

Abdur Raheem Mohammed | Product Data Analyst

Texas | +1 (928) 814-7054 | mohammedabdurraheem01@gmail.com | [LinkedIn](#)

Summary

Product Data Analyst with 4+ years of experience in SQL and Python, driving improvements in **conversion, retention, and product performance** across high-growth consumer platforms. Hands-on in **funnel analysis, cohort analysis, and A/B testing**, translating user behavior insights into measurable impact including **8–18% improvements in key metrics**. Experienced in defining **KPIs, standardizing metrics, and building dashboards** to enable data-driven decision-making at scale, while working closely with **product managers, growth, and engineering teams** to prioritize features, optimize user experience, and drive business outcomes.

Professional Experiences

Product Data Analyst | Whatnot, USA

Feb 2025 – Present

- **Defined and standardized core product metrics** including **viewer-to-buyer conversion, engagement rates, and retention**, establishing consistent performance measurement across **product, growth, and engineering teams**
- **Analyzed end-to-end user journey** across livestream interactions, identifying **key drivers of conversion** and leading **data-backed initiatives** that improved viewer-to-buyer conversion rates by **12–18%**
- **Designed and executed A/B tests** on feature enhancements and user experience changes, owning **experiment analysis** and delivering **6–12% lift** in engagement and conversion metrics
- **Built and maintained dashboards** tracking **product performance, engagement trends, and marketplace dynamics** across **2M–5M monthly active users**, enabling real-time monitoring and faster iteration on product decisions
- Conducted **deep-dive analyses** on buyer and seller behavior, uncovering patterns in **listing performance** and **user engagement patterns** that informed product and growth strategy
- **Partnered with product managers and engineering teams** to **prioritize feature development** and optimize user experience, directly influencing **roadmap decisions** and **product iterations**

Product Analyst | Snapmint, India

Aug 2021 – Nov 2022

- **Analyzed end-to-end user funnel** (app open → eligibility → approval → purchase) using **SQL and Python**, identifying **key drop-offs** and driving improvements that increased conversion rates by **8–12%** across critical stages
- **Built and maintained product dashboards** tracking **funnel performance, user segmentation, and transaction trends** for **500K–1M monthly active users**, enabling product and growth teams to make faster, data-driven decisions
- Conducted **cohort-based retention analysis** (D7, D30) to uncover **behavioral patterns influencing repeat transactions**, informing targeted interventions to improve **user engagement** and **retention**
- **Designed and analyzed A/B tests** on checkout flow and user experience changes, identifying **winning variations** and contributing to **5–10% improvements** in conversion and feature performance
- Partnered with **product managers** and **growth teams** to **define** and **refine key metrics**, directly influencing prioritization of **product improvements** and **user experience enhancements**

Data Analyst | All Things Baby, India

Jan 2020 – Jul 2021

- Transformed **raw Shopify order, product, and customer data** into **structured datasets** using **SQL and Python (pandas)**, enabling consistent analysis of purchase behavior across **8K–12K monthly orders**
- Built and maintained **dashboards** tracking **revenue trends, product category performance, and customer segmentation**, reducing manual reporting effort by **30%** and enabling **faster decision-making** across marketing and business teams
- Analyzed **customer cohorts** (first-time vs repeat buyers) to identify **early retention patterns**, informing targeted marketing efforts and improving focus on **high-value customer segments**
- Evaluated **product category performance** and **contribution** to overall sales, identifying high-performing segments accounting for **60–70%** of total revenue and supporting prioritization of inventory and merchandising decisions
- Investigated variations in **purchase patterns** across customer segments and product categories, surfacing **drop-offs** in the purchase journey and enabling improvements in **product assortment** and **user experience**

Skills

- **Data & Querying:** SQL (Joins, Window Functions, Aggregations), Data Extraction, Data Cleaning, Data Transformation
- **Programming & Analysis:** Python (Pandas, NumPy), Exploratory Data Analysis, Data Manipulation
- **Product Analytics:** Funnel Analysis, Retention Analysis (Cohorts, D7/D30), User Segmentation, Customer Behavior Analysis, Feature Performance Analysis
- **Experimentation & Metrics:** A/B Testing, Experiment Design & Analysis, Hypothesis Testing, KPI Definition, Metric Standardization
- **Visualization & Reporting:** Power BI / Tableau, Dashboard Development, Data Visualization, Reporting Automation
- **Business & Product Thinking:** Conversion Optimization, Product Performance Analysis, Growth Analytics, Data-Driven Decision Making
- **Collaboration & Stakeholder Management:** Cross-functional Collaboration (Product, Growth, Engineering), Requirement Gathering, Insight Communication

Education

Master of Science, Informatics | Northern Arizona University, AZ, USA

Bachelors of Engineering, Electrical and Electronics Engineering | Osmania University, India
