

FNU ABDULLAH

Sacramento, CA | 916-917-4357 | noorabdullah781@gmail.com | LinkedIn

Summary

Dynamic Data Analyst with over 2 years of expertise in database management and creating powerful analytical dashboards. Adept in SQL, Python, Power BI, Excel, and Machine Learning, paired with a robust foundation in Statistics and Mathematics. Seeking a challenging role to leverage my skills in transforming data into actionable insights that drive business success.

Professional Experience

Material Handler II | Volt Management Corps | Elk Grove, CA 95758

January 2025 – Present

- Diagnosed and repaired malfunctioning mobile devices, managed assembly, and maintained high production standards.
- Oversaw phone sorting, inspections, and repair line contributions, ensuring compliance and timely solutions for malfunctioning devices.

Data Analyst | DataBI | Remote, Islamabad, Pakistan

March 2023 – June 2024

- Achieved a 15% reduction in processing time, a 5% increase in approvals, and a 7% decrease in delinquency rates within the first quarter by developing interactive bank loan dashboards and reports that analyzed key loan metrics, regional performance, and risk assessment using impactful data visualizations.
- Achieved a 10% reduction in attrition, a 15% decrease in time-to-hire, and a 5% increase in employee satisfaction by developing an HR Analytics Dashboard that provided data-driven insights into workforce demographics, job satisfaction, and attrition trends.

Research Assistant | National University of Sciences & Technology (NUST) | Islamabad, Pakistan

Febraury 2022 – April 2023

- Achieved 99.5% accuracy in colorectal cancer tissue classification on a 5,000-image histological dataset using the EfficientNet-B7 model by developing a novel approach that combined a hybrid image filtration technique (Bilateral filter and Laplacian filter) with deep learning models (VGG-16, VGG-19, DenseNet-50, EfficientNet-B0, and EfficientNet-B7) for improved medical image interpretation.
- Achieved 93.7% accuracy in violence detection on a 1,000-video hockey fight dataset with the VGG16-GRU model by developing and evaluating deep learning models (VGG16-LSTM/GRU, VGG19-LSTM/GRU, EfficientNetB0-LSTM/GRU, InceptionV3-LSTM/GRU, Resnet50-LSTM/GRU) through optimized feature extraction, classification, and pre-processing.

Robot Process Automation Engineer | HachiAI | Remote, Pakistan

October 2021 – January 2022

- Achieved automation of invoice processing and data entry into client ERP systems by developing an Intelligent Document Workflow (IDW) system leveraging an in-house large language model (LLM) and HachiAI's Optical Character Recognition (OCR) technology.
- Ensured seamless integration of extracted invoice data from email attachments into client ERP systems using the LLM, based on provided job descriptions.

Skills

Programming: Python(NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, PyTorch) SQL, MySQL

BI Tools: Power BI, MS-Excel

Certifications: Machine Learning, Microsoft Power BI Data Analyst, Google Data Analytics, Google Business Intelligence, SQL for Data Science

EDUCATION

Masters of Science in Statistics

Sep, 2022-Aug, 2024

National University of Science & Technology (NUST)

Cumulative GPA: 3.75/4.00

Bachelors of Science in Mathematics

Sep, 2018-Jun, 2024

National University of Science & Technology (NUST)

Cumulative GPA: 3.06/4.0
