Royal Oak, MI | (517) 974-9579 | awood1977@yahoo.com | www.linkedin.com/in/aaron-w-29a76317

I have a passion for finding ways to reduce cost, through new suppliers, six sigma process improvement activities or through supply chain activities. This is the key to ensuring a healthy profitable supply base with quality products and raw materials to help an organization achieve its goals of producing a quality product to its end users. I excel at building and fostering relationships to collaborate and achieve cost reductions as a partnership. Recently I earned a Google Data Analytics certificate, I did this as data should be driving the decision making to achieve organizational goals and I wanted to understand the process behind the analytics to be able to utilize this tool when needed.

PROFESSIONAL EXPERIENCE

MortgagePros | Troy, MI.

Business Process Manager

June 2025 – August 2025

Led process improvement and SOP development across key departments to support growth, compliance, and efficiency at MortgagePros. Collaborated with teams to streamline workflows, document procedures, and ensure alignment with industry standards.

United Wholesale Mortgage (UWM) | Pontiac, MI

Underwriter

April 2021 – April 2023

Conducted loan underwriting activities for the top mortgage company in the US, adhering to guidelines and consistently exceeding Loan Quality (LQ) and customer service Key Performance Indicators (KPIs).

- Subject matter expert for the following products; Fannie Mae, Freddie Mac, jumbo, HELOCs, and MI Busters products.
- Analyzed credit reports to understand borrower's credit capacity, housing to debt ratios. Also reviewed and approved third-party documents, including purchase contracts and title reports.
- Analyzed and assessed risks for Automated Underwriting (AUS) findings, insurance, taxes, title, and appraisal documents. Validated accuracy calculations and ensured data integrity in the AUS response.
- Verified appraisals to ensure adequate collateral following Fannie Mae and Freddie Mac guidelines.

- Collaborated with processors and mortgage brokers to identify alternative solutions for denied loan files.
- Provided mentoring for new hires on processes for underwriting and clearing conditions as well as assessing required documentation. Assessed confidence and readiness for role.
- Mentored poor performing teammates, double checked work and help develop and implement process improvement and knowledge gaps to reduce Loan Quality errors for the company to help management to improve Loan Quality.

Helix Diagnostics | Waterford, MI

Logistics/Warehouse/Purchasing Supervisor

March 2020 – September 2020

Managed the high-volume Supply Chain, outbound logistics, inbound logistics and Couriers for growing medical laboratory specializing in providing COVID tests at the height of the worldwide epidemic.

- Managed a 9-member team providing warehouse shipping, receiving, and inventory.
- Sourced and developed new relationships with 4 distributors as volume increases gave the company negotiating power to reduce cost.
- Optimized laboratory supplies across all product lines supporting unprecedented outbound PCR test, decreased cost 55% from previous supplier, with daily usage increasing from 2.5K per month to 2.5K per day.
- Built and implemented inventory tracking and reporting system using complex Excel spreadsheet to set reorder points.
- Was instrumental in costs reduction activity across labs by 33% through group purchasing umbrella and monthly allocations.
- Collaborated with Blood, Toxicology, and PCR Lab Departments to meet time-sensitive purchasing needs.
- Expanded courier routes by 100%, including hiring, training, and scheduling courier staff.
- Developed Standard Operating Procedures (SOPs) for shipping and courier roles to help ensure compliance with College of American Pathologists (CAP) standards. Wrote department-wide training manual to improve staff performance.

Atlas Copco | Auburn Hills, MI

Business Systems Analyst/Project Manager

December 2018 – August 2019

Oversaw SAP Project process design and software roll outs to three North and South American (NASA) partners.

- Collaborate with South American managers to gather business requirements then categorized and prioritized each as a government requirement, business need, or business want.
- Partnered with business process experts across business areas to identify best practices, share knowledge, and design efficient end-to-end process flows during and after SAP implementations. This included developing a tariff calculation system and one to generate government Nota Fiscal paperwork.
- Collaborated with Customer Center stakeholders and global implementation team to review customer support and inside sales business processes and drive continuous improvements.
- Created a workaround solution for the Mexican VAT tax document which was not working correctly.
- Used Jira agile tool to manage software improvements backlog and track project requirements through completion.
- Streamlined communication of requirements and software changes between business area and implementation teams to keep all stakeholders informed.
- Facilitated change management activities related to SAP implementations, including new solutions and providing support to Key Business Users to help foster confidence in the new system.

American Mitsuba Corporation | Novi, MI

Program Manager/Sales Representative

December 2015 – November 2018

Account Manager for multi-million-dollar, Original Equipment Manufacturer (OEM) Tier 1 and 2 supplier sales program generating \$120M+ in sales from leading suppliers, including Nissan.

- As a Program manager communicated with cross-functional teams of engineers, suppliers, and plant-operations to design, build, and deliver specialized automotive parts in time for new product launch.
- Maintained and analyzed product pricing, cost changes, retroactive payments, lump sum discounts, and partner numbers/deviations of pricing and design levels returning savings up to 3% over life of programs.
- Led a Process Improvement activity that led to Value Analysis (VA) and Value Engineering (VE) activities to find opportunities to reduce costs and improve products as part of Kaizen activities.
- Created Sales reports for responsible product lines, forecasting 1 - 5 year outlook on profitability and future financial performance of current business.
- Reduced product costs up to 3% and reduced environmental impacts by switching to green packaging optimizing shipping locations.

- Prepared Request for Quotation (RFQs) to maintain current business on seven platforms and multiple product lines, including an award for new flagship vehicles.
- Led APQP activities for one of the production plants as new business was awarded.
- Developed strong customer relationships and leveraged product knowledge to support key accounts, forecast and drive sales, and maintain high levels of satisfaction through renewed business.
