creating **Apex Classes** and **Apex Triggers** to develop custom logic and objects.
- Created **S-Controls** to meet new business requirements.

- Created a number of users and assigned respective roles and profiles.
- Had a chance to know **five9**, a virtual call center for making inbound calls.
- Experience in working with **Five9 by leveraging the Salesforce Open CTI standard for linking the Sales Cloud and the Service Cloud**.
- Audited, uncovered and resolved data integrity issues with legacy systems.
- Complete bulk import of data from legacy System to Salesforce. Analyzing the data and making necessary changes.
- Worked on **Sales Cloud** and **Service Cloud**.
- Validated and deployed code to production through Change Set.
- Made thorough testing of requirements before deploying to production.
- Developed and maintained custom reports.
- Created Dashboards for service representatives.
- Batch reassignment of accounts and opportunities based on organizational changes.
- Prepared training materials for business use.
- Analyzing the current requirement process, identifying problems and making recommendations to improve the process.
- Migrated Current **Outlook Connector** to **Salesforce Outlook** which provides for the synchronization of information from Outlook to Salesforce.

Environment: Salesforce.com platform, Apex Language, Data Loader, HTML, Java Script, S-Controls, Workflow & Approvals, Reports, Custom Objects, Custom Tabs, Email Services, Security Controls, Sandbox data loading, Eclipse IDE Plug-in, Windows 7.
